CHARLES DUROISELLE,

SUPERINTENDENT, ARCHAEOLOGICAL SURVEY, BURMA.

THIRD EDITION.

491.375 Dwr

RANGOON:

PRINTED AT THE BRITISH BURMA PRESS.

PREFACE TO THE THIRD EDITION.

This third preface to my grammar does not require any more comment than is already found in the two previous prefaces. That it should have to go through a third impression shews that it has at least fulfilled the object for which it was written, that is, to help the students in the colleges in Burma to obtain a firm grasp of the principles of Pali grammar. The sphere of its usefulness seems to have somewhat broadened, for it is now used to a certain extent in England, America and even Japan.

My best thanks are due to Maung Hla, B. A., my old pupil in Pali and epigraphy, for his kindly and thorough reading of a second proof.

CHAS. DUROISELLE.

PREFACE TO THE SECOND EDITION.

This grammar was written at a time when it was urgently needed for schools and colleges, and as a consequence was conceived, written and seen through the press within the short space of a little over three months. Notwithstanding a few errors which had crept in-and which have now been corrected-the favour with which this work was received and reviewed in Europe, exceeded the author's expectations, if indeed he had any. Such favourable criticism it did not find in India; its great defect in the opinion of some Indian gentlemen being two-fold; it does not enough adhere to the very ancient Hindu system of grammatical exposition; this venerable system was, it is readily recognized by every scholar, the most suitable in fact the only suitable system for the method of imparting knowledge current in the times in which the earliest Sanskrit grammars and, modelled on them, the first Pali grammars were composed P But, other times, other methods; and I am not alone in thinking that the old Hindu system, whatever its undeniable merits, could not be with success adapted to the clearer, more rapid and rational Western methods of teaching. But the more unpardonable departure from the beaten track is, the author has not thought it necessary constantly to refer to the Sanskrit forms and with them compare and from them deduce the Pāli ones. It must be remembered that this comparative method, bowever excellent and useful to persons already

acquainted with Sanskrit who desire to take up the study of Pāli, does not answer in a practical manner to the needs of the class of students for whom this book has been written; that is, young students totally ignorant of the first principles of Sanskrit, and who do not, for the most part, in the least intend taking up such study. Moreover, to those who may later on, take up such a course, the close relation between the two languages will become easily apparent.

On page 314, mention is made of "a so-called Nominative Absolute;" it is explained in a Pāli work called the Nirruttidīpani, printed in Rangoon. M. Monier Williams also mentions it in the preface to his Sanskrit Grammar.

Much official and literary work in connection with other duties did not allow me to see this second edition through the press. Professor Maung Tin, of the Rangoon College, has most graciously undertaken this onerous work, and he has read and corrected every single proof. Persons who have had experience in proof-reading, above all of a book of such a character as the present one, will readily understand the magnitude of the service done me by my old pupil, and for which I beg here to thank him most sincerely.

CHAS. DUROISELLE.

MANDALAY: }

PREFACE.

THIS grammar was written for my pupils in the Rangoon College, to facilitate their work and make the study of the Pali language easier for them. is, to my knowledge, no Pāli grammar suited to the requirements of students who do not know even the clements of Sanskrit, and to place into their hands grammars such as that of Muller, of Frankfurter and of Minayef, which are intended for Sanskrit dilettanti, would serve rather to puzzle than to help them; moreover, these grammars are not quite complete, consisting merely of the inflections of nouns and verbs. Mr. James Gray's grammar, which was written with the same purpose as the one now presented to the public, has long been out of stock; it had two drawbacks; the Pali was all in Burmese characters, and it was too elementary to help the student in acquiring thorough mastery of the language.

It is, I think, the first time, that Derivation has been treated systematically and fully in a European work; the chapter on Syntax, too, though not quite exhaustive (to make it so would require a special volume) is a novel feature, considering that Syntax has never as yet been treated of, except in one single instance, and very briefly, and with no examples whatever given in illustration of the rules.

One of the greatest difficulties experienced has been to explain some forms (principally in Assimilation and Verbs), without the help of Sanskrit; scholars well understand how Pali forms, thus explained, seem arbi-

ali Grammar by H. H. Tilby, Rangoon Baptist College, 1899

trary, not to say incomprehensible in some cases; so that, although my avowed object was to write for students who do not know the first elements of Sanskrit grammar, I have thought it advisable to scatter here and there, in foot-notes or in the body of the work, a few explanations bearing on Sanskrit grammar, to make some forms better understood. But the student is perfectly free to skip them over and to assume the Pali forms just as they are given; I would however recommend him to peruse them at a second reading.

Each rule, throughout, is profusely illustrated with examples taken from the Jātakas and from other books, and indigenous Pāli grammars. The paragraphs have been numbered and, to facilitate reference in looking up the rules, they are quoted whenever necessary, to tender more easy the study of that part of the grammar which the student is actually reading.

Grammatical discoveries are not to be expected; but scholars will find in the work now issued, a few things which have never before appeared in European grammars of Pāli.

The following indigenous Pali grammars have been consulted:

Saddanīti. Mahārūpasiddhī. Mahārūpasiddhī tikā. Akhyātapadamālā. Moggallāna. Kacchāyana. Gaļon Pyan.

I have availed myself of all the grammars published in Europe to which I could have access.

Introductory (626—627); Feet (628—629); Short and long Syllables (630); Varieties of metres (631); Sama class (632); Addhasama class (634); Visama class (635); Vatta (636); Kinds of Vatta (638); Jāti (639—641); Vetāliya (642).

A PRACTICAL GRAMMAR

OF THE

PĀLI LANGUAGE.

CHAPTER I.

THE ALPHABET.

- The Päli Alphabet consist of 41 letters; namely: 6 vowels, 2 diphthongs, 32 consonants and one accessory nasal sound called Niggahīta.
- 2. The vowels are divided into short and long; the short vowels are: a, i, u,; the long vowels are ā, ī, û.
- 3. The value of a long vowel is about twice that of a short one, so that it takes twice as much time to pronounce a long vowel as to pronounce a short one.
- 4. The sign of a long vowel is a dash placed over it. Besides the above three long vowels, all short vowels are prosodically long that come before a conjunct or double consonant: for instance in, bhikkhu, rattha and puppha, the—i before kkh, the—a, before the and the—u, before pph are said to be long.

Long also are a, i, u when followed by m, (niggahita) as in: puppham, a flower; cakkhum eye; kapim, monkey.

- 5. The two diphthongs are e and o, which are always long. They are diphthongs only grammatically, because they are supposed to be the product of the meeting and contraction of two vowels (a + i = e; and a + u = o). In reality and practically they are simple vowels.
- 6. The consonants are divided into: 25 mutes, 5 semi-cowels, one sibilant and one aspirate (spirant).

The 25 mutes are divided, according to the place of their formation and utter-

ance, into five groups of five letters each.

The following table shows at a glance the classification of all the letters:—

CONSONANTS.

MUTES.

Te de la constant de	SURD.	RD,	000			J.	SONANTS.	13		A

eleida	d _B	ph	P	pp	m	JA.	841 CT	100	0.0	_

m (niggahita)-sonant.

- 7. I, is now generally considered to be a semi-vowel and it is a *liquid*, a modification of l; in palm-leave MSS l and l are constantly interchanged. I is not seldom the substitute of \dot{q} ; it is a lingual because it is pronounced as the letters of that class (t, th etc).
- 8. m or niggahita, comports, properly speaking no classification; it is merely a nasal breathing found only after the short vowels; am, im, um.
- The Guttutals, are so called from their being pronounced in the throat;

The Palatals, from being uttered by pressing the tongue on the front-palate;

The Linguals are formed by bringing the up-turned tip of the tongue in contact with the back of the .palate;

The Dentals are so called from their being pro-

The Labials are formed by means of the lips;

The Nasals are sounded through the nose;

The Sibilant has a hissing sound; and,

The Spirant a strong aspirated breathing.

The Mutes are so called on account of their not being readily pronounced without the aid of a vowel;

Surds are hard, flat, and toneless;

The Sonants are soft and uttered with a checked tone;

The Liquids, readily combine with other consonants (except, perhaps, 1);

The Aspirates are pronounced with a strong breathing or h sound added to them;

The Unaspirates are pronounced naturally, without effort and without the h sound.

THE PRONUNCIATION.

THE VOWELS.

10. a is pronounced like a in art.

ā	, ,,	1	,,	a ,,	father,
i	,,	12.11	,,	i ,,	sin, pin.
ī	**		,,	ee ,,	been, sheen.
u	. 11		,,	4 ,,	put, bull.
ũ			,,	00 ,,	tool, Boon.
e	,,		,,	a ,,	table fate.
0				0	bone, stone.

THE CONSONANTS.

11. Remark.—In all cases, the aspirates are pronounced like the unaspirates, but with the addition of a strong k sound; hence the pronunciation of the unaspirates only is given.

k is pronounced like k in king.

g	" g " garden, go.
n n	" ng " king, bring.
c ,,	"ch "church. chip.
j "	, j ,, jall, jar.
ñ n	i, ny ,, banyan.
t	., t ,, table, tack.

th, it must be borne in mind, is never pronounced like the English—th, in such words as: the, thin, etc. It is merely—t, uttered with an effort.

d is pronounced like d in deed.

n , , n ,, nag. P , , p ,, part. ph, it must be remarked, is simply the aspirate of p, and ought not to be pronounced like f. (as in; philosophy).

b is pronounced like b in book. m, y, r, 1, s, h are pronounced like the corresponding English letters.

v not preceded by a consonant, has the sound of v, in vine, vile. But preceded by a consonant, it is sounded like w in wind, win; tva, therefore, is pronounced twa.

m, (niggahīta), found always at the end of words, is, in Burma, pronounced like m in, jam, ram; in Ceylon, it is given the sound of ng in, bring, king.

CONJUNCT CONSONANTS.

- 12. Two consonants coming together form what is called a conjunct or double-consonant. For instance, in: vassa, kattha and pandopeti, the ss, tth, and nd, are conjunct-consonants.
- the five divisions of the mutes; gutturals, palatals, etc.,) can be brought together to form a conjunct-consonant: the first and second, and the third and fouth only; the fifth letter of each group, that is the nasal, can be coupled with any of the other four consonants in its group.

CHAPTER II.

SANHDI-(EUPHONY).

- 14. Sandhi (union) is that part of the grammar which treats of the euphonic changes that occur when one word is joined to another.
 - 15. Generally these changes occur :
 - (a) When a word ending in a vowel is joined: to a word beginning with a vowel.

- (b) When a word ending in a vowel, is joined to another word beginning with a consonant.
- (c) When a word ending in Niggahīta (m) is followed by a word beginning either with a vowel or with a consonant.

16. From the above it will be seen that sandhi is of three kinds.

(I) Vowel-sandhi; (II) mixed and (III) Niggahīta-sandhi.

Remark—It is not absolutely necessary that the student should master thoroughly the rules of Sandhi before beginning the study of the other chapters; but he should read them once carefully, and always refer to them whenever in the course of his reading he finds forms and combinations that puzzle him.

I.-VOWEL-SANDI.

. 17- A vowel before another vowel is elided.

. ata eletetsq a att Examples.

Elision of an Yassa+ indrivani = Yassindriyani.

Elision of a Ma avuso evarupam akasi mavusos etc.

Tada + utthahi = tadutthahi.

Elision of i, Udadha I Tillife D'Udadhumiyo.

Aggi + ahito = aggabito.

Elision of i, Bhikkhuni + ovado = Bhikkhunovado.

Dhatu + Hidryani - dhatayarahani. "

Elision of u. Jambuspadini jambadinismo?

b miojasi legen lapponitiita patena minubifitavatena...

Elision of e, Laddho me + okāso = laddho m'okāso. Gāthā me + udīritā = Gāthā m'udīritā.

Elision of o, Eso + avuso ayasma = es'avuso ayasma.

Remarks—When i is followed by a vowel it is very seldom elided: in the expression tunhassa, however, we have an example of its elision; tunhassa = tunhi + assa; tunhi ahesum, remains without change.

18. A vowel coming after another vowel may, if it is dissimilar, be elided.

EXAMPLES.

- (i) Cakkhu + indriyam = Cakkhundriyam.
- (ii) Yassa + idāni = Yass'idāni.

19. The first vowel having been elided the following vowel may be lengthened.

EXAMPLES.

- (i) Tatra + ayam = tatrayam.
- (ii) Sa + atthika = satthika.
- (iii) kiki + iva = kikīva.
- (iv) Kamma + upanissayo = kammupanissayo.

[A short vowel, a, i, u, is lengthened by putting a —(dash) over it.]

20. Sometimes, the second vowel having been elided, the preceding vowel is lengthened.

EXAMPLES.

- (i) Vi + atimanenti = vitimanenti.
- (ii) Kimsu + idha vittam = Kimsudha vittam.

21. Generally:

- (i) a or ā + i or ī = e.
- (ii) a or ā+u or ū=o.

EXAMPLES.

I .- a or ā+i or ī.

- (i) Upa + ikkhati = upekkhati.
- (ii) Jina + īritanayo = jineritanayo.
- (iii) Ava + icca = avecca.
- (iv) Bandhussa + iva = bandhusseva.

Exceptions. (a)—iti preceded by a becomes ati, as:

- (i) tassa + iti = tassâti.
- (i!) Tissa + iti = Tissâti.
- (b)-i may be elided after a; as:
 - (i) pana + ime = pana'me.
 - (ii) tena + ime = tena'me.
- (c)—Sometimes ā+i becomes ī; as; Seyyathā+idam=seyyathīdam.

II .- a or ā +u or ū.

- (i) Canda + udayo = candodayo.
- (ii) na + upeti = nopeti-
- (iii) udaka + ūmi = udakomi.
- (iv) Yathā + udaka = yathodaka.
- 22. (a) When two vowels of the same organ meet, the result is generally long: that is:

$$a+a=\bar{a}; a+\bar{a}=\bar{a}; a+a=\bar{a}: \bar{a}+\bar{a}=\bar{a}.$$
 $i+i=\bar{i}; i+\bar{i}=\bar{i}: \bar{i}+i=\bar{i}: \bar{i}+\bar{i}=\bar{i}.$
 $u+u=\bar{u}; u+\bar{u}=\bar{u}, \bar{u}+u=\bar{u}; \bar{u}+\bar{u}=\bar{u}.$

EXAMPLES.

- (i) ñāņa +ālokena = ñāņālokena.
- (ii) demi + iti = demîti.

22. (b) i and u may, before verbs beginning with a vowel, remain unchanged.

EXAMPLES.

(i) gathahi ajjhabhasi.

- (ii) adhivāsesi avihaññamāno.
- (iii) satthu adāsi.
- 23. A final vowel may remain unchanged before any other vowel when not followed by -iti, in the following cases:
 - (a) In nouns in the Vocative case: Kassappa etarh.......
 - (b) In a word ending in a long vowel, if it does not form a compound with the following word: Bhagavā utthāyāsanā.
 - (c) After particles, vowels remain unchanged.

EXAMPLES.

- (i) Atho + anto ca = atho anto ca.
- (ii) atha kho +āyasmā = atha kho āyasmā.
- (iii) No+atikkamo=no atikkamo.

Remarks.—The particles, called nipāta, are indeclinable; they are rather numerous; the following are a few of them and the most common: atha, atho, yeva, adho, yathā, tathā, tāva, yāva. eva, iva, va, re, are, ca, hi, tu, kacci, kho, khalu, kira, pana, ce, nanu, nūna, nāma, etc., etc.*

ā, u, ati, pati, pa, pari, ava, parā, adhi, abhi, anu, upa, apa, api, sam, vi, ni, nī, su, du (Saddanīti: Catupadavibhāga).

All the other indeclinables are, of course, nipata.

^{*} There are two kinds of indeclinable words: the Nipāta or adverbs and the Upasagga, or prepositions. The prepositions are only 20 in number:

Note.—Final vowels before particles beginning with, a, i, e, as: atha, iva, eva follow the rules of sandhi, as;—

- (i) itthī + iti = itthîti.
- (ii) sabbe + eva = sabbe'va.
- (iii) so + eva = sveva.
- (vi) na + ettha = n'ettha.
- (d) i and u before a verb may remain unchanged: see, 22 (b).
- 25. The vowel e, when followed by a long dissimilar vowel, and also when followed by a short dissimilar vowel followed by a conjunct consonant, may be elided.

EXAMPLES.

- (i) Me + āsi = m'āsi.
- (ii) Sace + assa = sac assa.
- 26. After o, a vowel is usually elided.

EXAMPLES.

- (i) Yo + aham = yo 'ham.
- (ii) cattaro + ime = cattaro 'me.

Transformation of Vowels into Semi-vowels.

- 27. The vowels i, u, e, o, when followed by another vowel may be transformed into their semi-vowels.
 - (i) The semi-vowel of i and e, is y.
 - (ii) The semi-vowel of a and o, is v.

(IX)

- (a)-Final i, before a dissimilar vowel is changed to y.
 - (i) vi + ākāsi = vyākāsi.
 - (ii) vitti + anubhuyyate = vittyanubhuyyate.
 - (iii) dāsi + aham + dāsyāham.

Remarks. - iti + eva = itveva.

(b)—In such words as: me, te, ke, ye, etc. e is changed to-y; and, if the a following e, stands before a single consonant, it is lengthened to ā.

EXAMPLES.

- (i) me + aham = myâham.
- (ii) me + ayam = myâyam.
- (iii) te + ayam = tyâyam.
- (iv) te + aham = tyâham.
- (v) ke + assa = kyassa (34).

Exceptions. (a)—Final e may be elided before a long vowel; as:

me + āsi = m'āsi.

- (b) Final e may be elided before a short vowel followed by a double consonant; as: sace+assa=sac' assa.
- (c) Final e sometimes elides a following vowel; as:
 - (i) te + ime = te 'me.
 - (ii) sace + ajja = sace 'jja
- (d) Final e+a may give ā; as; sace+ayam = sacâyam.

II.

(a)—When u, is followed by a dissimilar vowel, it is changed to v.

EXAMPLES.

- (i) anu + eti == anveti.
- (ii) dhātu + anta = dhātvanta.
- (iii) dhātu + attha = dhātvattha.
- (iv) bahu + ābādho = bahvābādho.
 - (v) su + āgatam = svāgatam.
- (vi) anu + addhamāsām = anvaddhamāsam.

Exceptions. (a)—Final u may be elided before a dissimilar vowel; as:
sametu + āyasmā = samet' āyasmā.

- (b) Not seldom, u+i gives ū; as: Sādhu+iti=sādhûti
- (b) Final o, may be changed to v before a dissimilar vowel.

EXAMPLES.

- (i) ko + attho = kvattho.
- (ii) agamā nu kho + idha = agamā nu khvidha.
- (iii) yato + adhikaranam = yatvadhikaranam.
- (iv) yo + ayam = yvayam.
- **Exception.** Final o before a long vowel or a short vowel followed by a double consonant is generally elided; as:
 - (i) kuto + ettha = kut'ettha.
 - (ii) tato + uddham = tat'uddham.
 - (iii) tayo + assu = tay'assu.
- Remarks 1.—The change of u and o to v occurs chiefly when u or o comes after one of the following consonants: k, kh, t, th, d, na, y, s and h**
 - 2.—Sometimes, after i or ī, y is inserted before a word beginning with a vowel, to avoid a hiatus as:
 - (i) aggi + āgāre = aggiyāgāre.
 - (ii) sattami + atthe = sattamiyatthe.

^{*} Saddaniti, part III, Saadhisuttamala.

- 3.—Similarly, to avoid a hiatus, a v is inserted between final u and another vowel; as:
 - (i) du + angikam = duvangikam.
 - (ii) bhikkhu+āsane=bhikkhuvāsane.

(See Consonantal Insertions).

CONSONANTAL INSERTIONS.

- 28 (a) Not seldom, to avoid a hiatus, a consonant is inserted between two vowels.
- (b) The consonants thus inserted are: y, v, m, d, n, t, r, l (=l) and h.*
- (c) Of these, the most frequently used are: d, τ, m, y and v.

Remarks.—Some of these consonants are mere revivals from the older language, as in:

puna + eva = punareva.

puna + eva = punare

Here, the r is simply revived.

,,

EXAMPLES OF INSERTION OF CONSONANTS.

Insertion of y, (i) na + imassa = nayimassa.

(ii), mā + evam = māyevam.

,, (iii) santi + eva = santiyeva.

,, of v, (i) bhū +ādāya = bhūvādāya.

,, (ii) migī bhantā + udikkhati = migī bhantā vudikkhati.

, (iii) pa + uccati = pavuccati.

" of m, (i) idha +āhu = idhamāhu.

(ii) lahu + essati = lahumessati.

" (iii) bhayati + eva = bhayatimeva.

^{*} Sa daniti gives also, h.

Insertion of d, (i) saki + eva = sakideva.

- (ii) tāva + eva = tāvadeva.
- ,, (iii) sammā + aññā = sammādaññā.

Remarks.—The insertion of d, is constant after the particle u, and very frequent after: sakim, kenaci, kiñci, kinniñci, koci, sammā, yāva, tāva, puna; as well as after the bases of pronouns such as: ya, ta, sa, etc.*, as:

u + aggo = udaggo; u + apādi = udapādi; kenaci + eva = kenacideva; yāva + attham = yāvadattham; puna + eva = punadeva; ta + attham = tadattham; ta + antaro = tadantaro; eta + attham = etadattham.

Insertion of n, (i) ito + ayati = itonayati.

- (ii) ciram + āyati = ciram nāyati or cirannāyati (30)
- , of t, (i) yasmā + iha = yasmātiha.
 - (ii) ajja + agge = ajjatagge.

Remarks.—The insertion of t, mostly takes place after the words: yava, tava, ajja, before iha and agga-

Insertion of τ , (i) ni + antaram = nirantaram.

- , (ii) ni + ojam = nirojam.
- (iii) du + atikkamo = duratikkamo.
- ,, (iv) du + ājāno = durājāno.

**

- (v) pātu + ahosi = pāturahosi.
- " (vi) catu + ārakkhā = caturārakkhā.

^{*} Maharapasidahi (Sandhi). It must, however, be remarked that the d is, in most words, a survivance from the older language; Sansk. has invariably preserved it. Thus u, of the native Pali grammarians is but the Sansk; ud; so...ci...cid, etc.

Remarks 1.—Between tathā eva and yathā eva, ri is often inserted; the ā preceding is shortened and the e of eva elided:

tathariva, yathariva.

- 2.—This consonant τ, is mostly inserted after the particles: ni, du, pātu, puna, dhi, pāta, catu, and a few others. In most cases it is simply revived. Insertion of l, = l.
 - (i) cha + angam = chalangam.
 - (ii) cha + amsa = chalamsa.

Remarks.—l=1., is generally inserted after: cha (six).

Insertion of h (i) su + ujuca = suhujuca.

(ii) su + utthitam = suhutthitam.

II.—CONSONANTAL SANDHI.

- 29. Consonantal Sandhi occurs when a word ending in a vowel is followed by a word beginning with a consonant.
- 30. In the majority of cases, Consonantal Sandhi isresorted to, to meet the exigencies of metres; but not always.
- 81. Before a consonant, a long vowel may be shortened.
 - (i) yathā + bhāvī + guņena = yathabhāviguņena.
 - (ii) yittham vā hutam vā loke = yittham va hutam va loke.
- 32. A vowel, before a consonant, if short, may be lengthened:
 - (i) Evam gāme muni care = evam gāme munī care.
 - (ii) du + rakkham = dūrakkham.
 - (iii) su + rakkham = sūrakkham.

33. A consonant following a word or a particle ending in a vowel, is generally reduplicated.

EXAMPLES.

- (i) idha + pamādo = idhappamādo.
- (ii) su + patthito = suppatthito.
- (iii) vi + payutto = vippayutto.
- (iv) a + pativattiyo = appativattiyo.
 - (v) pa + kamo = pakkamo.
- (vi) yathā + kamam = yathakkamam (34).
- (vii) anu+gaho=anuggaho.
- (viii) vi + jotati = vijjotati.
 - (ix) kata + ñū = kattaññū.
 - (x) du + labho = dullabho.
 - (xi) du + sīlo = dussīlo.

Remarks 1 -- v, after a vowel becomes bb: as:

- (i) ni + vānam = nibbānam.
- (ii) ni + vāyati = nibbāyati.
- (iii) du + vinicchayo = dubbinicchayo.
 - 2.—Reduplication of the consonants takes place generally after the prefixes:

u, upa, pari, ati, pa, a, anu, etc.

 The constant rule in reduplication is that an aspirate is reduplicated by an unaspirate, and an unaspirate by an unaspirate.

That is to say, an unaspirate is reduplicated by itself.

34. The vowel preceding a conjunct consonant being prosodically long, the naturally long vowels— \bar{a} , \bar{v} , are not allowed to stand before a double consonant.

35. When, according to para 33, a consonant is reduplicated after a particle ending in a long vowel, this vowel is shortened, as:

ā + kamati = akkamati. parā + kamo = parakkamo.

Exceptions — There are, however, a few exceptions to paras 34, 35. The following are the most common examples:

- (i) na + añña = nâñña.
- (ii) na + assa = nâssa.
- (iii) na + assu = nâssu.
- (iv) kasmā + assa = kasmāssa.
- (v) tatra + assa = tatrāssa.
- (vi) sa + antevāsiko = sântevāsiko.
- (vii) sa + atthi = satthi.
- (viii) vedanā + khandho = vedanākkhandho, etc.
- 36. (a) Before a consonant, the o in : so, eso, may be changed to a; as:
 - (i) eso dhammo or esa dhammo.
 - (ii) So muni or sa muni.
- (b) Sometimes, this change occurs even before a vowel, thus creating a hiatus, which is allowed to remain:

so attho or sa attho.

(c) The same change (of o to a), occurs also, but not so frequently, in: ayo (iron), mano (the mind), tamo (darkness), paro (other), tapo (penance, mortfication) and a few others; as:

ayopattam or ayapattam, etc.

III.-NIGGAHĪTA SANDHI.

- 37. Niggahīta sandhi takes place when a word ending in m (niggahīta), is followed by a word beginning with a vowel, or with a consonant.
- 38. Niggahīta when followed by a consonant, may remain unchanged.

EXAMPLES.

- (i) tam dhammam katam
- (ii) tam khanam.
- (iii) tam patto.
- 39. Niggahīta, followed by a consonant, may be transformed to the nasal of the class to which that consonant belongs.

EXAMPLES.

- (i) raṇam + jaho = raṇañjaho.
- (ii) tanham + karo = tanhankaro.
- (iii) sath = thito = santhito.
- (iv) jutim + dharo = jutindharo.
- (v) sam + mato = sammato.
- (vi) evam + kho = evan kho.
- (vii) dhammam + ca = dhamman ca.
- (viii) tam + niccutam = tanniccutam

Remarks.—Before initial l, the niggahīta of sam and pum is changed to l; as:

- (i) sam + lakkhaņā = sallakkhaņā.
- (ii) pați sam lino = pațisallino.
- (iii) sam + lekho = sallekho.
- (iv) pum + lingam = pullingam.

- Niggahīta, followed by e or h is changed to ññ and ñh respectively.
 - (i) tam + eva = taň ňeva.
 - (ii) paccantaram + eva = paccantaram neva.
 - (iii) evam + hi kho = evan hi kho.
 - (iv) tam + hitassa = tan hitassa.
- 41. y following niggahita, becomes assimilated to it, and both together may become nn; as:
 - (i) sam + yuttam = saññuttam.
 - (ii) sam + yogo = saññogo.

Remarks.—Not seldom, no coalescence takes place, and both letters remain unchanged:

samyuttam; samyojanam.

- 42. When preceding a vowel, niggahita becomes m; as:
 - (i) tam + attham = tam attham.
 - (ii) Yarh +āhu = yam āhu.
 - (iii) kim + etam = kim etam.

Remarks.—Rules 39 and 42, are not strictly adhered to, in texts edited in Roman characters; in prose above all, niggahīta is allowed to remain unchanged before a vowel or a consonant, even in the middle of a word sometimes; in poetry, the retention of niggahīta or its change to m before a vowel, is regulated by the exigencies of the metres.

- 43. Sometimes, niggahīta before a vowel, may be-
 - (i) etam + attho = etadattho.
 - (ii) etarh + eva = etadeva.
 - (iii) etam + avoca = etadavoca.
 - (iv) yarh + anantaram = yadanantaram.

yam + idam = yadidam.

Remarks.—The change of niggahita into d is more fictitious than real; in most examples, the d is simply a survivance. (see *Insertion of consonants*).

- 44. Niggahîta, before a vowel or a consonant may be elided; as:
 - (i) tāsam + aham santike = tāsâham santike.
 - (ii) ariyasaccānam + dassanam = ariyasaccānadassanam.
 - (iii) etam Buddhānam + sāsanam = etam Buddhānasāsanam.
- 45. A niggahīta may sometimes be inserted before a vowel or a consonant;
 - (i) ava siro = avamsiro.
 - (ii) manopubba gamā = manopubbangamā.
 - (iii) čakkhu + udapādi = cakkhum udapādi.
 - (iv) yava c' idha bhikkhave = yavañ c' idha,....
 - 46. After niggahīta, a vowel may be elided;
 - (i) kim + iti = kinti.
 - (ii) idam + api = idam pi.
 - (iii) cakkam + iva = cakkam va.
 - (iv) kalim + idani = kalim 'dani or kalin dani.

INTERCHANGE OF LETTERS.

- 47. Not unfrequently an interchange of letters takes place; as:
 - (i) dh becomes h Ex; rudhira=ruhiro.
 - (ii) d ,, t ,, sugado = sugato.
 - (iii) t , pahato = pahato.

- (iv) t becomes d Ex: gantabba=gandabba-
- (v) g ,, k ,, hatthupaga = hatthupaka.
- (vi) r ,, 1 ,, paripanno=palipanno.
- (vii) y ,, j ,, gavayo=gavajo.
- (viii) k ,, y ,, sake pure = saye pure.
 - (ix) j ,, y ,, nijamputtam=niyam puttam.
 - (x) t ,, k ,, niyato=niyako.
 - (xi) k ,, kh ,, nikamati=nikhamati.

SIGNS.

48. As has already been said on page 1, a dash (-) indicates a long vowel:

(i) aham sakkhī aham sakkhī = I am witness!

- (ii) pajjalantāni pabbatakūţāni mālāguļabhāvam āpannāni disvā = seeing the blazing mountain peaks had turned into nosegays........
- 49. Crasis, the contraction of two syllables into one, is shown by the circumflex accent (A); as:
 - (i) sādhu hoti, lacchasîti, all right! you'll get it.
 - (ii) tam...ganhissamîti, I'll seize him!

Remarks.—In some texts, crasis is expressed by a (—) dash, as used for the long vowels.

50. The elision of a vowel is expressed by an apostrophe (').

- (i) eken'ūno = ekena ūno.
- (ii) idān'eva=idāni eva.
- (iii) pi'ssa = pi assa.
- (iv) tass'ekadivasam = tassa ekadivasam.

CHAPTER III.

ASSIMILATION.

51. The matter included in this chapter should perthaps have come under the head of "sandhi," for assimilation is nothing but changes that occur for the sake of euphony.

I have remarked that, although the rules of sandhi, as explained in the preceding chapter, are readily understood and applied by the young students, the laws of assimilation puzzle them not a little, and retard their reading much more than is necessary. The difficulty thus experienced arises from their ignorance of Sanskrit, without a—at least slight—knowledge of which, the study of Pāli becomes sensibly more difficult.

In the following paragraphs, I shall try and explain as succinctly and as clearly as possible, the rules of assimilation. The student cannot be too much recommended to study thoroughly this chapter and to refer to it constantly in the course of his studies.

52. Assimilation is the blending into one of two consonantal sounds. It involves the change of one sound to another of the same series, but sometimes also to a sound of another series. (See page 2).

53. Assimilation is of two kinds : -

- (i) The initial consonant is assimilated to the final consonant of the preceding word. This is called: Progressive Assimilation.
- (ii) The final consonant of the preceding word is assimilated to the initial consonant of the word that follows. This is called: Regressive Assimilation.

EXAMPLES.

I.—PROGRESSIVE ASSIMILATION:

- I. (a) I lag (to cling) + na = lagna = lagga (clung).
- II. (b) budh (to know) + ta = budhta = buddha (known).

It will be remarked that in example (a), the n (dental) has been assimilated to the g which belongs to another series (gutteral).

In (b), the t, becomes d_t and assimilates to the preceding dh, both being sounds of the same series (dentals).

II.—REGRESSIVE ASSIMILATION.

- 1. (a) I lip (to smear) + ta = lipta = litta (smeared).
- II. (b) \(\delta \) d\(\text{dam} \) (to subdue) + ta \(\delta \) damta \(\delta \) danta (subdued).

In these two examples, p, in (a), is assimilated to initial t and passes to another series of sounds.

In (b), m likewise passing to another series, assiminates itself to t and becomes n:

GENERAL RULES OF ASSIMILATION.

- 54. Assimilation takes place mostly in the formation of the Passive Voice, the Passive Perfect Participle, the base of verbs of the third conjugation, of the Infinitive, Gerund, the Potential Passive Participle, and in the formation of the Desiderative; also under the influence of certain suffixes in the derivation of words.
- In Pāli, Regressive Assimilation is the more common.

- 56. (a) When a mute meets with an initial mute (non-nasal), there is regressive assimilation generally, that is, the first consonant is assimilated to the second.
 - (i) sak+ta=sakta=satta.
 - (ii) sak + thi = sakthi = satthi.
 - 57. A guttural assimilates the following dental:

lag + na = lagna = lagga. sak + no = sakno = sakko + ti = sakkoti.

- 58. A guttural assimilates a final dental:
 - (i) ud + kamāpeti = ukkamāpeti.
 - (ii) tad + karo = takkaro.
 - (iii) ud + gacchati = uggacchati.
- 59. A final palatal* being followed by a dental surd or sonant, assimilates it into a lingual:
 - (i) Jmaj+ta=mattha or matta.
 - (ii) I pucch + ta = puttha.
 - (iii) dicch + ta = ittha.

*To better understand these changes, the student ought to bear in mind that no word can end in a palatal nor in h, because these letters are not primitive letters: the palatals have sprung into existence from the contact of guttural consonants with certain vowels; and h represents an old gh and is the aspirate of j; the original gutturals, therefore, reappear at the end of words either pure or transformed into a lingual, and then assimilate or are assimilated by the following dental. For instance: I pucch = puth + ta = puttha, but, I muc = muk+ta = mukta = mutta; I bhuj = bhuk (+ta = bhukta=bhutta; again I maj=mat (t=Sank. s) + ta=matta. In Sansk., I mrj+ta = mrsta = Pāli; matta.

- (a) j however sometimes is assimilated to the following t:
 - (iv) /bhuj+ta=bhutta.
- (b) c also becomes assimilated to t:
 - (v) Imuc + ta = mutta.
- 60. But an initial palatal assimilates a final dental in palatal:

ud + cinati = uccinati.

ud + chedī = ucchedī.

ud + jala = ujjala.

ud+jhāyati ≠ujjhāyati.

61. A final lingual assimilates a following surd dental, (t):

Jkutt+ta=kuttha.

- 62. A final dental is assimilated to the following consonant:
 - (i) ud+ganhāti = ugganhāti.
 - (ii) ud+khipati=ukkhipati.
 - (iii) ud+chindati=ucchindati.
 - (iv) ud+jhāyati=ujjhāyati.
 - (v) ud + sāha = ussāha.
 - (vi) ud+tinna=uttinna.
 - (vii) ud ploketi = ulloketi.
- 63. When initial t, follows a sonant aspirate, the assimilation is progressive: the final sonant aspirate loses its aspiration, the following t (surd) becomes sonant, vis; d, and taking the aspiration which the final sonant has lost, becomes dh.

EXAMPLES.

I rudh+ta=rudh+da=rud+dha=ruddha.

Remarks.—In the case of final bh, initial t having become dh, regressive assimilation takes place;

√ labh + ta = labh + da = lab + dha = laddha.

- 64. Before an initial dental surd, a guttural or a labial surd unaspirate is generally assimilated:
- (i) tap+ta=tapta=tatta.
 - (ii) sak + ta = sakta = satta.
 - (iii) sak + thi = "akthi = satthi.
 - (iv) kam + ta = kamta = kanta.
- 65. An initial labial generally assimilates a preceding dental surd or sonant unaspirate:
 - (i) tad + purisa = tappurisa.
 - (ii) ud+bhijjati=ubbhijjati.
 - (iii) ud + pajjati = uppajjati.
 - (iv) ud + majjati = ummajjati.
 - 66. A final labial may assimilate an initial nasal: păp+no+ti=păpno+ti=pappoti.

ASSIMILATION OF NASALS.

- 67. Final m before t is assimilated:

 √ gam+tvā=gamtvā=gantvā.
- 68. The group sm is preserved: tasmim, bhasma, asma, usma.
- 69. An initial nasal assimilates a preceding dental:
 - (i) ud+magga=un+magga=ummagga.

Remarks.—Here final d, being before a nasal, is first changed to the nasal of its class, that is n, and this n (dental) is then assimilated to m (labial). So for, gantvā in 67.

- (i) ud + nadati = unnadati.
- (ii) / chid+na=chinna.

ASSIMILATION OF Y.

- 70. Y is regularly assimilated to the preceding consonant by Progressive Assimilation.
- 71. The assimilation of y takes place principally in the Passive Voice, in the formation of verbal bases of the 3rd conjugation, of some gerunds and of numerous derived nouns.
 - (i) √ gam+ya=gamya=gamma.
 - (ii) √ pac+ya=pacya=pacca.
 - (iii) I mad + ya = madya = majja.
 - (iv) √ bhan + ya = bhanya = bhanña.
 - (v) ✓ div + ya = divya = dibba.
 - (vi) √ khād+ya=khādya=khajja (34).
 - (vii) √ khan + ya = khanya = khanña.
- 72. This rule holds good also in the middle of a compound word: final i having become y by Rule 27 (1) (a), is assimilated to the preceding consonant, and the following word is joined on to form a compound:

EXAMPLES.

- (i) pali + anko = paly anko = pallanko.
- (ii) vipali*+āso=vipaly āso⇒vipallāso.
- (iii) vipali + attham = vipaly attham = vipallattham.

^{*}The preposition pari, is not seldom changed into pali.

- (iv) api + ekacce = apy ekacce = appekacce.
- (v) api + ekadā = apy ekadā = appekadā.
- (vi) abhi + uggacchati = abhy uggacchati = abbhuggacchati.
- (vii) abhi + okiranam = abhy okiranam = abbhokiranam.
- (viii) abhi + añjanam = abhy añjanam = abbhañjanam.
 - (ix) āni+āyo=āny āyo=aññāyo (34. 35).

73. By far the most common changes occurring through the assimilation of y (final as in the above examples) or of y (initial as in 71), take place when the dental surd unaspirate t or the dental sonant aspirate or unaspirate d, dh precedes. To state the rule shortly:

- 74. (i) final ti+any dissimilar vowel becomes cc+; that vowel.
 - (ii) ,, dhi + ,, ,, ,jjh+) that vowel.
 - (iii) ,, di+! ,, ,, ,, ,jj+! that vowel.
 - (iv) ,, t+y=cc.
 - (y) , d+y=jj , d
 - (vi) \rightarrow dh + y = jjh.

EXAMPLES.

- (i) ati + antam = aty antam = accantam.
- (ii) pati + ayo = paty ayo = paccayo.
- (iii) pati + eti = paty eti = pacceti.
- (iv) iti+assa=ity assa=iccassa.
- (v) iti + ādi = ity ādi = iccādi.
- (vi) jäti + andho = jäty andho = jaccandho (34,35).

- (vii) adhi + agamo = adhy agamo = ajjhagamo.
- (viii) adhi + ogāhitvā = adhy ogāhitvā = ajjhogāhitvā.
 - (ix) adhi+upagato=adhy upagato=ajjhupagato.
 - (x) adhi + eti = adhy eti = ajjheti.
 - (xi) nadī +ā = nady ā = najjā.
 - (xii) yadi + evam = yady evam = yajjevam.
- (xiii) sat + ya = satya = sacca.
- (xiv) pandita + ya = panditya = pandicca.
- (xv) I mad + ya = madya = majja.
- (xvi) \(\nu \text{ vad} + \nu \text{ vady} a = \nu \text{ vajja.}
- (xvii) \(\text{rudh} + \text{ya} = \text{rudhya} = \text{rujjha}.
- 75. Final th+y=cch; as: tath+ya=tathya=taccha.
- 76. A final sibilant may assimilate a following y:
 - (i). J pas+ya=pasya=passa.
 - (ii)

 √ dis+ya=disya=dissa.

Remarks.—At the beginning of a word, however, the y (the semi-vowel of i) is retained, and v is changed to b:

- (i) vi + ākaraņam = vyākaraņam = byākaraņam.
- (ii) vi + añjanam = vyañjanam = byañjanam.
- 78. When y follows h, metathesis* takes place:
 - (i) J sah+ya=sahya, and by metathesis= sayha.
 - (ii) √ guh+ya=guhya=guyha.

^{*} Metathesis is the transposition of letters.

79. Initial y, may assimilate a final dental, non-nasal:

ud + yūti = uyyūti ud + yāti = uyyāti ud + yāna = uyyāna.

ASSIMILATION OF R.

- 80. Final r is often assimilated to a following mute, as:
 - (i) / kar+tabba = kattabba.
 - (ii) √ kar+tā=kattā.
 - (iii) √ kar+ya=kayya
 - (iv) √ dhar+ma=dhamma
- 81. Very often too, final r is dropped:
 - (i) I mar + ta = mata.
 - (ii) I kar + ta = kata.
- 82. Sometimes, r having been dropped, the vowel a before it, is lengthened:
 - (i) √kar+tabba = kātabba.
 - (ii) /kar+tum=katum.

83. r followed by n, lingualizes the n, and then becomes assimilated to it:

√ car+na=carna=cinna.

The student will understand the insertion of i when reading the chapter on Passive Perfect Participles.

84. Final r may be assimilated to a following 1:

dur (=du)+labho=dullabho.

ASSIMILATION OF S.

- 85. s (or sa) is assimilated by the preceding consonant, having first been transformed into a guttural or a palatal.
 - 86. Final j + sa = kkha:
 - (i) titij+sa=titikkha.
 - (ii) bubhuj + sa = bubhukkha.
 - 87. Final p + sa = ccha: jigup + sa = jiguccha.
 - 88. Final t+sa=ccha:
 fikit+sa=tikiccha.
 - 89. Final s + sa = ccha: jighas + sa = jighaccha.
 - Final s assimilates a following y.
 nas+ya=nassa. (Cf. 76).
 - But sometimes the combination remains unchanged. alasa+ya=ālasya.
 - 92. Final s, assimilates an initial t into a lingual:
 - (i) & kas + ta = kattha.
 - (ii) & kilis+ta=kilittha.
 - (iii) / das + ta = dattha.
 - 93. Initial s assimilates a preceding dental:
 - (i) J ud (or ut)+sāha=ussāha.
 - 94. Pretty often, s +t=tt:

95. Sometimes too, s+l=tth: $\sqrt{vas+ta=vuttha}$.

ASSIMILATION OF H.

- 96. Initial h sometimes is changed to the mute aspirate of the class of the preceding final consonant:
 - (i) ud + harati = uddharati :
 - (ii) ud + harana = uddharana.
 - (iit) ud+hata (√han)=uddhata,
- 97. When final h is followed by a nasal, the group generally undergoes metathesis (see 78, note).
 - √ gah+na=ganha.
 - 98. Metathesis also occurs in the groups hy and hv.
 - (i) mahyam becomes mayham.
 - (ii) oruh+ya becomes oruyha.
 - (iii) jihvā becomes jivhā.

Remarks.—Very seldom, h is assimilated to the following y, leh + ya = leyya.

99. h is sometimes changed to gh; (*) principally in the root han, to kill.

hanati, to kill, or ghateti, to kill.
ghañña, killing, from d han (han or ghan + ya
= ghañña)

ghammati, to go = hammati, to go.

^{*} It must be remembered that h is the aspirate of f, since it now represents an ancient gh (59, note) and therefore, in euphony, it is treated exactly as j, that is to say, when final it becomes sometimes k and sometimes t. The above rules, which may seem arbitrary are familiar to the Sanskritist.

- 100. Final h+t becomes generally ddha: Jduh+ta=duddha.
- 101. Sometimes also h+t=dh. $J = \lim_{h \to \infty} \int f(h) dh$

(For the change of i to e see "Strengthening.")

102. It has been said above (7) that I is very often interchangeable with d; when the d is aspirate, vis., dh, its substitute also becomes aspirate, vis., 1h.

Now, according to para. 101, we have seen that h+t becomes dh; for this dh may be substituted lh, so that we have the following forms:

Jmuh+ta=mūḍha=mūlha. Jruh+ta=rūdha=rūlha.

CHAPTER IV.

(a) STRENGTHENING PROCESS.

103. Strengthening is the process of changing a vowel sound into another vowel sound.

to4. The vowels which undergo strengthening are in a, i, i, u and u.

105. Thus	s, a being st	rengthened,	become	s ā	Š
	1 ,,	of your state of	144,	ė	Š
10人人大的	ĭ ,		9	e	
Participant of	u	and the second	HEAD	σ	3 v.0.0
No.	u score	# 100 x 22 x 24	,,,	o	MACOS 47

106. The result thus obtained is also called guna (quality).

108. Further, as we already know (by rules 27 (i) a 27 (ii) b), final e and o when followed by a vowel may be changed into their semi-vowel+that vowel.

rog. The following table of these very useful changes should be borne in mind:

Simple vowel. Strengthening or guna.		Vowel and semi-vowel.	
, a	å	(none)	
i, ī	e	ay	
u, ŭ	0	av	

110. Strengthening occurs frequently in the formation of Verbal bases, of Verbals* and in the derivation of words under the influence of certain suffixes.

Remarks.—In the derivation of Primary and Secondary Nouns (see Derivation), it will simplify matters to assume at once that:

^{*} See Chapter on Verbs.

Soul Call Special

(b) METATHESIS.

- 111. Examples of metathesis have already (78) been given.
- 112. Metathesis is the transposition of letters or of syllables in a word; the following are further instances of this transposition:

(i) pariyudāhāsi becomes payīrudāhāsi.

(ii) ariya ,, ayira.

(iii) kariyā ,, kayirā.

(iv) masaka ,, makasa.

(v) rasmi , ramsi.

(vi) na abhineyya , anabhineyya.

(vii) cilimikā cimilikā.

(c) EPENTHESIS.

- 113. Epenthesis is the insertion of a letter in the middle of a word.
- 114. Epenthesis is resorted to mostly to avoid a hiatus, of the collocation of consonants of different organs.

EXAMPLES.

klesa beco	mes kilesa
ācārya	, ācāriya.
tiangula	tivangula.
hyo .	, hiyo or hiyyo.
arhati ,	, arahati.
barhisa ,	, barihisa.
hrada ,	, harada.
stī ,	, siri.
hrī ,	, hirī
plavati ,	, pilavati
	Constitution of the second

(d) DROPPING OF SYLLABLES.

115. Sometimes, for the sake of the metre, or to facilitate pronunciation, whole syllables are dropped.

EXAMPLES.

- (i) abhiññāya sacchikatvā, becomes, abhiññā sacchikatva.
- (ii) Jambudipam avekkhanto addasa, becomes, Jambudipam avekkhanto adda.
- (iii) dasasahassī, becomes, dasahassī.
- (iv) chadangula, becomes, changula.

CHAPTER V.

DECLENSION.

116. (a) Declension is the adding to the stems of Nouns and Adjectives certain suffixes which show, case, gender and number.

(b) The stem or base of a noun is that noun as it

stands, before any suffix has been added to it.

(c) Pali has three genders: the masculine, the femi-

- (d) Pāli does not strictly follow the natural division of male, female, etc., in assigning gender to nouns; many nouns which are masculine in English are feminine or neuter in Pāli and vice-versa; a great number of nouns which we consider as neuter are, some masculine, some feminine in Pāli. This is called grammatical gender.
- (e) There are two numbers: the singular and the plural.

(f) There are eight cases:

- (1) Nominative, shewing the subject of the sentence.
- (2) Genitive, shewing possession (of, 's).

- (3) Dative, shewing the object or person to or for, whom something is given or done.
- (4) Accusative, this is the object of the sentence.
- (5) Instrumentive, shews the object or person with or by whom something is performed.
- (6) Ablative, generally shewing separation, expressed by from.
- (7) Locative, shewing place (in, on, at, upon, etc.)

(8) Vocative, used in addressing persons.

Remarks.—The student will find fuller explanations of the uses of the cases in the chapter on Syntax.

- 117. The declension of nouns is divided into two great divisions:
- (a) Vowel-declension, comprising all the stems
- (b) Consonantal-declension, in which are included all the stems ending in a consonant.
- (c) Vowel-declension is generally, for the sake of clearness, divided again into three classes:
 - (i) the declension of stems ending in, a or, a;
 - (ii) the declension of stems ending in, 1 or, 1;
 - (iii) the declension of stems ending in, w or, w.
- 118. (a) Native grammarians give the following as the regular case-endings or suffixes for all nouns:

Sin	gular.	Plural.	
Nom.	S	Nom.	yo.
Gen.	ssa.	Gen.	nam.
Dat.	ssa.	Dat.	nam.
Acc.	am.	Acc.	yo.
Ins.	ā.	Ins.	hi.
Abl.	smā.	Abl.	hi.
Loc.	smim.	Loc.	su.
Voc.	(like the stem of Nom.)	Voc. (like	the Nom.)

(b) Most of the above suffixes are theoretical only; in practice they differ considerably according to gender and case.

The actual suffixes will be given with each declension.

VOWEL DECLENSION.

Declension of stems ending in a (short).

- 119. (a) The great bulk of nouns and adjectives belong to this declension, and as the other declensions have borrowed several of its suffixes, its thorough mastery is most important and will greatly facilitate the study of the other declensions.
- (b) Nouns ending in a, are all masculine or neuter120. The following are the suffixes of masculine nouns the stem of which ends in a:

Singular. Nom. Nom. ā, āse. Gen. Gen. ssa. nam. (ssa. Dat. Dat. nam. (ava. Acc. m. Acc. Ins. Ins. ma. ehi, ebhi-Abl. ā, smā, mhā, Abl ehi, ebhito. i, smirh, mhi. Loc. SU. Voc. (like the stem) and a Voc.

taking care to observe the sandhi rules which may apply when suffixes begin with vowel; in every case the student should accustom himself to look up the rules, which will be referred to by their numbers, and accustom himself to account for every form he meets with, whether nominal, verbal or derivative. He should remember that a systematic study from the start will ensure thoroughness and eventually save him a great deal of labour and time.

122. DECLENSION OF DEVA-GOD, ANGEL.

Singular.

Plural.

Nom. devo, a god

devā, gods

Gen. devassa, a god's, of a god

devānam, gods'. of gods

Dat. devassa, to or for a god

devānam, to or for gods

devāya

Acc. devam, a god

deve, gods

Ins. devena, by, with or on account of, a god

devehi, devebhi, by, with or on account of, gods

Abl. devá, from a god devasmā, from a god devamhā, from a god devato, from a god

devehi, devebhi. from gods

Loc. deve, in, on or upon a god-

devesu, in, on or, upon gods

devasmin, on or upon a god

devamhi, on or upon a god

Voc. deva, deva, O god! deva, O gods!

EXERCISE.

Decline like deva (masc.)

nara, man
byaggha, tiger
miga, deer
gandhabba, musician
kacchapa, tortoise
satta, being
sumsumāra, crocodile

mātanga, elephant sīha, lion orodha, a seraglio dhamma, doctrine, right putta, son kūpa, a mast makara, a sea-monster

Remarks. (a) The true Dat. sing. in, aya has now generally been displaced by the suffix of the Gen. ssa; the Dat. aya is almost equal to an Infinitive and mostly denotes intention.

- (b) smā and mhā of the Abl. and smim and mhi of the Loc. have been borrowed from the pronominal declension (see Declension of Pronouns).
- (c) so is sometimes used also as an Abl. sing. suffix, as: vaggaso, by groups; bhagaso, by share.
- (d) sā is also found as an Ins. sing. suffix, as? balasā, by force, forcibly; talasā, with the sole of the foot.
- (e) The Nom. plur. in ase, very scarce, corresponds to the Vedic Nom. plur-
- (f) ebhi, of the Ins. and Abl. plural, is mostly used in poetry, and probably comes from the Vedic ebhis.
- (g) Before o, Nom. sing., ehi, ehhi, Ins. and Abl. plur. and e, Acc. plur. final a of the stem is dropped :

deva + o = dev + o = devo. deva + ehi = dev + ehi = devehi.

- (h) Before su, Loc. plur., final a of stem is changed to e.
- (i) In the Dat., Ins., Abl. and Loc. sing.; and in Nom. and Voc. plur., the usual rules of sandhi are regularly followed:

Singular.

Ins.	deva+ina=devena	(21, 1)
Dat.	deva + āya = devāya	(22)
Loc.	deva + i = deve	(21, 1)
Abl.	$deva + \bar{a} = dev\bar{a}$	(22)

Plural.

Nom.	deva+a=devā	(ibid)
	deva+āse = devāse	(,,)
Voc.	devā+a=devā	(,,)

(j) Before nam., Gen. and Dat. plur., final a of the stem is lengthened.

deva + nam = deva + nam = devanam.

123. Neuter nouns in a (short).

SUFFIXES.

	Singular.	Plural.
Nom.	rhi .	Nom. ni, a
Gen.	ssa	Gen. nam
Dat.	ssa, āya.	Dat. nami
'Acc."	rin :	Acc. ni, e
Ins.	ina	Ins. ehi, ebhi
Abl.	{ā, smā mhā, to	Abl. ehi, ebhi
Loc.	i, smim, mhi	Loc. su
Voc.	(like the stem)	Voc. ni, a

124. DECLENSION OF RUPA (NEUTER) FORM.

S	ingular.		Plural.
Nom.	rūpam	Nom.	rūpāni, rūpā
Gen.	rūpassa	Gen.	rūpānam
Dat.	rūpassa, rūpāya	Dat.	rūpānam
'Acc.	rūpam	Acc.	rūpāni, rupe
Ins.	rūpena	Ins.	rūpehi, rūpebhi
Abl.	rūpā	Abl.	rūpehi
	rūpasmā		rūpebhi
	rūpamhā rupato		
Loc.	rūpe	Loc.	rūpesu .
	rūpasmim rūpamhi		
Voc.	rūpa	Voc.	rūpāni, rūpā.

'Remarks.—(a) Ni is essentially the distinctive sign of Neuter nouns in the Nom., Acc. and Voc. plur. in all declensions.

(a) The final vowel of the stem is lengthened before ni.

EXERCISE.

Decline like rūpa.

citta, mind	sota, ear
mula, root, price	veluriya, coral
upatthāna, service	ahata, cloth (new)
jala, water	osāna, end
lona, salt	savana, hearing
vajira, diamond	sāṭaka, garment
Vata, wind	pesana, despatch, sending
yotta, rope	pattana, a sea port
yuddha, fight	paṇṇa, leaf
MESS AND CONSIDERATE ASSESSMENT OF THE PARTY	

Remarks. (a) It will be noticed that neuter nouns in a differ from the masculine in a, in the Nom. sing. and in the Nom., Acc. and Voc. plur.; all the other cases are identical.

- (b) In the plur. the Nom., Acc. and Voc. have the same form.
- (c) The form in ani, of the Nom., Acc. and Voc. plur. is the most common.

125. Declension of nouns in a (long).

All nouns ending in a are feminine.

				ø		
	w	n	١,	n	v	
- 3		2	51	u	ъ.	

SUFFIXES.

Sin	gular.		Plural.
Nom.	7	10	ā, yo
Gen.	āya	water to	nam
Dat.	āya		narh
Acc.	ıiı	Alle E	ā, yo
In s.	āya		hi, bhi
Abl.	āya, to		hi, bhi
Loc.	āyam, āy	a	su
Voc.	e		ā, yo

127. DECLENSION OF KANNA (FEM.) A VIRGIN.

Singular.		Plural:	
Nom.	kaññā	kaññā, kaññāyo	
Gen.	kaññāya,	kaññānam	
Dat.	kaññāya	kaññānam	
Acc.	kaññam	kaññā, kaññāyo	

Singular.

Plural.

Ins. kaññāya

Abl. kannaya, kannato

Loc. kaññāyam, kaññāya

Voc. kaññā, kaññe

kaññāhi, kaññābhi.

kaññāhi, kaññābhi

kaññāsu

kaññā, kañňāyo

. Remarks. (a) Before to of the Abl. sing., the final vowel, if long, is shortened. So also before in of Acc. sing.

(b) The following words, all meaning mother, have two forms in the Voc. sing:

ammā, ambā, annā, tātā.

Voc. Sing. {ammā, ambā, annā, tātā. amma, amba, anna, tāta,

(c) In the Acc. sing. final a is shortened.

Exercise.

Decline like kanna:

saddhā, faith
vijjā, science
taṇhā, lust, thirst
icchā, desire
gāthā, stanza
khiddā, play, sport
senā, army
nāvā, boat
gīvā, throat

medhā, intelligence
pañāā, wisdom
mettā, love
bhikkhā, begged-food
mālā, garland
pūjā, honour
chāyā, shadow
pipāsā, thirst
velā, tīme

128. It has been said above (125) that all nouns ending in \bar{a} are feminine; but there are a very few examples of masculine nouns ending in \bar{a} . We give below their declension.

Masculine nouns in a (long.) DECLENSION OF SA—DOG.

Si	ingular.	Plural.
Nom.	sā	sā
Gen.	sassa	sānam
Dat.	sassa, sāya	sānam
Acc.	sam	sāne
Ins.	sena	sāhi, sābhi
Abl.	sā, sasmā, samhā	sāhi, sābhi
Loc.	se, sasmim, samhi	sāsu
Voc.	sa	sā

Remarks. (a) the declension above given is according to the Rupasiddhi.

(b) The declension given in the Suddaniti differs slightly:

Sing	rular.	Plural.
Nom.	sā	sā, sāno
Gen.	sassa	sānam
Dat.	sassa	sānam

Sin	gui	lar.
	S	

Plural.

Acc.	sānam	sāne
Ins.	sānā	sānehi, sānebhi
Abl.	sānā	sānehi, sānebhi
Loc.	săne	sānesu
Voc.	sa	sā, sāno

The following are declined like sa:

Paccakkhadhamma, one to whom the Doctrine is evident.

Gandivandhavā, Arjuna.

mā, the moon. rahā, * sin.

Remarks. Masculine nouns in a belong to the Consonantal declension, but native grammarians consider them as stems ending in a vowel.

129. Declension of nouns in i (short).

Nouns the stem of which ends in i are Masculine, Feminine, and Neuter. They do not form a very numerous class.

Masculine nouns in i.

SUFFIXES. 130

Singular.	Plural.
Nom	ī, yo
Gen. ssa, no	nam
Dat. ssa, no	nam

Niruttidīpani, a scholium on Moggallansvyākarana, a grammar held in high esteem in Ceylon and Burms,

2	Singular.	Plural.
Acc.	m	ī, yo
Ins.	nā	hi, bhi
Abl.	nā, smā, mhā	hi, bhi
Loc.	smim, mhi	su
Voc.	-	ī, yo

131. DECLENSION OF KAPI (MASC.)-MONKEY.

S	ingular.	Plural.
Nom.	kapi	kapī, kapayo
Gen.	kapissa, kapino	kapīnam
Dat.	kapissa, kapino	kapīnam
Acc.	kapim	kapī, kapayo
Ins.	kapinā	kapīhi, kapībhi
Abl.	kapinā, kapismā, kapimhā	kapīhi, kapībhi
Loc.	kapismim, kapimhi	kapīsu
Voc.	kapi	kapi, kapayo

Remarks. (a) The Nom. and Voc. sing. are like the stem.

- (b) In the Nom., Acc. and Voc. plur, final i is changed to a before suffix yo.
- (c) However, final i is sometimes preserved before yo, so that we also have the form **kaplyo** (rare).

- (d) In the plural, before suffixes: nam, hi, bhi, su final i is lengthened.
 - (e) Some rare and old forms are sometimes found?
 - (i) Gen. sing. ending in-e, as: mune
 - (ii) Loc. sing. ,, in-o, as: ado, and also
 - (iii) ,, in-e, as : gire
 - (iv) Ins. sing. ,, in-ena, as: rathsena
 - (v) Nom. plur. ,, in-no, as : saramatino
- (f) Not seldom, the stem itself is used for almost all the cases in the singular.

EXERCISE.

Words declined like kapi (masc.)

aggi, fire kali, sin
sandhi, union nidhi, a depository
sărathi, a charioteer yati, a monk
añjali, salutation ari, an enemy
bendi, body giri, a mountain
ümi, a wave bali, oblation
senāpati, a general gahapati, householder

Feminine noune in i (short).

132. SUFFIXES.

Singular. Plural.

Nom. — i, yo
Gen. ā nam
Dat. ā nam
Acc. m i, yo

Plural. Singular. Ins. hi, bhi Abl. ā hi, bhi Loc. ā, am SII Voc. ī, yo

133. (a) DECLENSION OF RATTI (FEM.)-NIGHT.

Singular. Phyral. Nom. ratti rattī, rattiyo, ratyo-Gen. rattiyā, ratyā rattinam Dat. rattiyā, ratyā rattīnam Acc. rattim. ratti, rattiyo, ratyo-Ins. rattiyā, ratyā rattīhi, rattībhi Abl. rattivā, ratyā rattīhi, rattībhi Loc. rattiyā, ratyā rattīsu rattiyam, ratyam Voc. ratti. ratti, rattiyo, ratyo-

Remarks. (a) There is an ancient Loc. sing. in or: ratto.

- (b) An Abl. sing in to, is also found: rattito.
- (c) In the Gen., Dat., Ins., Abl. and Loc. sing. a. y is inserted between the stem and the suffix a toavoid a hiatus. (See 27 (ii) Remark 2, p. 12); soalso in the Loc. sing. before am.

(d) Before ā, of the same cases, final i of the stem may become y by rule 27 (i), a; and as in Pāli there can be no group of three consonants* one t is dropped. Hence we get:

ratti + ā = rattyā = ratyā.

(e) Before suffixes, nam, hi, bhi, su of the plural, the i of the stem is lengthened.

(b) DECLENSION OF JATI (FEM.)-BIRT H.

Singular.

Plural.

Nom. jāti jātī, jātiyo, jatyo, jacco

Gen jātiyā, jatyā, jaccā jātīnam

Dat. jātiyā, jatyā, jaccā jātīnam

Acc. jātim jātī, jātiyo, jatyo, jacco

Ins. jatiya, jatya, jacca jatihi, jatibhi

Abl. jātiyā, jatyā, jaccā jātīhi, jātībhi

Loc. jātiyā, jatyā, jaccā jātīsu jātiyam, jatyam, jaccam,

Voc. jāti jātī, jātiyo, jatyo, jacco

Remarks. (a) For the forms, jacca and jaccami

(b) Jacco is obtained by the assimilation of y after the elision of final i (71, 74).

(c) It will be remarked that, whereas in Masc. nounsin i the i of the stem is changed to a before yo; in Fem. nouns it is retained.

EXERCISE.

Nouns declined like ratti (fem).

bhūmi, earth
satti, ability
patti, attainment
tuṭṭlɨ, satisfaction
āsatti, attachment
dhūli, dust
tanti, a string
gati, going, rebirth
sati, recollection

keli, amusement nandi, joy mati, understanding mutti, deliverance vuddhi, increase ruci, splendour chavi, the skin cuti, disappearance ditthi, sight, belief

Neuter Nouns in i (short).

DECLENSION OF VARI (NEUT.) - WATER.

	Singular.	Plural.
Nom.	vāri	vārīni, vārī
Gem.	vārissa, vārino	vārīnam
Dat.	vărissa, vărino	värinam
Acc.	vārim	vārīni, vārī
Ins.	vārinā	vārīhi, vārībhi
Abl.	vārinā, vārismā vārmihā	vārīhi, vārībhi
Loc.	vārismim, vārimhi	vārīsu
Voc.	vāri .	vārīni, vārī

Remarks. (a) There is also found a Nom. sing. in in like the Acc., as atthirn, bone; akkhirn eye, etc.

(b) As usual, final i is lengthened before ni, nam, hi, bhi and su in the plural.

EXERCISE.

Decline like vāri (neut).

atthi, bone	satthi, the	thigh
akkhi, eye	dadhi, milk	curds
sappi, ghee	 acchi, eye	
chadi, roof	rūpi, silver	

#35 Declensions of Nouns in 7 (long.)

There are no Neuter nouns ending in i (long).

Masculine Nouns in I (long).

136	SUFFIXES.
400	SUFFIAES.

Singular.		Plural.
Nom.	ī	ī, no
Gen.	ssa, no	nam
Dat.	ssa, no	nam
Acc.	m, nam	ī, no
Ins.	nā	hi, bhi
Abl.	nā, smā, mhā	hi, bhi
Loc.	smim, mhi	su
Voc.	ī	ī, no

DECLENSION OF DANDI (MASC.)-MENDICANT.

	Singular.	Plural.
Nom.	daņķī	daņdī, daņdino
Gen.	dandissa, dandino	daṇḍīnam
Dat.	daņģissa, daņģino	daņģīnam
Acc.	dandim, dandinami	daņdī, daņdino
Ins.	daņģinā	daņķīhi, daņķībhi
Abl.	dandinā, dandismā	dandīhi, dandībhi
Loc.	dandismim, dandimhi	daņdīsu
Voc.	daņģī	daņģī, daņģino

'Remarks. (a) A Nom. sing. in i (short) is sometimes met with: dandi.

- (b) Voc. sing. in ni is also founds dandini.
- (c) Note that in all the oblique cases of the singular the final i of the stem is shortened before the suffixes.
- (d) In the Nom. plur. a rare form in yo is found formed on the analogy of Masc. in i (short); as dandiyo.

138.

- (e) An Acc. plut. in ye is occasionally met with: dandiye.
- (f) It should be noticed that before no of the Nom., Acc. and Voc. plur., \(\bar{\epsilon}\) of the base is shortened.
- (g) An Acc. sing. in am with the semi-vowel y developed before it is met with: dandiyam.
- (h) An Abl. sing. in to is found pretty frequently: dandito.

EXERCISE.

Decline like dandi (masc.).

sāmī, lord. senānī, a general. kapanī, pauper. sakkhī, a witness, mantī, minister. yoddhī, warrior.

137. Most Masc. nouns in I are not pure substantives, they are adjectives used substantively; their true stem is in in, the Nom. sing. being I. The true stem of dandI therefore is dandIn. Properly, all these words belong to the consonantal declension.

Feminine Nouns in I (long.)

elinniune ...

139. DECLENSION OF NADI (FEM.)-RIVER.

Singular.

Plural.

Nom. nadī

Gen. nadiyā, nadyā, najjā

Dat. nadiyā, nadyā, najjā

Acc. - nadim

Ins. nadiyā, nadyā, najjā

Abl. nadiyā, nadyā, najjā

Loc. nadiya, nadya, najja nadiyam, nadyam

najjam

nadī, nadiyo, najjo

nadīnam

nadīnam nadī, nadiyo, najjo

nadīhi, nadībhi

nadīhi, nadībhi

nadisu

Voc. nadī nadī, nadiyo, najjo

Remarks. (a) There is a Gen. plur. in anam, nadīyānam.

(b) In all the oblique cases of the sing., final 7 of the base is shortened; also before yo in the plural.

(c) For insertion of y before suffixes beginning with a vowel, see 27, Remark 2, p. 12.

(d) For the forms nadyā, najjā and najjarh, see Rules 71, 74.

(e) In the form najjo, yo is assimilated after the elision of final i,

EXERCISE.

Decline like nadi (jem.)

patī, canvas lakkhī, prosperity sīhī, lioness pātī, bowl kumārī, girl' Bārāṇasī, Benases rājini, queen dabbī, spoon bhisī, mat sakhī, a female friend brāhmaņī, a brahmin. woman taruņī, young woman

bhikkhuni, nun vanari, ape yakkhi, ogress devi, nymph

kākī, a female crow mahī, the earth migī, a doe vāpī, a reservoir, tank

Declension of Nouns in u (short).

Masculine, Feminine or Neuter.

Masculine Nouns in u (short).

141.

C

6

SUFFIXES.

Singular.		Plural
Nom.	-	ű, o
Gen.	ssa, no	nam
Dat.	ssa, no	nam
Acc.	rb	ŭ, o
Ins.	nā	hi, bhi
Abl.	nā, smā, mhā	hi, bhi
Loc.	smim, mhi	su
Voc.	- 4	ũ, o, e

DECLENSION OF BHIKKHU (MASC.)-MONK-

S	ingular.	Plural.
Nom.	bhikkhu	bhikkhū, bhikkhavo
Gen.	bhikkhussa.	bhikkhūnam
De	bhikkhuno	
Date .	bhikkhussa	bhikkhūnam *
	bhikkhuno	1 20/0
Acc.	bhikkhum	bhikkhū, bhikkhavo
Ins.	bhikkhunā	bhikkhūhi
	5 4 5 6 6	bhikkhūbhi

Cina	1	-	
Sing	ui	ar	•

Plural.

Abl.	bhikkhunā bhikkhusmā	bhikkhühi bhikkhübh	
	bhikkhumhā	Dinkando	
Loc.	bhikkhusmim bhikkhumhi	bhikkhūsu	15-
Voc.	bhikkhu.	bhikkhū,	bhikkhavo

Remarks. (a) A Nom. and an Acc. plural in your are sometimes met with in some words: januayo, hetuyo.

(b) Before suffixes θ and e, in the plural, u of the stem or base is strengthened and becomes av (27 (ii) α).

EXERCISE.

Nouns declined like bhikku (masc.)

pasu, goat	velu, bamboo
bandhu, relative	bhānu, the sun
maccu, death	ucchu, sugar-cane
bāhu, arm	setu, bridge
ketu, flag	katu, sacrifice
pharasu, axe	ruru, a deer
taru, tree	hetu, cause

Feminine Nouns in u (short).

142. SUFFIXES.

2	ingular	1	Piurai.
Vom.	_		û, yo.
Gen.	yā.		nam.

	Singular.	Phiral.
Dat.	yā	nam
Acc.	rin	ũ, yo
Ins.	yā	hi, bhi
Abl.	yā .	hi, bhi
Loc.	yam, yā	su
Voc.	_	ů, yo

143. DECLENSION OF DHENU (FEM.)-COW.

5	ingular.		Phutal.
Nom.	dhenu		dhenū, dhenuyo
Gen.	dhenuyā		dhenûnam
Dat.	dhenuyā		dhenūnam
Acc.	dhenum		dhenu, dhenuyo
Ins.	dhenuyā		dhenûhi, dhenûbhi
Abl.	dhenuyā		dhenūbi, dhenūbhi
Loc.	dhenuyara,	dhenuya	dhenusu.
Voc.	dhenu		dhend, dhenuyo

Remarks. (a) An Abl. sing. in to is common: dhenuto, jambuto.

- (b) A Nom. plur. in a occurs without strengthening of final u but with insertion of v: dhenuvo.
- (c) Final u is, in the plural, lengthened before nam, hi, bhi, and su.

EXERCISE.

Decline like dhenu.

dhātu, an element yagu, rice gruel karenu, elephant raiju, string ku, the earth hanu, jaw vannu, sand daddu, ringworm

kāsu, a hole, pit kandu, itch kacchu, scab piyangu, a medicinal plant

natthu, nose vijju, lightning

Neuter Nouns in u (short).

SUFFIXES. 144.

Singular. Nom., Acc., Voc. a ni (like the masculine)

(The rest like the Masc).

Plural.

DECLENSION OF CAKKHU (NEUT.)-EYE.

Singular. Plural. Nom. cakkhu cakkhūni, cakkhū cakkhussa Gen. cakkhūnam cakkhuno Dat. cakkhussa cakkhūnam. cakkhuno cakkhūni, cakkhū Acc. cakkhum Ins. cakkhunā cakkhūhi, cakkhūbhi cakkhūhi, cakkhūbhi Abl. cakkhunā cakkhusmä cakkhumhā cakkhusmim cakkhūsu Loc. eakkhumhi cakkhu cakkhūni, cakkhū Voc.

Remarks. There is a form of the Nom. sing. in m: cakkhum.

EXERCISES.

Words declined like oakkhu (neut).

dhanu, a bow dāru, wood madhu, honey massu, the beard matthu, whey assu, a tear ambu, waler aru, a wound janu, the knee vatthu, a story āyu, age vasu, wealth

146. Declension of Nouns in u (long).

- (a) This declension includes Masculine and Feminine nouns only.
- (b) The Suffixes are much the same as those of the u (short) declension, and present no difficulty.

147. DECLENSION OF SAYAMBRU (MASC.) AN EPITHET OF BUDDHA.

	and mount	
Nom.	sayambhū	sayambhu, sayambhuvo
Gen.	sayambhussa	sayambbūnam
12.57	sayambhuno	
Dat.	sayambhussa sayambhuno	sayambhūnam
Acc.	sayambhum	sayambhū, sayambhuvo
Ins.	sayambhunā.	sayambhūhi,
	40m / 10m - 0	sayambhūbhi
Abl.	sayambhunā,	sayambhúhi,
	sayambhusmā,	sayambhûbhi
CONTRACTOR AND TO	White data areas and a second at	A STATE OF THE PROPERTY AS A SECOND OF THE RESERVE

sayambhumha

Singular.

Plural:

savambhusmim. sayambhūsu savambhumhi

sayambhū Voc.

sayambhu, sayambhuvo

Remarks. (a) In the Nom., Acc. and Voc. phur! v is inserted between the suffix o and the stem after the shortening of ŭ.

(b) Final u of the stem is shortened to u in the oblique cases of the singular.

148. DECLENSION OF VADHU (FEM.) A WIDOW.

. Plural. Singular. Nom. vadhū. vadhū, vadhuyo. Gen. vadhuyā vadhünam vadhuvā vadhűnarh Dat. Acc. vadhum vadhū, vadhuyo vadhühi, vadhübhi Ins. vadhuyā vadhuyā vadhūhi, vadhūbhi Abl. . Loc. vadhuyā vadhūsu vadhuyam vadhū vadhū, vadhuyo. Voc.

Remarks. (a) As in the Masc., final u is shortened in the oblique cases of the sing.

- (b) A form in to is also found in the Abl. sing. ? vadhuto.
 - (c) In the plural, before yo, final a is shortened.

Stems ending in a dipthong.

149. All dipthongal stems have disappeared in Pāli; only one such stem remains, it is the word go, a cow.

SPECIAL NOUNS.

150. (I) DECLENION OF GO (DIPTHONGAL STEM)— A COW.

Plural. Singular. gavo, gavo Nom. go gavassa, gāvassa gavam, gonam gunnath gavam, gonam gavassa, gāvassa Dat. gunnam gavam, gāvam gavo, gavo Acc. gavum, gavum gohi, gobhi, gavehi gavena, gavena Ins. gohi, gobhi, gavehi gavā, gāvā Abl. gavasmā, gāvasmā, gavamhā, gāvamhā gave, gave gosu, gavesu, gavesu Loc. gavasmim, gavasmim gavamhi, gavamhi gavo, gavo Voc. go (II) DECLENSION OF SAKHA, FRIEND. 151.

(II) DECLENSION OF SAKHA, FRIEND. (SANSK. SAKHI.)

(the stem is irregular.)

Plantal .

Singatur.		2 500,000
Nom. sakhā		sakhāyo
		sakhāno
		sakhino
militaria de la facilitaria	make di	sakhā

Singu	lar.
-------	------

Plural.

Sing	guiur.	Timrut.
Gen.	sakhino	sakhārānart
Gen.		
	sakhissa	sakhinam
4		sakhānam
Dat.	sakhino	sakhārānam
	sakhissa	sakhinam
		rakhānam
Acc.	sakhānam	sakhī
	sakharii	sakhāyo
	sakhāram	sakhāno
		sakhino
Ins.	sakhinā	sakhārehi
		sakhārebhi
		sakhehi
		sakhebhi
Abl.	sakhinā	sakhārehi
	sakhārā	sakhārebhi
	sakharasmā	Sakhehi
		sakhebhi
Loc.	sakhe	sakhāresu
		sakhesu
Voc.	sakha	sakhāyo
1- 14	sakhā	sakhāno
	sakhi	sakhino
	sakhī	sakhā
	sakhe	17.25

Remarks. The student will perceive that sakhā has forms belonging to stems in ar and others to stems in in (see Consonantal Declension).

152. CONSONANTAL DECLENSION.

- (a) The Consonantal Declension includes all nouns and adjectives whose stem ends in a consonant.
- (b) Nouns, the stem of which ends in a consonant, are rather few and special, the majority of the words included in this declension being adjectives ending in vat or mat, and all words ending in a nasal (n) being considered as belonging to the Vowel Declension, by native grammarians.
- (c) Most of the words of the Consonantal Declension seem to follow two declensions; some suffixes belong to the vowel, and others to the Consonantal Declension.
 - 153. (1) Stem ending in a nasal (n).

atta, attā

154. DECLENSION OF ATTA, (STEM ATTAN)-SELF.

(Stem in an.)

	WALCO CO DATA	
Sin	gular.	Plural.
Nom.	attā .	attano, atta
Gen.	attano, attassa	attānarh
Dat.	attano, attassa ,	attanam !
Acc.	attanam, attara attanam	attano, atte
Ins.	attanā, attena	attanehi, attanebhi
Abl.	attanā, attasmā attamhā	attanehi, attanebhi
Loc.	attani, attasmim	attanesu

attano, atta

Like attā (stem : attan) are declined,—

ātumā, self muddhā, head.

asmā, stone addhā, road, distance, time.

155. DECLENSION OF BRAHMA (STEM BEAHMAN).
"BRAHMA."

MASCULINE.

S	ingular.	Plural.	
Nom.	brahmā .	brahmāno	
Gen.	brahmuno brahmassa	brahmā brahmānam brahmunam	
Dat.	brahmuno brahmassa	brahmānam brahmunam	
Acc.	brahmānam	brahmāno	
Ins.	brahmam brahmanā	brahmehi, brahmeb	hi
	brahmunā	brahmühi, bramübhi	
Abl.	brabamanā brahmunā	brahmühi, brahmebl brahmühi, brahmübl	
Loc.	brahme brahmani	brahmesu (a)	7
Voc.	brahme	brahmano, brahma.	7.0

(a) In the Loc. sing, we meet with the forms in smin, mhi: brahmasmin, brahmamhi

156. DECLENSION OF RAJA (STEM RAJAN)-A KING.

MASCULINE.

	Singular.	Plural.
Nom.	rājā	rājāno, rājā
Gen.	rañño	raññam
	rājino	rajūnam
	rājassa	rājānaih
Dat.	rañño	raññam
	rājino	rājūnam
	rājassa	rājānam
Acc.	rājānam	rājāno
	rājarh	100
Ins.	raññā, rājena	rājūhi, rajūbhi
	rājinā	rājehi; rājebhi
Abl.	rañña	rājūhi, rājūbhi
	rājasmā	rājehi, rājebhi
	rājamhā	1
Loc.	raññe, raññi	rājūsu
	rājini, rājimhi	rājesu
	rājismin	DE MINI
Voc.	rāja	rājāno, rājā

Remarks. (a) When the word rājā is used by itself in a sentence, it follows the above declension; but when it forms the last part of a compound as for instance in; dhammarājā, mahārājā, etc., it follows the declension of masculine nouns in a, like deva.

rājā

- (b) The forms of the plural seem to point to a base or stem in u: rāju.
- (c) A few nouns, the stem of which ends in an, follow the a declension of Masc. nouns like deva; they are:

vissakamma, the architect of the gods.
vivattacchaddo, He by whom the veil (of
ignorance) is rolled back (from this world).

puthuloma, a fish; yakana, the liver. Athabbana, the fourth veda. and some others.

Singular.

157. DECLENSION ON PUMA (STEM PUMAN)-A MAN.

Plural.

MI

Nom.	pumā	pumāno
		pumā.
Gen.	pumuno	pumānam
	pumassa	
Dat.	pumuno	pumānam
	pumassa	1 280 TT
Acc.	pumānam	pumāno
7	pumarh	pume
Ins.	pumānā	pumānehi
	pumunā	pumānebbi
	pumena	pumehi
5. " is	SE A SE	pumebhi

Abl. pumunā pumānehi pumāne pumānebhi pumā pumehi pumasmā pumebhi pumamhā

Loc. pumāne pumānesu pumas pum

Voc. pumara pumare puma puma

Remarks. (a) The influence of the a declension, Masculine, is clearly discernible throughout.

(b) The word sā a dog, given at 128, properly belongs to this declension; this gives the stem, san, from Sanskrit Cvan.

The declension of nouns, the stem of which ends in in, has already been given (136); these words, declined like dandi (stem dandin), and rather numerous, form the transition between the pure vowel declension and the declension of consonantal-stems.

158. (ii) Stems ending in s.

159. DECLENSION OF MANO (STEM MANAS).

Singular. Plural.

Nom.' mano mană

manam

Gen. manaso mananam manassa

	Singular.	-500	Plural.
Dat.	manaso manassa	5 to 65	manānami
Acc.	mano		mane
Ins.	manam manasă		manehi
Abl.	manena manasā manasmā	,	manehi manehi manebhi
	manamhā manā		manebat
Loc.	manasi mane		manesu
	manasmim manamhi	1,	
Voc.	mano manarh		manā
	manā mana		

Remarks. (a) It should be borne in mind that mano is never used in the plural, although the forms are given by some grammarians.

- (b) The influence of the a declension is here also clearly seen, principally in the plural, of which, in fact, all the forms are after the a declension.
- (c) There is also a neuter form in ni in the plural: manāni.

160. Native grammarians give the following nouns as belonging to the manas declension, their stems ending in as:—

vaco, discourse tejo, power tapo, heat vayo, age ceto, thought tamo, darkness yaso, glory, fame avo. iron payo, a beverage siro, the head chando, metrics. saro, a lake prosody raho, solitude, privacy uro, breast rajo, dust; passion aho, day thāmo, strength; vigour ojo, splendour, vāso, cloth, clothing. strength

Remarks. (a) aha, day, in the Loc. sing. has the six following forms: ahasmim, ahamhi, ahe, ahu, ahasi, ahuni.

- (b) The words: rajo, ojo, thamo and vaso, are included in the manas declension by the Sinhalese grammarians.
- (c) The comparative adjectives ending in yo, iyyo, as for instance seyyo, gariyo, follow the manas declension.

161. DECLENSION OF AYU (STEM AYUS)-LIFE.

Singular.		Plural.
Nom.	āyu	āyū
	āyum	āyūni
Gen.	āyussa	âyūnam.
	āyuno '	ăyusam .
Dat.	äyussa	ã y ũ nam
J	āyuno	ãyusam
Acc.	āyu	āyū
270	ayun	ayūni

Sin	gular.	Plural.
Ins.	āyunā	āyūhi
	āyusā	āyūbhi
Abl.	āyunā	āyūhi
	āyusā	āyūbhi
Loc.	ãyuni	āyūsu
	āyusi	
Voc.	āyu	ăyū
	āyurh	ãyūni

162. III. Stems ending in ar (-SANSK r)
163. DECLENSION OF SATTHA (STEM SATTHAR, SANSK CASTR.)

THE TEACHER (BUDDHA).

	THE TEACHER	R (BUDDHA).
Sin	gular. *	Plural.
Nom.	satthā	satthāro satthā
Gen.	satthu	satthānam
	satthussa	satthārānam
	satthuno	satthūnam
Dat.	satthu	satthänam
	satthussa	satthārānarh
	satthuno	satthūnam
Acc.	satthāram	satthāro
	sattharam	satthare
Ins.	sattharā	sattharehi
32.	satthārā	satthärebhi
	satthunā	17.7
Abl.	sattharā	satthärehi
	satthārā	satthārebhi
	satthunā	and a second of the
Loc.	satthari	satthäresu
1		satthūsu
Voc.	sattha	satthāro
dis	satthā	satthā

Remarks. (a) The form of the Gen. sing. in u satthu, is the base employed in the formation of compound words.

- (b) Stems ending in ar (Sansk. r) have their Nom. sing. in ā as pitar (=Sansk pitr), Nom. sing. pitā; so mātar (=mātr), Nom. sing. mātā. Their base in composition is generally in u.
- (c) Before suffix to of the Abl. sing. stems in ar often take the vowel i; as pitito, mătito, and sometimes a base piti, mâti is used in composition: pitipakkhe.
- (d) Some words whose stem is in ar, follow the a declension (of deva), for instance: sallakatta (stem sallakattar), a physician; kattara (stem kattarar), a weak person; sota (stem sotar), a hearer.

Decline like satthā

netā, a guide mātā, mother, jetā, a conqueror kattā, an agent

nattā, a grandson pitā, father dātā, a giver bhātā, brother

matunnam

The words pitā and mātā present some peculiarities

164. DECLENSION OF MATA (STEM MATAR) (SANSK. MATR)—MOTHER.

Singular. Plural

Nom. mātā mātaro
mātā

Gen. mātu mātarānam
mātuyā mātānam
mātyā mātūnam

9	Singular.	Plural.
Dat.	mātu	mātarānam
	mātuyā	mātānam
	mātyā	mātūnam
		mātunnam
Acc.	mātaram	mătaro
		mātare
Ins.	mātarā	mătarehi
-	mātuyā	mātarebhi
	mātyā	mātūhi
		mātūbhi
Abl.	mātarā	mätarehi
	mätuyä	mātarebhi
	mätyä	mātūhi
	,	mätübhi
Loc.	māţari	mātaresu
757.00	mātuyā	mātūsu
	mātyā	
	mātuyam	
	mātyam	
Voc.	māta	mātaro
	mātā	mātā

Remarks. (a) In the oblique cases of the singular, the student will readily recognize the influence of the Feminine declension in the suffixes \tilde{a} and \tilde{m} .

(b) There is also found, rarely, a Gen. sing. in ssa's mātussa.

DECLENSION OF PITA, (STEM PITAR) (SANSK, PITR), FATHER.

S	ingular.	Plural.
Nom.		pitaro
Gen.	pitu	pitarānam
2 13	pituno	pitānam
	pitussa	pitūnam
		pitunnam

5	Singular.	Plural.
Dat.	pitu pituno pitussa	pitarānam pitānam pitūnam pitunnam
Acc.	pitaram pitum	pitaro pitare
Ins.	pitarā pitunā	pitarehi pitarebhi
	pityā petya	pitūhi pitūbhi
Abl.	pitarā pitu	pitarehi pitarebhi
	pityā petyā	pitūhi pitūbhi
Loc.	pitari	pitaresu. pitūsu
Voc.	pita pitā	pitaro

Remarks. In the Dat. and Gen. plur. of mātā and pitā, the n is doubled to compensate for the shortening of ū (long); hence: mātunnam, mātūnam and pitunnam, pitūnam.

165. The words ending in:

at (or ant) vat (or vant)

mat (or mant,) are mostly adjectives

and their declension will be given in the chapter on Adjectives.

We shall, however, give here the declension of a few nouns, in at or vant.

166. DECLENSION OF BHAVAM-SIR.

Stem in at (or ant.)

Plural. Singular. Nom. bhayam bhavanto bhanto bhayanta bhonto Gen. bhavantassa bhavatam bhavato bhavantānam bhoto Dat. b'havantassa. bhavatarh bhavato bhavantānam bhoto bhavantam Acc. bhavante bhotam bhonte Ins. bhavantena bhavantehi bhavatā bhavantebhi bhotā Abl. bhavatā bhavantehi bhavantā bhavantebhi bhotā Loc. bhavati bhavantesu bhavante Voc. bho bhavanto bhonta bhonto bhante bhante bhavantā

Remarks. (a) Bhavam is a polite term of address, and may be translated by "Your Honour."

- (b) Native grammarians invariably use it as the sign of the Vocative case.
- (c) The feminine, bhotī, "madam" is regularly declined after the ī declension feminine, (nadī)

167 DECLENSION OF ARAHAM, A SAINT.

Stem in at (or ant.)

	Singular.	Plural.
Nom.	araham arahā	arahanto arahā
Gen.	arahato arahantassa	arahatam · arahantānam
Dat.	arahato arahantassa	arahatam arahantānam
Acc.	arahantam	arahante
Ins.	arahatā arahantena	arahantehi arahantehhi
Abl.	arahatā arahantā arahantasmā arahantamhā	arahantehi arahantehhi
Loc.	arahati arahante arahantasmim arahantamhi	arahantesu
Voc.	arahanta	arahanto

Similarly is declined santa, meaning-a good man.

CHAPTER VI.*

FORMATION OF FEMININE BASES OF NOUNS AND ADJECTVES.

168. From what has been already said (116. d) about grammatical gender, it will be easily understood that the gender of substantives will be better learned from the dictionary. The student will already have remarked, however, that:

160. All nouns the stem of which ends in a, and the Nom. sing. in o, are Masculine.

EXAMPLES.

Stem.	Nom. sing. Masc.	
sīha, lion	sīho	
assa, horse	asso	
hattha, the hand	hattho	
dāra, wife	dāro	

170. All nouns the stem of which ends in a, and the Nom. sing. in am, are Neuter.

EXAMPLES.

	u
cittam	1
rūpath	1
hattam	
nitam	
hayam	
֡	rūpam chattam chattam nitam chayam

This chapter has for the most part been adapted from the Niruttidipani.

171. All nouns the stem of which ends in \bar{a} , and the Nom. sing. in \bar{a} , are Feminine.

EXAMPLES.

Stem.		Nom. sing. Fem.
vācā, a word		vācā
nāvā, a boat		 nāvā
sālā, a hall		sālā
gāthā, a stanza	41	gāthā
pūjā, worship		pūjā

Remarks. The Masculine nouns with stems in ā, (128), very few in number, are rarely met with. Although included by all native grammarians, as has already been remarked, in the Vowel-declension, they properly belong to the Consonantal-declension. For instance, the true stem of sā, a dog, is san (Sanskrit Cvan); that of mā, the moon, is mas (Sansk. mās); again, the true stem of gaṇḍīvadhanva, Arjuna, is ganḍīvadhanvan.

172. All nouns whose stem ends in $\bar{\imath}$ and the Nom. sing. also in $\bar{\imath}$ are Feminine.

EXAMPLES.

Stem.	Nom. sing. Fem.
mahī, the earth	mahī
sīhī, lioness	sīhī
bhisī, a mat	bhisī
rājinī, a queen	rājinī
bhūmī, the earth	bhūmī

Nom. sing. ends in i. As a general rule, the Maschouns of this class are adjectives used substantively; they properly belong to the Consonantal-declension, and their stem ends in ni.

- 174. There are no Neuter nouns in ī.
- 175. Nouns the stem of which ends in u, are either Masculine, Feminine or Neuter. The gender is best learned from the dictionary.
- 175. All pure substantives whose stem ends in wand the Nom. sing. also in ware Feminine.

EXAMPLES.

Stem.	Nom. sing. Fem.
camū, an army	camū
pādū, a shoe	pādū
sassū, a mother-in-law	sassû
bhū, the earth	bhū
vadhū, daughter-in-law	vadhū

Remarks. This class is not numerous.

177. Masculine nouns the stem of which ends in u and the Nom. sing. in ū, are properly not pure substantives, but adjectives, sometimes used substantively.

EXAMPLES.

Stem Adjective.

Substantival Nom. sing.

use.

Masc.

abhibhū, mastering chief, conqueror, abhibhū vedagū, knowing the vedas a sage, a savant, vedagū maggaññū, knowing the Way a saint maggaññū

- 178. There are no Neuter nouns the stem of which ends in w.
- 179. The above rules, though meagre, will somewhat help the student to discriminate the gender of nouns.
- 180. As in other languages, many feminine substantives are derived from the base or stem of Masculine substantives by means of certain suffixes.

181. The suffixes used in Pali to form feminine bases are:

- (1) ā, ikā, akā
- (2) î, ikinī ·
- (3) nī, inī
- (4) ānī

182. FEMININE BASES OF SUBSTANTIVES.

183. Many Feminine bases are derived from Masculine ones ending in a by means of ā and ī.

184. EXAMPLES WITH X

Remarks. Feminine bases formed with ā are not very numerous, and most of them can also be formed with inī or ikā.

Masc. base.

Fem. base.

mānusa, a man assa, a horse kumbhakāra, a potter kaṭapūtana, a demon vallabha, a favourite

mānusā, a woman assā, a mare kumbhakārā, a potter's wife kaṭapūtanā, a she-demon vallabhā, a favourite woman

Examples with 1.

185. Remarks. Feminine bases derived from the Masculine by means of ī are very numerous.

Masc. base.

siha, lion miga, deer. kumāra, boy, prince. māṇaya, a young man. Fem. base.

sīhī, lioness.
migī, doe.
kumārī, girl, princess.
man. māṇavī, a young

woman.

samanera, a novice.

sāmaņerī, a novice (fem.)

186. The Feminine of many patronymics is also formed by means of ī.

Masc. base.

Fem. base.

Kacchāyana Vāseţţha Gotama Kacchāyanī Vāseţţhī Gotamī

187. Nouns in ka (mostly adjectives used substantively) form their Feminine in ikā or ikinī.

Masc. base.

Fem. base.

Nāvika, a boatman paribbājaka, a wandering ascetic pamsukūlika, a monk wearing robes made of picked-up rags kumāraka, a boy nāvikā, nāvikinī
paribbājikā,
paribbājikinī
pamsukūlikinī, pamsukūlikā, a nun wearing,
etc.
kumārikā, a girl

488

EXAMPLES WITH INI.

Masc. base.

Fem. base.

rājā, king kumbhakāra, potter

rājinī, queen kumbhakārinī, potter's wife

miga, deer siha, lion yakkha, an ogre miginī, doe sīhinī, lioness yakkhinī, an ogress

189 Examples with NI.

Remarks. The suffix $n\bar{\imath}$ is used after masculine bases ending in i, $\bar{\imath}$ and u, \bar{u} . The $\bar{\imath}$ and \bar{u} of the base are shortened before $n\bar{\imath}$.

Masc. base.

bhikkhu, Buddhist

monk

bandhu, a relative

patu, a wise man dhammaññü, a

pious man

dandī, a mendicant

brahmaçārī, one who lives the higher life; a

religious student hatthi, an elephant

Fem. base.

bhikkhuni, Buddhist nun

bandhuni, a female

relative

patuni, a wise woman

dhammañňunī, a pious woman

dandini, a female mendi-.

cant

brahmacārinī, a woman

who lives, etc.

hatthini, female elephant

190

EXAMPLES WITH ANT.

191. A few nouns form their Feminine by means of the suffix ani.

Masc. base.

mătula, uncle vāruņa, Varuņa

khattiya, a nobleman

ācariya, teacher

gahapati, householder

Fem. base.

mătulăni, aunt

varunānī

khattiyanī, a noble-

woman

ācariyānī

gahapatānī, householder's wife

Remarks. Note that in gahapati, final i is dropped before ant.

192. Some nouns assume two or more Feminine forms.

EXAMPLES.

Masc. base.

atthakāma, one wishing to be useful kumbhakāra, potter

yakkha, ogre
nāga, snake, elephant
miga, deer
sīha, lion
byaggha, tiger
kāka, a crow
mānusa, a man

atthakāmā, atthakāmī, atthakāminī kumbhakārā, kumbhakārinī karī, kumbhakārinī yakkhī, yakkhinī nāgī, nāginī migī, miginī sīhī, sīhinī byagghī, byagghinī kākī, kākinī mānusā, mānusī, mānusinī

193. The suffixes used for the formation of Adjectival Feminine bases are the same as those given above (181) that is:—

194. Of Adjectives the stem of which ends in a, some form their Feminine in ā, some in ī.

195. Adjectives ending in i, $\bar{\imath}$, and u, \bar{u} , form their Feminine by adding $n\bar{\imath}$ (189), before which long $\bar{\imath}$ and \bar{u} are shortened.

(For examples see Chapter VII, Adjectives.)

CHAPTER VII. ADJECTIVES. DECLENSION.

196. Adjectives, like nouns, may be divided into those whose stem ends in a vowel and those the stem of which ends in a consonant.

To the student who has mastered the declension of nouns, that of adjectives will present no difficulties.

Declension of Adjectives in a.

197. Adjectives in a form their Feminine by means of ā mostly; some by means of ī.

198. The Neuter is obtained by adding m to the stem..

199. The Masculine is declined like deva (122), the Feminine like kaññā (127) and the Neuter like rūpam (124).

Feminines in | are declined like nadī (139).

200. DECLENSION OF BALA (STEM), FOOLISH.

Singular.

Mas	culine.	Feminine.	Neuter.
Nom.	bālo	bālā	bālam
Gen.	bālassa	bālāya	bālassa
Dat.	bālassa, bālāya	bālāya	bālassa, bālāya
Acc.	bālarii	bālam	bālarn
Ins.	bālena	bālāya	bālena

Voc.	bhūrī	bhūrinī	bhurīni
	bhūrayo	bhūriniyo	bhūrī

205. Adjectives in I (long).

206. A numerous class of masculine adjectives are derived from nouns by means of suffix i [an adjectival suffix not to be confounded with the feminine suffix i (181, 2; 185).]

EXAMPLES.

Substantives.

Adjectives.

pāpa, sin dhamma, religion māna, pride soka, sorrow roga, sickness makkha, hypocrisy

pāpī, sinful
dhammī, religious, pious
mānī, proud
sokī, sorrowful
rogī, sick
makkhī, hypocritical

207. The masculine is declined like dandi.

208. The feminine is formed by adding $n\bar{\imath}$, before which final $\bar{\imath}$ is shortened; it is declined like $nad\bar{\imath}$.

209. In the neuter final $\bar{\imath}$ is shortened to i and is declined like $v\bar{a}ri$.

210. DECMENSION OF ESI, WISHING.

Singular.

Λ.	lasculine.	Feminine.		Neuter-
Nom.	esī	esinī		esi
Gen.	esissa	esiĥiyā	,	esissa

Abl.	viññūhi	viññunīhi viññunībhi	viññűhi
Loc.	viññûsu		viññūsu

viññu viññuni

viññuvo

viññuniyo

viññûni

viññū

Voc.

Decline like viññū

in the Masculine, Feminine and Neuter.
niddālū, sleepy pabhū, powerful
mattaňñū, temperate kataňñū, grateful

219. ADJECTIVES WITH CONSONANTAL BASES.

220. Adjectives with consonantal bases are of three kinds:

- (1) those the stem of which ends in at or ant.
- (2) ,, ,, ,, mat or mant.
- (3) , ,, ,, vat or vant,

221. All the adjectives in mat, mant, and vat, vant, are formed from nouns by means of suffixes mā and vā (whose original base is mat and vat), which express possession of the quality or state indicated by the noun to which they are affixed.

- are not affixed indiscriminately. The following rule is invariable:
 - (a) Suffix va is added only to nouns ending in a. .
 - (b) Suffix mā is always added to nouns ending in i and u.

a.-EXAMPLES.

Noun. Adjective.

māna, pride mānavā, having pride,

guņa, virtue guņavā, having virtue,

bhoga, wealth bhogavā, possessing wealth,

bala, strength balavā, possessing strength, vis., strong

b .- EXAMPLES.

Noun.

Adjectives.

suci, purity.

sucima, endowed with purity.

viz., pure

sati, thought.

satimā, possessed of thought,

vis., thoughtful

khanti, patience.

khantimā. endowed with patience, vis., patient

hetu, cause bandhu, relative

hetumā, having a cause, causal bandhumā having a relative

223. The Feminine is formed by adding i to either of the bases vis., mat, mant or vat, vant; for instance.:

Stem.	Masculine.	Feminine.
guņavat	guņavā	guņavatī
guņavant		guņavantī
jutimat	jutimā	jutimatī
jutimant		jutimantī

224. In the Nom., 'Acc. and Voc. sing., the Neuter is formed by adding the after va and ma, the long a being shortened (4, 34): and ni to the stem in vant and mant, for the Nom., Acc. and Voc. plural.

Stem . Masculine.

Neuter.

then they had Plural Singular jutimant iutimā iutimam 'jutimantāni gunavant gunavā gunavam gunavantāni

225. DECLENSION OF ADJECTIVES IN AT OR ANT.

226. DECLENSION OF MAHA (STEM MAHAT, MAHANT) GREAT, LARGE.

Singular.

	Mas	culine.	Feminine.	Neuter.
	Nom.	maham mahanto	mahatī mahantī	maham mahantam
	Gen.	mahato mahantassa	mahatiyā mahantiyā	mahato mahantassa
	Dat.	mahato mahantassa	mahatiyā mahantiyā	mahato mahantassa
C P	'Acc.	mahantam	mahatim mahantim	mahantam
	Ins.	mahatā mahantena	mahatiyā mahantiyā	mahatā mahantena
aci ecc	'Abl.	mahatā mahantasmā mahantamhā	mahatiyā mahantiyā	mahatā mahantasmā mahantamhī
T. T. T.	Loc-	mahati mahante mahantasmim mahantamhi	mahatiya mahantiya mahatiyam mahantiyam	mahati mahante mahantasmim mahantamhi
	√oc.	maham mahā maha	mahati mahanti	maham mahā maha

Plural.

17	Lasculine.	Femine.	Neuter.
Nom.	mahanto mahantā	mahatī mahatiyo mahantī mahantiyo	mahantāni mahantā
Gen.	mahatam mahantānam	mahatinam mahantinam	mahatam mahantānam
Dat.	mahatam mahantānam	mahatinam mahantinam	mahatam mahantānam
Acc.	mahante mahantā mahanto	mahatī mahatiyo mahantī mahantiyo	mahantāni mahantā
Ins.	mahantehi mahantebhi	mahatīhi mahatībhi mahantīhi mahantībhi	mahantehi mahantebhi
Abl.	mahantehi mahantebhi	mahatīhi mahatīhi mahantīhi mahantīhi	mahantehi mahantehhi
Loc.	mahantesu	mahatīsu mahantīsu	mahantesu
Voc.	mahantā mahanto	mahatī mahatiyo mahantī	mahantāni mahantā
Sec. 1.	17/04	mahantiyo	Territory (1987)

- Remarks. (a) The declension of Mahā should be carefully studied, as all the Present Participles, in at and ant, as for instance gaccham or gacchanto, karam or karanto, pacam or pacanto, are declined like it.
 - (b) We have already given (167) the declension of araham which, in the Nom. sing., has also the form arahā.
 - (c) The word santo (167) meaning a good man, is similarly declined; the form sabbhi, however, is also found in the Ins. and Abl. plural.

EXERCISE.

Decline like maham (stem: mahat, mahant)

in the Masculine, Feminine and Neuter.

caram, caranto (stem: carat, carant) walking, roaming. bhuñjam, bhuñjanto (stem: bhuñjat, bbuñjant) eating. karam, karanto (stem: karat, karant) doing. saram, saranto (stem: sarat, sarant) remembering vasam, vasanto (stem: vasat, vasant) living. puccham, pucchanto (stem: pucchat, pucchant) asking.

Loc.	guņavantesu	guņavantībhi guņavatīsu guņavantīsu	guņavantesu
Voc.	guņavantā guņavanto guņavā	guņavatī guņavatiyo guņavantī guņavantiyo	guņavantāni guņavantā

Adjectives formed from nouns and Roots by means of suffixes avi and vi.

232. The original stem of āvī and vī is āvin and vin and they therefore belong to the Consonantal declension. Vī is used after nouns, and āvī after roots.

233. The Feminine is formed by adding the feminine suffix nī, before which final long ī is shortened.

234. In the Neuter, final i is shortened in the Nom. and Voc. singular; in the plural, before neuter suffix ni, final i remains unchanged.

235. Vi, like mā and vā, expresses possession.

EXAMPLES.

Neuter

Noun. Adj. Masc. Fem. Sing. Plural. medhā, wisdom medhāvī medhāvinī medhāvi, medhāvinī Jpass, to see, passāvī passāvinī passāvi, passāvinī

The declension of these Adjectives presents no difficulty. They are declined in the Masculine like dandī in the Feminine like nadī and in the Neuter like vāri'

236. NEGATIVE ADJECTIVES.

237. Negative Adjectives are obtained by prefixing to affirmative Adjectives the prefix a and an.

Remarks. a is used before a consonant, and an before a vowel.

EXAMPLES.

dīgha, long adīgha, not long anākula, turbid anākula, not turbid, clear

COMPARISON.

238. The Comparison of Adjectives is formed in two ways:

- (1) by adding tara for the Comparative and tama for the Superlative, to the Masculine bases of the Positive.
- and ittha, issika for the Superlative, to the Masculine bases of the Positive.
- 239. The Comparative and Superlative are declined in the Masculine like deva, in the Feminine like kanna and in the Neuter like rupam.

EXAMPLES.

(1) tara, tama.

Positive. Comparative. Superlative.
suci, pure sucitara, purer sucitama, purest
pāpa, evil pāpatara, more evil pāpatama, most evil
omaka, vile omakatara, viler omakatama, vilest
hari, green haritara, greener haritama, greenest

est

Remarks. Of the above Comparative and Superlative bases, the masculine is, sucitaro, sucitamo; the feminine, sucitara, sucitama, and the Neuter, sucitaram, etc., etc.

(2) iya (iyya), ittha, issika.

Positive. Comparative. Superlative.

pāpa, evil pāpiya, more evil pāpittha, most evil pāpiyya, more evil pāpissika, most evil khippa, quick khippiya, quicker khippitha, quick-

khippiyya, quicker khippissika, quick-

katthia, bad katthiya, worse katthitha, worst katthissika, worst

240. With many, we should say most, adjectives, suffixes of (238-1) tara, tama, or of (2) iya, iyya, ittha, issika, may be used interchangeably.

EXAMPLES.

pāpatara or pāpiya. khippatara or khippiya. pāpatama or pāpiṭṭha or pāpissika, etc.

- 241. The comparatives in iya, iyya, are declined like mano (159).
- 242. It will be remarked that, before iya, iyya, ittha and issika, the final vowel of the Positive Adjective is dropped.
- 243. Adjectives formed by means of the possessive suffixes, ma (mat), vā (vat) (221), and vī, vin (231), drop these suffixes and the vowel which precedes them, before iya, iyya, itha and issika.

EXAMPLES.

(a) guṇavā + iyo = guṇa + iyo = guṇ + iyo = guṇiyo, Similarly : guṇ iyyo, guṇiyyo : guṇ-iṭṭha, etc. (b) medhāvī + iyo= medhā + iyo= medh + iyo= medhiyo.

Similarly: medh-iyyo, medhiyyo; medh-ittha, medhittha, etc.

(c) satimā + iyo = sati + iyo = sat + iyo = satiyo.

Similarly: sat-iyyo = satiyyo; sat-ittha, = satittha, etc.

244. Tara may be superadded to the Superlative ittha, as: papitthatara.

245. The Acc. sing. of most Adjectives is used adverbially.

EXAMPLES.

Adjective.

khippa, quick sukha, happy

sigha, swift manda, stupid Adverb.

khippam, quickly sukham, happily sīgham, swiftly mandam, stupidly

246. The Absolute Superlative is formed by prefixing ati to the Positive adjective:

atikhippa, very quick, extremely quick, too quick. atippasattha, very excellent.

atithoka, very little, too little, excessively little.

247. Some Adjectives form their Comparison irregularly.

Positive. antīka, near bāļha, strong Comparative.

nediya, nearer sādhiya, stronger sādhiyya, stronger kaṇiya, fewer Superlative.

nedițțha, nearest sădhițțha, strong-

kanittha, fewest

appa, few

Positive. Comparative. Superlative.

yuva, young kaniya, younger kanit vuddha, old jeyya, older jettha passattha, ex- seyya, better settha cellent, good ler garu, heavy gariya, heavier garita

kanittha, youngest jettha, oldest settha, most excellent, best garittha, heaviest

248. Any substantive is used in the sense of an adjective when it is the last member of a Bahubbīhi compound (see chapter on Compounds: Bahubbīhi) qualifying a noun or pronoun expressed or understood.

249. The noun thus used, whether Feminine or Neuter assumes the form of the Masculine.

EXAMPLES.

Noun. as Adjective.

(i) dassanam, (neut.) ruddadassano kumbhilo, looking a fierce-looking crocodile

(ii) janghā, (fem.) leg dīghajangho puriso, a long-legged man

(iii) paññā, (fem.) mahāpañño, having wisdom great wisdom, very

(iv) sīlam, (neut.) sampannasīlo, one who morality is full of morality:

(v) hattho (masc.) chinnahatthena purisena kato, done by a man whose hands have been cut off.

CHAPTER VIII.

250

NUMERALS.

The Numerals are as follows :-

ekunavisam.

51.	Cardinals.	Ordinals.
I	, eka, one	pathama, first
2	, dve, two	dutiya, second
3	, tayo, three	tatiya, third
4	cattāro	catuttha, turīya
5	pañca	pañcatha, pañcamæ
. 6	, cha	chattha, chatthama
7,	satta	sattha, sattama
8,	attha	aṭṭhama
9,	nava	navama ·
10,	dasa, rasa, lasa lara	dasma
11,	ekārasa, ekādasa	ekarasama
12,	barasa, dvarasa	bārasama
13,	tedasa, terasa, telasa	tedasama
14,	catuddasa, cuddasa,	catuddasama
	coddasa	and of the same said
15,	pañcadasa paṇṇarasa	pañcadasama
	pannarasa	Att and a state of
16,	solasa, sorasa	solasama
17,	sattadasa	sattadasama
	sattarasa	
18,	atthadasa	átthādasama
	atthārasa	307
19,	ekūnavīsati	ekiinavisatima

	Cardinals.	. :	Ordinals.
20	, vīsati, vīsam		vīsatima
21	ekavīsati ekavīsam	erio.	ekavīsatima
22	, dvāvīsati		dvāvīsatima
23	tevīsati		tevisatima
- 24	, catuvīsati		catuvisatima
25	, pancavīsati		pañcavisatima
26	chabbīsati		chabbīsatima
27	sattabīsati sattavīsati		sattabīsatima

kotima

252.

(1) CARDINALS

253. Eka, one, is in the singular very often used in an indefinite sense, meaning: a certain, a: as.

eko nāviko, a boatman, a certain boatmanekā kumārikā, a princess, a certain princess-

In the plural, it means: some, as, eke purisā, some men... ekā mānusinī, some women...

254. The cardinals, eka, taya and cattaro are declined in the plural in the three genders: eka, alone of course, having singular forms.

255 DECLENSION OF EKA. ONE.

Singular.

M	asculine.	Feminine.	Neuter.
Nom	. eko	ekā	ekam
Gen.	ekassa	skissā ekissāya	ekassa
Dat.	ekassa	ekissā eksisāya	ekassa
Acc.	ekam	ekam	ekam
Ins.	ekena	ekāya	ekena
Abl.	ekasmā ekamhā	ekāya	ekasmā ekamhā
Loc.	ekasmim ekamhi	ekāya ekissam	ekasmirti ekamhi
Voc.	eka	eke	eka

Plural.

Ma	sculine.	Feminine.	Neuter.
Nom.	eke	ekā ekāyo	ekāni
Gen.	ekesam	ekāsam	ekesam
Dat.	ekesam	ekāsam	ekesarh
Acc.	eke	ekā ekāyo	ekāni
Ins.	ekehi	ekāhi	ekehi
	ekebhi	ekābhi	ekebhi
Abl.	ekehi	ekāhi	ekehi
	ekebhi	ekābhi	ekebhi
Loc.	ekesu	ekāsu	ekesu
Voc.	eke	ekā	ekāni
		ekāyo	

Remark. The above declension is chiefly pronominal. (See Pronouns, Chapter IX).

256. DECLENSION OF TAYO, THREE.

Masculine.		Feminine.	Neuter.
Nom.	tayo	tisso	tīņi
Gen.	tiṇṇam	tissannam	tinnam
2074	tiṇṇannaṁ	tissam \	tinnannam
Dat.	tinnam	tissannam	tinnam
100	tinnannam	tissam	tinnannam
Acc.	tayo	tisso	tīni
Ins.	tīhi	tīhi	tīhi
	tībhi	tībhi	tībhi
Abl.	tīhi	tīhi	tīhi
	tībhi	tībhi	tībhi
Loc	tīsu	tīsu	tīsu

257. DECLENSION OF CATTARO, CATURO, FOUR

	Mas	sculine.	Feminine.	Neuter.
	Nom.	cattāro caturo	catasso	cattári
	Gen.	catunnam	catassannam cattassam	catunnam
	Dat.	catunnam	catassam catassannam	catunnam
	Acc.	cattáro caturo	catasso	cattāri
	Ins.	catubbhi catūhi catūbhi	catubbhi catūhi catūbhi	catubbhi . catūbi catūbhi
	Abl.	catubbhi catūhi catūbhi	catubbhi catūhi catūhhi	catubbhi catūhi catūbhi
-bit	Loc.	catūsu	catūsu	catūsu

- 258. (a) In composition, the base of tayo, is ti, as, tilokahitada, bestowing benefits on the three worlds.
- (b) Not seldom, tri also is met with: trikumbhanagaram, the "Three-Hillock-City" (Rangoon).
- (c) The base of cattaro in camposition is catu before a consonant, the consonant being often reduplicated; and catur before a vowel:

catumukho, having four faces
catuppado, a quadruped
catuparisam, the four assemblies
caturangi (catu r. angi), having four divisionscaturasso (catu r. asso), having four corners,
quadrangular.

259. The Dual has completely disappeared in Pāli: the only two vestiges that have come down to us being dve or duve, two, and ubho, both. But even in these two words, the student will remark that the inflection of the plural has almost entirely super-seded that of the dual.

260. Dve or duve and ubho are of the three genders, and used in the plural only.

dve. two ubho, both Nom. dve ubho duve ubhe Gen. dvinnam ubhinnam duvinnam Dat. dvinnam ubhinnam duvinnam ubho Acc. dve duve ubhe Ins. dvihi ubhohi, ubhobhi dvibhi ubhehi, ubhebhi Abl. dvihi ubhohi, ubhobhi ubhehī, ubhebhī dvībhi Loc. dvisu ubhosu, ubhesu

261. (a) The base of dve, duve in composition is dvi and also di, du and dve.

dvijo, twice-born, a brahmin dvijivho, double-tongued, a snake dvipo, drinking twice, an elephant dipako, two-legged, a hiped diguno, two-fold duvidho, of two kinds dvebhūmako, having two stories dvepakkho, two factions or parties (b) dva, dvā are also used as the bases of dve, but chiefly in composition with other numbers.

dvattikkhattum (dva-ti-khattum), two or three

dvatimsati, thirty-two dvāsatthi, sixty-two dvāvīsati, twenty-two

(c) bā is similarly used as a base.

bārasa, bādasa, twelve bāvīsati, twenty-two

262. Pañca five, is, like dve, of the three genders-It is declined as follows:

Nom. pañca
Gen. pañcannam
Dat. pañcannam
Acc. pañca
Ins. pañcahi
Abl. pañcahi

pañcasu

Loc.

263. The other numbers, up to 18 included, are also of the three genders, and are declined as follows:

Nom. Acc.	Gen. and Dat.	Ins. and Abl.	Loc.
six, cha	channam	chahi	chasu
seven, satta	sattannam	sattahi	sattasu
eight, attha	atthannam	aţţhahi	aţţhasu
nine, nava	navannam	navahi	navasu
ten, dasa	dasannam	dasahi	dasasu

- 264. The numerals from 11 to 18 are declined in exactly the same way.
- 265. Here it must be observed that to has threeforms: dasa, rasa, lasa, the last two being used only in composition with other numerals: lasa is also found.
- 266. The numerals from 19 to 99 are feminine; asthey are formed by prefixing the numerals from 1 to 9to the decades, the decades are here given separately.

20, vīsati, visa.

50, paññāsa, paņņāsa

30, timsati, timsa 40. cattālīsa, cattālisa 60, satthi

cattārisa, tālīsa, tālisa 80, asiti

90, navuti

- 267. The numerals ending in i are declined like the feminines in i (jāti, ratti).
- 268. Those in a take in the Nom. sometimes the form in ā, like kaññā, but usually they assume in the Nom. the neuter form in am.
- 269. The following will serve as a model for thedeclension of numerals from 1 to 19:—

DECLENSION OF VISATI, 20.

Nom, and Voc.	Acc.	Gen. and Dat.	Ins. and Abl.	Loc.
1st form visam, visa 2nd form	visam	visāya	visāya	vīsāya vīsāyam
vīsati	vīsatim	vīsatiyā	visatiyā	vīsatiyā vīsatiyam

Remark. Numerals in i follow the 2nd form, and those in a the 1st form.

270. To express full decades but one, as 19, 29, 39. etc., ekūna (eka, one + ūna, dificient by) is prefixed to the decades, as:

ekūnavīsati, 19, vis., 20 deficient by one ekūnatimsa, 29, vis., 30 deficient by one etc.

271. The very high numerals as, koţi ten millions; pakoţi, one hundτed billions, etc., are declined like vīsati.

272. Satam 100, sahassam 1000, lakham 100,000, are neuter substantives, and therefore declined as such on the model of rupam (124).

273-

(II) ORDINALS.

274. The Ordinals are formed from the Cardinals, from 5 upwards by means of the suffix ma:

Cardinal Ordinal

		A TOTAL OF THE A POST A PERSON	The shares again.		
5,	pañca	100.000	pañcama,	5th	
6,	cha	to the	chama,	6th	
7,	satta		sattama,	7th	
8,	attha	3	atthama,	8th	
957	J. 1 11 3	etc.			

275. Ordinals 5th, 6th and 7th, have two forms:
5th, pañcatha, pañcama
6th, chattha, chatthama
7th, satta, sattama

276. From 5 upwards, the Ordinals form their feminine by means of suffix i (181, 2) and their neuter is formed in am. They are therefore declined like devo, nadi and rupam.

	EXAMPLES.	
Masc. Nom.	Fem. Nom.	Neut. Nom.
paňcamo	pañcamī	pañcamam
chatthamo	chatthamī	chatthamam
sattamo	sattamī	sattamam
atthamo	aţţhamī	atthamam
	etc.	

277. From 11 upwards, however, the Cardinals themselves are not seldom used as Ordinals; so that we have the choice of two forms, and can say, either,

ekārasa, 11th, or ekārasama, 11th
pañcadasa, 15th, or pañcadasama, 15th
catuvīsati 24th, or catuvīsatima, 24th
etc.

278. The first four Ordinals are as follows:

Masc. Nom.	Fem. Nom.	Neut. Nom.
pathamo	pathamā	pathamam
dutiyo	dutiyā	dutiyam
* tatiyo	tatiyā	tatiyam
catuttho	catutthā	catuttham

Remark. They are consequently declined like deva, kañña and rūpam.

.279. (III) ADVERBIAL DERIVATIVES FROM NUMERALS.

280. Many important adverbs are derived from numerals by means of some suffixes.

281. By means of suffix dha are formed adverbs signifying: ways, times, fold, and sometimes kinds.

EXAMPLES.

ekadhā, once

dvidhā, in two ways; in two; of two kinds tidhā, in three ways; three-fold, in three parts

282. The word guna, though not a suffix, is often employed like dhā with the meanings of times, fold. In the sense of times, it generally takes the neuter form in am.

EXAMPLES.

dasagunam, ten times; or ten-fold tigunam, three times; or three-fold catugunam, four times; or four-fold

Remark. In the sense of fold, the compound being an Adjective, is treated as such and is declined like deva, kaññā and rūpam.

283. dhā is also used in the same way after a few adjectives:

bahudhā, in many ways anekadhā, in more than one way

284. Distributive adverbs are formed from numerals by means of suffix so (Sansk. cas).

EXAMPLES.

ekaso, one by one pañcaso, five by five

285. From khattum, multiplicative adverbs are formed.

EXAMPLES.

dvikkhattum, twice sattakkhattum, seven times satasahassakkhattum, one hundred thousand times.

286. The two following suffixes, from substantives and adjectives, ka and ya, form collective nouns and adjectives.

EXAMPLES.

catukka, four-fold, consisting of four, a collection of four things; a place where four roads meet.

dvaya, of two sorts, consisting of two, a pair. dvika, duka, consisting of two, a pair. tika, taya, tayī, consisting of three, a triad,

etc.

287. There is an adverb, meaning once, at once, never used in composition with numerals, it is sakim, (Sansk, sakit). When used before words beginning with a vowel it sometimes takes the forms sakid or sakad.

EXAMPLES.

sakim passanto, seeing (him) once sakim yeva, at once, simultaneously sakid eva, at once, simultaneously sakadāgamī (āgamī), returning once only

CHAPTER IX.

PRONOUNS, PRONOMINAL ADJECTIVES,

AND

PRONOMINAL DERIVATIVES.

288.

(I) PERSONAL PRONOUNS.

289.

DECLENSION OF AHAM, I.

OF ALL GENDERS.

Singular.

Plural.

Nom. aham, I

mayam, we amhe, we vayam, we

Gen. mama, my, mine mayham, my, mine mamam, my, mine amham, my, mine

amhākam, our, ours amham, our, ours asmākam, our, ours no, our, ours

mama, to me, for me amhākam to us, for us-Dat.

me, to me, for me

mayham, to me, for me amham, to us, for us mamam, to me, for me asmakam, to us, for us amham, to me, for me no, to us, for us

Acc. marin, me

mamam, me

amhe, us amhākam, us asme, us amhe, us no. us

Singular.

Ins. mayā, me, by me amhehi, by us amhebhi, by us no, by us no, by us amhehi, from us amhebhi, from us no, from us no, from us amhesu, in, on, upon

Loc. mayi, in, on, upon amhesu, in, on, upon us

asmāsu, in, on, upon us asmesu, in, on, upon us

Remarks. (a) The singular base of aham is mad according to Sanskrit commentators; it is properly ma and mam. Pronominal derivatives are, however, formed from the three bases: mad, mam and ma, the latter sometimes with the a lengthened: mā (See Pronominal Derivation at the end of the present chapter.)

- (b) The form me, of the Gen., Dat., Ins., Abl. Sing., is enclitic; it is never used at the beginning of a sentence.
- (c) The form no, of the same cases in the plural is also enclitic, and never used at the beginning of a sentence.
 - (d) The plural base is amha, or amhad.

290. DECLENSION OF TVAM, THOU OF ALL GENDERS.

Singular.

Plural.

Nom. tvam, tyou tuvam, thou tam, thou tumhe, you

Singular.

Plural.

Gen. tava, thy, thine tavam, thy, thine tumhākam, your, yours tumham, your, yours vo, your, yours

tuyham, thy, thine tumham, thy, thine te, thy, thine

Dat. tava, to thee, for thee tumhākam, to you, for you tavam, to thee, for thee tumham, to you, for you tuyham, to thee for vo, to you, for you thee tumham, to, thee, for

thee te, to thee, for thee

Acc. tavam, thee tam, thee tuvam, thee tvam, thee tyam, thee tumhe, you tumhākam, you vo, you

Ins. tvayā, by thee tayā, by thee te, by thee

tumhehi, by you tumhebhi, by you vo, by you

Abl. tvayā, from thee tayā, from thee tvamhā, from thee te, from thee

tumhehi, from you tumhebhi, from you vo, from you

Loc. tvayi, in, on, upon thee tayi, in, on, upon thee tumhesu, in, on, upon you Remarks. (a) The bases are tad and ta (sometimes lengthened to ta), in the singular.

- (b) tumha (tumhad), is the plural base.
- (c) te like me of aham, is an enclitic form and never begins a sentence; so is vo for the plural.
 - (d) vo is also found in the Nom. plural.
- (e) It will be remarked Pronouns have no forms for the Vocative case.

291. (II) DEMONSTRATIVE PERSONAL PRONOUNS.

DECLENSION OF SO, SA, TAM; THIS, THAT, HE, SHE, IT.

202.

Masculine.

so, he; this, that

Si	ingular.	Plural.
Nom.	so, sa '	te
Gen.	tassa	tesam, tesanam
Dat.	tassa	tesam, tesānam
Acc.	tam	te
Ins.	tena	tehi, tebhi
Abl.	tasmā, tamhā	tehi, tehhi
Loc.	tasmim, tamhi	tesu
Section .		

293

Feminine.

sa, she; this, that.

Nom.	Sā		tā, tāyo
	tassā	Gen.	tāsam
Gen.	tassāya		tāsānam
and	tissā	Dat.	tāsarh
Dat.	tissāya	300	tāsānam
	(tāya		

.5	Singular.		Plural.
Acc.	tam		tā, tāyo
Ins.	tāya		tāhi, tābhi
Abl.	tāya		tāhi, tābhi
Loc.	tassam	1	tāsu
	tissam		
	tāyanı		

294.

Neuter.

tam, it; this, that.

Nom.	tam, tad	tāni
Gen.	tassa	tesam, tesānam
Dat	tassa	tesam, tesanam
Acc.	tam, tad	tăni
Ins.	tena	 tehi, tebhi
Abl.	tasmā, tamhā	tehi, tebhi
Loc.	tasmim, tamhi	tesu

Remarks. (a) In the Gen., Dat., Abl. and Loc. singular for the Masc. and Neut., a form from pronominal stem: a, is also used: assa, asmā, asmim., in the Feminine too, for the Gen., Dat. and Loc. singular: assā, assam (Loc.)

- (b) In the Neuter, the form tad is used mostly in compound words, as: tad (=tam) karo=takkaro, "doing this," and also before a vowel.
- (c) It will have been remarked that the stem: ta, 3rd personal pronoun (so, sā, tam), is also used as a demonstrative.

- (d) ta is the base or stem of so, sā, tam; as above said (Note b), the form tad of the base is also used.
- (e) Very often, the above pronoun may be translated as the Definite Pronoun.
- (f) It is, too, often used pleonastically with the pronouns aham and tvam, as are, in fact, most Demonstrative Pronouns; for instance:

so 'ham = this I, viz., I. tassa me (Dat.) = to this me, viz., to me. sā 'yam (= sā ayam) taṇhā = This longing.

- (g) Attā, self; own (154), is, in its oblique cases, very much used in a reflexive sense, instead of the three Personal Pronouns.
- 295. There is a common substitute of so, sā, tam, obtained by replacing t wherever it occurs, by n, for the three genders. Thus we have:

Masculine.	Feminine.	Neuter.
nassa = tassa	nāya = tāya	nam = tam
nena = tena	nassā = tassā	The rest of the
nam = tam	nassāya = tassāya	oblique cases
nasmā = tasmā	nassarh = tassarh	are like the
nasmim = tasmim	nāyam = tāyam	Masculine.
ne=te	nā = tā, tāyo	
nehi = tehi	nāhi = tāhi	

nāsam = tāsam nāsu = tāsu

nesam = tesam

nesu = tesu

296. The forms with n as above given are generally used when a noun which has been already mentioned, is referred to; as,

tam khādāpessāmi nan 'ti. I'll make you eat him (viz., a monkey previously mentioned).

297. DEMONSTRATIVE PRONOUNS.

298. DECLENSION OF ESO, ESA, ETAM, THIS.

299. The student will readily perceive that the above Demonstratives are formed simply by prefixing e to so, sā and tani. They are declined exactly like so, sā, tani.

300. As in the case of so, sā and tam, so also with eso, $es\bar{a}$ and etam, the t may be replaced all through by n, so that we obtain the forms: enena, enam, enam, enam, etc., whose declension presents no difficulty whatever. These forms are also used in referring to a nown already mentioned.

301. Eso, esa, etam may be translated by "that" sometimes.

302. The neuter etad (=etam) is used in composition, or before a vowel.

303. This Pronoun is also used pleonastically with a Personal Pronoun (294, f).

304. e, is considered as the base of Pronouns cnareta, etc. It is much used in derivation.

DECLENSION OF AYAM, THIS; THIS HERE.

305. Masculine.

Singular.

Plural

Nom. ayam Gen. assa imassa

ime imesānam, imesam esānam, esam

Si	ingular.	Plural.
Dat.	assa	imesānam, imesam
	imassa	esānam, esam
Acc.	imam	ime
Ins.	anena iminā	imehi, imebhi ehi, ebhi
Abl.	asmā, imasmā imamhā	imehi, imebhi ehi, ebhi
Loc.	asmim, imasmim imamhi	imesu, esu
06.	Feminine	
Nom.	ayam	imā imāyo
Gen.	assāya, assā	imāsānam
-	imissāya, imissā imāya	imāsam •
Dat.	assāya, assā imissāya, imissā imāya	imäsänath imäsath
Acc.	imam	imā imāyo
Ins.	imāya, assā imissā	imähi imäbhi
Abl.	imāya, assā imissā	imāhi imābhi
Loc.	assam, imissam assā, imissā	imāsu
	imāyam, imāya	139

126

307.

Neuter.

S	ingular.	Plural.
Nom.	idam, imam	imāni
Gen.	imassa, assa	imesam, imesānam
		esanam, esam
Dat.	imassa, assa	imesam, imesanam
		esānam, esam
Acc.	idam, imam	imāni
Ins.	imină, anena	imehi, imebhi
		ehi, ebhi
Abl.	imasmā, amhā	imehi, imebhi
	asmā	ehi, ebhi
Loc.	imasmim, asmim	imesu, esu
	imamhi	

Remarks. (a) The student will remark that the declension of ayam is based on two stems: a and i.

(b) Ayam is used substantively as well as pronominally.

DECLENSION OF ASU, THAT.

308.

Masculine.

3	ingular.		Plural.
Nom.	asu		amū, amuyo
Gen.	amussa,	adussa	amūsam
	amuno		amūsānarh

	Cin mular	Plural.
	Singular.	0.180.001
Dat.	amussa, adussa	amūsam
	amuno	aműsánam
Acc.	amum	amū, amuyo
Ins.	amunā	amūhi
		amūbhi
Abl.	amusmā, amumhā	amūhi
	amunā '	amūbhi
Loc.	amusmim	amūsu
	amumhi	
309.	Feminine.	
Nom.	asu	amū, amuyo
Gen.	amussā	aműsam *
	amuyā	aműsánam .
Dat.	amussā	amúsam
	amuyā	ลmūsānam
Acc.	amum	amū, amuyo
Ins.	amuyā	amūhi, amūbhi
Abl.	amuyā	amūhi, amūbhi
Loc.	amussam	amūsu
1.2	amuyam	
10.	Neuter.	
Nom.	adum, amum	amūni, amū
Gen.	amussa, adussa	amūsam, amūsānam

	Singular.	Plural.
Dat.	amussa, adussa	amūsam, amūsānam
Acc.	adum, amum	amūni, amū
Ins.	amunā	amŭhi
		aműbhi
Abl.	amusmā, amumhā	aműhi
	amunā	aműbhi
Loc.	amusmim	amūsu

Remarks. (a) Some native grammarians also give amu for the Nom. Sing. in the Masculine and Feminine.

- (b) It will be noticed that the stem is amu; in the Neuter, there are a few forms on the stem adu.
- (s) To express: such, so and so, ha is added to the stem, as, asuka, amuka.
- (d) The forms asuka and amuka are often used to express some contempt.
- (e) These two forms have in the plural Masc. and Neut. Acc. asuke, amuke.

311. RELATIVE PRONOUNS.

amumhi

DECLENSIONS OF YO, YA, YAM.

312. Masculine yo, who; he who; whoever; what.

Singular.		Plural.	
Nom.	yo		ye
Gen.	yassa		yesam

Singular.		Plural.
Dat.	yassa	yesam
Acc.	yaın	ye
Ins.	yena	yehi yebhi
Abl.	yasmā	yehi
	yamhā	yebhi
Loc.	yasmin yamhi	yesu

313 Feminine, ya, she; she who; whoever; what.

Nom.	yā	yā, yāyo
Gen.	yāya, yassā	yāsam
Dat.	yāya, yassā	yāsam
Acc.	yam	yā, yāyo
Ins.	yāya	yāhi, yābhi
Abl.	yāya	yāhi, yābhi
Loc.	vāvam, vassam	พลิยา

314. Neuter, yam, it; which: that which.

Nom.	yam, yad	yāni
Gen:	yassa	yesam
Dat.	yassa	yesam
Acc.	yam, yad	yāni
Ins.	yena -	yehi, yebhi
Abl.	yasmā, yamhā	yehi, yebhi
Loc.	yasmim, yamhi	Vesu

Remarks. (a) For the sake of greater emphasis, the Personal Pronouns, and also so, ayam and eso are used pleonastically with yo.

- (b) Yo is used with koci (323), in the three Genders, as yo koci, yena kenaci, yam kinci, etc., both pronouns together meaning: whosoever, whoever, whatever, anyone, anything, etc.
- (c) The form yad of the Neuter singular, is used before vowels and in composition.
 - (d) The base of yo is ya.

315. INTERROGATIVE PRONOUNS.

DECLENSION OF KO, KA, KIM.

316. Masculine, ko, who? what?

Singular.

Plural.

Nom. ko ke Gen. kassa, kissa kesam, kesanam Dat. kassa, kissa kesam, kesanam Acc. kam ke Ins. kena kehi, kebhi Abl. kasmā, kamhā kehi, kebhi kasmirn, kamhi Loc. kesu kismim, kimhi

317. Feminine, ka, who? what?

Nom. kā kā, kāyo Gen. kāya, kassā kāsath, kāsānath Dat. kāya, kassā kāsam, kāsānam Acc. karn kā, kāyo Ins. kāva kāhi, kābhi Abl. kāya kāhi, kābhi Loc. kāya, kassā kāsu kāyam, kassam

318. Neuter, kim, what?

Plural. Singular. käni Nom. kirh kesam, kesanam Gen. kissa, kassa kesam, kesanam Dat. kissa, kassa kāni kim Acc. kehi, kebhi Ins. kena kasmā, kamhā kehi, kebhi Abl. kismim, kimhi Loc. kesu kasmim, kamhi

Remarks. (a) The base of ko assumes several forms: ka, ku (kud), ki (kid).

(b) kud and kid are used before vowels and in composition.

319. INDEFINITE PRONOUNS.

320. The Indefinite Pronouns are formed by adding ci (cid), api and cana, to the Interrogative Pronouns.

321. ci, or, before a vowel cid, is the suffix most commonly used to form these pronouns.

322. $cana\dot{m} = cana$, is also found; both are sometimes shortened to ca.

DECLENSION OF KOCI, KACI, AND KANCI.

323. Masculine koci, any, some, anyone.

Singular.		Plural
Nom.	koci	keci
Gen.	kassaci	kesañci
Dat.	kassaci	kesañci
Acc.	kañci, kiñci	keci

Singular.

Plural.

Ins. kenaci kehici
Abl. kasmāci kehici
Loc. kasmiňci, kamhici kesuci
kismiňci, kimhici kesuci

324. Feminine kāci, any, some, anything.

Nom. kāci kāci, kāyoci kāyaci, kassāci kāsaňci Gen. kāyaci, kassāci kāsañci Dat. kāci, kāyoci kańci Acc. Ins. kāyaci kāhici kāhici Abl. kāyaci Loc. kāyaci, kāyaňci kāsuci kassaňci

325. Neuter, kinci, any, some, anything.

The Neuter is declined like the Masculine except :

Singular.

Plural.

Nom. Acc. kiñci

kānici

326. By placing na, not, before the Indefinite Pronouns we get the meanings: none, no one, nothing, etc.

326. ci, cana, may also be placed after adverbs, to give them an indefinite sense, as:

kuhim, where? kuhinci, kuhincanam, anywhere.

kudā, when? kudācanam, ever, sometimes.

kadā, when? kadāci, sometimes.

OTHER PRONOUNS.

- 328. Attā, self, own, ownself (154), is very much used as a Reflexive Pronoun; so also are; ātumā, self, own, etc., which is but another form of attā, and very rarely used in Buddhist writings; tuma, having the same meaning, is still less frequent.
- 329. In composition the bases are: alla, atuma and tuma.
- 330. sayam, oneself, by oneself and sāmam, self, both indeclinable, are often used as Reflexive Emphatic Pronouns.
- 331. attä, ätumä and tuma are properly nouns used pronominally.
- 332. A few other nouns are thus used pronominally; the following are the most usual.
- 333. bhavam, lord, sir (166). It is a very respectful term of address, used for the Second Pers. Promoun; the verb is put in Third Person.
- 334. Ayya, lord, master; a Buddhist monk; it is used chiefly in addressing Buddhist monks, and is then often used with bhante (166).
- 335. Avuso, friend, brother; is also used as a pronoun sometimes. It is used mostly by senior monks to junior monks. Avuso is indeclinable.

PRONOMINAL DERIVATIVES.

Possessive Pronouns.

336. A few Possessive Pronouns are formed from the bases of the first and second Personal Pronouns by means of suffixes: īya and aka; the vowel of the bases being sometimes lengthened before aka.

Base.

Possessive Pronoun.

mad (289, a) madīya, mine, my, my own.

mam (289, a) māmaka, mamaka, mine, my, my
own.

amhad (289, d) amhadīya, ours, our own.

tad (290. a) tadīya, thine, thy, thy own.

tava (Gen.) tāvaka, thine, thy, thy own.

Remarks. (a) āmaka, mamaka, as well as tāvaka, may be derived from the singular genitive form by the addition of ka.

- (d) The above Pronouns are declined like deva, kañña and rupam.
- 337. A great number of adjectives and adverbs are derived from pronominal bases by means of suffixes, the principal of which are the following:—
 - (a) di (dī), disa, disaka, risa, tara, tama, ka.
 - (b) dā, dāni, tra, tha, thā, tham ti, to, va (vat), rahi, ham, ha, him, va, vam, di.

The former (a) are used to form adjectives, and the latter (b) adverbs.

The following are the principal derivatives by means of the above suffixes.

338. ADJECTIVES.

339. di (di), disa, disaka and risa, express likeness, resemblance; the vowel of the stem being lengthened before them.

EXAMPLES.

Pronominal base. Adjective.

ma (289, a) mādī, mādi, mādisa, mārisa, like me, such as I.

ta (290, a) tādi, tādisa, tādisaka, like him, like that, such.

amha (289, d) amhādisa, like us. tumha (290, b) tumhādisa, like vou.

i (307, a) īdī, idi, īdisa, īrisa, īdisaka, like

e (304) edī, edi, edisa, erisa, like this, such as this.

eta (298, 302) etādisa, etārisa, such as this or that, such.

ki (318, a, b) kīdī, kidi, kīdisa, kīrisa, like what? of what kind?

340. The suffix dikkha, has the same meaning as disa, etc. It is obtained by assimilation from the Sanskrit drksa. Hence we have also the forms:

tādikkha = tādisa kīdikkha = kīdisa edikkha = edisa īdikkha = īdisa, etc.

341. In edi, edisa, etc., the stem i is strengthened (105), in īdisa, etc., it is merely lengthened (19).

342. Tara and tama, which are used for the comparison of adjectives (238), are also added to the interrogative stem to form Pronominal Adjectives which, in meaning, differ but little from the single stem. Hence we have:

katara, which? what? katama, which? what?

343. Some adjectives assume a rather anomalous form; such are, for instance: kittaka, tattaka, yattaka, ettaka, etc. A glance will suffice to show that they are formed on pronominal bases: ya, eta, ki, (ka), etc. The difficulty is to account (for most of them) for the double tt. It is obvious these adjectives were formed by adding the adjectival suffix ka, to the Adverbial Instrumentive in tā (from vat, vant: cf., Sansk. tāvatā from tāvat; yāvatā, from yāvat). The Pāli forms are simply contractions from the Sanskrit forms; as: tāvatā+ka=tāvatāka: the loss of medial va being compensated by the doubling of the last tā; the ā being shortened before ka, and the ā of the first tā as well, according to euphonic laws. So that:

kittaka, how much? How many? How great? kittaka, = *kīvatāka. ettako, so great, so much, so many. ettako, = *etāvatāka. yattaka however much; however big or large. yattaka, = yāvatāka. tattaka, as many, as great, as big or large. tattaka, = tāvatāka.

But cf. also such Sansk. forms as: iyattaka (i-yad-ta-ka); kiyattaka (ki-yad-ta-ka).

The form etta=ettaka, may be accounted for by the further dropping of final ka, the adverb etto, thence,

is probably a contracted form etato (Abl. of etam); in ettavatā, = etāvat, the consonant of the base is doubled.

344. (b) ADVERBIAL DERIVATIVES.

Adverbial derivatives from pronominal bases constitute a large and useful class of words.

The principal suffixes used to form these adverbs have been given above (337, b). We will give here a few examples of such formation.

345. dā, dāni, rahi express time.

EXAMPLES.

Pronominal base.

Adverb.

ka (318, a) karahi, kadā, when.

i (307, a) idani, now; at this time.

ta (290, a) tarahi, tadā, tadāni, then; at that time. eta (298 302) etarahi, now.

346. to, tra, tha, dha, ha, ham, him, form adverbs of place. Before a short vowel the t of tha is doubled.

EXAMPLES.

Pronominal base.

Advarb.

ka, ku (318, a) kattha, kutra, kuttha, kaham, kuham, kuhim, where? whither? wherein? in what place?

ya (314, d) yatra, yattha, where, wherein, whither.
ya yato, from what.

e (304) ettha, here, herein.

a (307, a) atra, attha, here.

ta (290, a) tattha, tatra, taham, tahim, there,

Pronominal base.

Adverb.

ta		tato, thence, from that place.
i	(307, a)	iha, idha, here, in this place.
i		ito, hence, from this place.
eta	(298, 302)	etto, (through etato 343), hence-

347. tha, va, vam, tham, ti form adverbs of manner.

ta tatha, thus, so, like that.

ka katham, how?

i ittham, thus, in this manner.

i iva, like this, as, as it were.

i iti, thus, in this manner.

e eva, evam, so, just so.

ya yatha, as, like.

348. Another suffix va, from vat (=Sansk, vat), forms adverbs of time and cause from the pronominal bases ta, ya, ki. The final t of vat is dropped according to the phonetic laws obtaining in Pāli, which do not suffer any consonant to remain at the end of a word, except m; before a vowel, however, the final t is revived in the form of a d; as for instance: tāva, but; tāvad eva.

Pronominal base.

Adverb.

ya yāva, until; as long as; in order that tāva, so long, still, yet.

Remarks. Final a of the base is lengthened before va (vat), which, as we have seen already (219, ff), forms adjectives from nouns.

The Abl. sing. suffix tā is also added to such forms as the above-

EKAMPLES.

yavata, as far as, because.
tavata, so far, to that extent, on that account.

From other pronominal bases we have:

Pronominal base. Adverb.

eta (298) ettāvatā, to that extent, so far. thus.

ki (318, a) kittāvatā, to what extent?

349. It has been seen that by adding ka to these forms we obtain adjectives of cognate meaning.

350. The suffix di, expressing condition, is found only in yadi, if.

351. The suffix ti, is found in: kati, how many? yati, as many, and tati, so many.

352. Certain Case-forms of pronouns are used adverbially. They will be considered in the Chapter on Adverbs.

ADJECTIVES DECLINED PRONOMINALLY.

353. A few adjectives take the pronominal declension. They are:

katara, which? what? ubhaya, both.

katama, which? what? itara, other, different. añña, other, another aññatara, one. a

certain, another

aññatama, one of several, pubba, first, former.

para, distant, other apara, subsequent, other.

dakkhina, right (not the uttara, upper, higher.

left) adhara, lower, inferior vissa, all.

amuka, so and so, such asuka, so and so, such.

(310, 6)

CHAPTER X. VERBS.

354. Conjugation, or the inflection of verbs, consists in making the verbal root undergo certain changes in form, by the addition to it of certain prefixes and terminations, to show the difference of Voice, of Tense, of Mode, of Person, and of Number.

355. There are two voices:

(t) The Active, called in Päli Parassapada (lit. a word for another) and

t

(2) The Reflective, in Pali called Attanopada (lit.

a word for one's self).

- 356. The Active Voice, or Parassapada may be said to be used, when the fruit or consequence of the action expressed by the verb passes on to person or thing other than the *subject* or *agent*; the Reflective Voice or Attanopada, is used when the fruit or the consequence expressed by the verb accrues to no one else but to the agent. The Reflective Voice merely implies that the agent has the ability to do that action or suffer that state which is denoted by the Root.
- 357. It must here be remarked that the Reflective Voice has lost very much of its importance, and that the distinction between Active or Reflective has been almost, if not altogether, effaced, and that the choice between Active or Reflective is mostly determined now by metrical exigencies. It, therefore, follows the Reflective Voice or the "Middle Voice," as it is also called, is confined to poetry, and is but rarely found in prose.

358. There are six Tenses:

(r) The Present; and its preterite:

(2) The Imperfect; used originally to express a definite past.

- (3) The Aorist, expressing time recently past. This is now the only true past tense in Pāli, and is very extensively used.
- (4) The Perfect, originally an indefinite past. This tense is of very rare occurrence.
- (5) The Future expressing future time in general and its preterite.
- (6) The Conditional, expressing future time relatively to something that is past, and an action unable to be performed on account of some difficulty in the way of its execution.
- 359. There are three Modes of the Present Tense':
 - (1) The Indicative,
 - (2) The Imperative, and
 - (3) The Optative.
- 360. The Present, the Perfect and the Future Tenses have each a Participle, called after them:
 - (1) The Present Participle.
 - (2) The Perfect Participle, and
 - (3) The Future Participle.

Remarks. The Perfect Participle, mostly formed from the Root, is principally of past and passive meaning: sometimes also of neuter meaning.

- 361. There is also a Participle of Necessity, also called Future Passive Participle and Potential Participle, which is but a Verbal Adjective.
- 362. According to the Base on which they are formed, the Present and the Future Participles may be Active or Passive in sense.

- 363. There are two Verbal Nouns:
 - (1) The Infinitive, in the Accusative Case-form; sometimes (rarely) in the Dative Case-form; which has nothing to do with the Conjugation and the Tense-Systems; and has the sense of a regular Infinitive.
 - A Gerund so-called, which is but the Caseform of a derivative noun having the force of an absolute participle.
- 364. There are two Numbers: the Singular and the Plural.
- 365. There are three Persons: the First, Second and Third Persons.
- 366. From what has been said above, it will be seen hat the tenses group themselves into four well-defined tclasses or systems:
 - (1) The Present System, composed of:
 - (a) The Present Indicative, and its preterite:
 - (b) The Imperfect;
 - (c) The Present Imperative;
 - (d) The Present Optative, and
 - (e) The Present Participle.
 - (2) The Aorist System, composed of; Th Aorist Tense only.
 - (3) The Perfect System, comprising;
 - (a) The Perfect Tense, and
 - (b) The Perfect Participle.

- (4) The Future System, composed of:
 - (a) The Future Tense:
 - (b) The Conditional, and
 - (c) The Future Participle.
- 367. There is a division of the tenses, more fictitious than real, into "Special Tenses" and "General Tenses", from such a division, one would be inclined to think that the former are formed on a special base or modified form of the root, and the latter, therefore, from the root itself. But such in fact is not the case, for it will later on be remarked that the special and the general tenses not seldom interchange their bases.
- 368. As, however, the Present System is by far the most important, and as it is made the basis of the different Conjugations or Classifications of Verbs, we will, in the next section, explain the formation of the several stems or bases of the Present System (otherwise called "Special Tenses,") of which there are ten, divided into Seven Conjugations.

These bases are in consequence called "Special Bases."

369. The Conjugation of Verbs is furthermore divided into Primitive and Derivative Conjugations.

(A) PRIMITIVE VERBS.

Formation of the special bases of the Present System. Conjugation.

- 370. The verbs of the Piret Conjugation form the Present stem or base in four ways, as follows:
- The roots end in a consonant, and to form the base or stem, simply add A.

Salaradan

EXAMPLES.

Roots. Bases. pac, to cook paca labh, to obtain labha mar, to die mara rakkh, to keep, guard rakkha yac, to entreat, beg yāca vada vad, to tell, say tar, to cross tara iīv, to live iīva bhar, to carry bhara

371. To this division belong those roots which, ending in a consonant preceded by i or u, sometimes do, and sometimes do not, strengthen the vowel (i, u)

EXAMPLES.

(Without Strengthening.)

Roots. Bases
tud, to know, destroy tuda
phus, to touch phusa
likh, to write likha
nud, to remove nuda

(With Strengthening.)

Roots. Boses.
gup, to keep, watch gopa
subh, to shine, be beautiful sobha

(2) The roots of this division do not take the conjugational sign a: the personal endings of the tenses are added directly to the root.

EXAMPLES.

Roots.	Bases.
yā, to go	yā
vā, to blow	vā

Roots.			Bases.
thā, to stand khyā, to tell (wi brū, to speak	th prefix)	,	ţhā khyā brū

Remarks. (a) To this class may be said to belong the roots ending in i, $\bar{\imath}$, or u, \bar{w} which, when a is added to them, do not take their semi-vowel substitute, but are merely gunated (109, 104—107).

EXAMPLES.

Roots."

Bases.

ni, to lead	ne (or naya) (3rd Division)
ji, to conquer	je (or jaya) (3rd Division)
hū, to be	ho
ku, to sound	ko (or kava) (3rd Division)

- (b) To these transformed roots, which at first sight appear to be pure roots, the personal endings are added, as after the roots yā, vā, thā, etc. (2nd Division).
- (c) So that these roots assume two special bases: one in e or aya, and one in o or ava, according as the last vowel is i, $\bar{\imath}$ or u, \bar{u} .
- (3) The roots of this division end in i, $\bar{\imath}$ or u, \bar{u} which, before the conjugational sign a, are respectively changed to ay and av (103—110).

EXAMPLES.

Roots.

Roots. A = Bases. A = A = A = A A = A A =

Roots.

Bases

ku, to make a sound (ku+a=) kava khi, to govern

(khi +a=) khaya

(See above No. 2, Remarks (a, c),

(4) The verbs of the Fourth Division of the First Conjugation form their special bases by reduplicating the root.

EXAMPLES.

Roots.	4	Bases.
tha, to stand		tiţţhā
dā, to give		dadā
dhā, to hold		dadhā
hã, to forsake		jahā
hū, to sacrifice		juho

Remark. These retain the long a before the Personal endings of the Present and of the Imperative.

- 372. The Rules of Reduplication are as follows:
- (1) Reduplication consists in the doubling of the first consonant of a root together with the vowel that follows it.

If the root begins with a vowel, that vowel alone is reduplicated.

- (2) A guttaral is reduplicated by its corresponding palatal.
- (3) An unaspirate is always reduplicated by an unaspirate (page 2,); which means that an unaspirate is reduplicated by itself.
 - (4) The initial h of a root is reduplicated by j.
 - (5) An aspirate is reduplicated by its unaspirate.

(6) V is generally reduplicated by u.

(7) A long vowel is shortened in the reduplicated syllable. That is:

(a) a or ā takes a in reduplication, and some-

times i.

(b) i or i takes i.

- (c) u or ū takes u but sometimes a.
- (d) i is occasionally changed to e.

(e) u is changed to o sometimes.

(f) a of the root, following the first consonant, is sometimes changed to a; that is, it is lengthened.

EXAMPLES.

Simple roots.	Reduplica	ated bases.
dhā, to hold	(Rule 372, 5, 7-a)	dadhā
dā, to give	(Rule 372, 3, 7—a)	dadā
kit, to cure	(Rule 372, 2, 7-b; 88).	cikiccha
gam, to go	(Rule 372, 2, 7-a)	jagama
khan, to dig	(Rule 372, 2, 7-a)	cakhana
har, to bear	(Rule 372, 4, 7—a and f)	jahāra
has, to laugh	(Rule 372, 4, $7-a$ and f)	jahāsa
budh, to know	(Rule 372, 3, 7-e)	bubodha
suc, to mourn	(Rule 372, 3, 7-e)	susoca
pac, to cook	(Rule 372, 3, 7-a)	papaca.
chid, to cut	(Rule 372, 5, 7-d)	cicheda
bhū, to be	(Rule 372, 5, 7-c)	babhuva
vas, to live	(Rule 372, 6, 7-f)	uvāsa
vad, to say	(Rule 372, 6, 7-f)	uvāda
ah. to say	(Rule 372, 1*, 22)	āha

Remarks. The above rules of reduplication apply as well to the Perfect Tense; but as the Perfect is very seldom used in Pāli, the student ought not to assume the existence of any form unless it be actually found in the course of his reading.

373. The Verbs of the **second Conjugation** form their Special Bases by inserting niggahīta before the last consonant of the root, and then adding a, as in the First Conjugation. Niggahīta follows the usual rules of Sandhi (39).

EXAMPLES.

Roots.		Bases.
rudh, to restrain muc, to free		rundha muñca
chid, to cut		chinda
lip, to smear		limpa
bhuj, to eat		bhuñja
pis, to grind	14	pimsa

374. The sign of the **Third Conjugation** is ya, which is added to the root; the rules for the Assimilation of y (70ff) are regularly applied.

EXAMPLES.

Roots.		bases.
yudh, to fight	(Jyudh + ya (74, vi) =	yujjha
budh, to know	$(\sqrt{budh} + ya (74, vi) =$	bujjha
pas, to see	$(\sqrt{pas} + ya (76, i) =$	passa
dus, to vex	$(\sqrt{dus} + ya (76, i) =$	dussa
gā, to sing	$(\sqrt{g\bar{a}} + ya) =$	gāya
jhā, to think	$(\sqrt{jha} + ya) =$	jhāya

Remarks. The roots of this *conjugation ending in long \bar{a} , are sometimes given under the form of e also; thus:

ge=gā, to sing. ve=vā, to weavejhe=jhā, to think, meditate.

375. The forms in \bar{a} (gā, etc.) belong, as we have already seen, to the Third Conjugation, but those in e belong to the First Conjugation (3rd Division), and form their bases by the addition of a. Thus:

 $ge + a = g\bar{a}ya$. $ve + a = v\bar{a}ya$.

Remarks. Note well that final e+a=aya with lengthening of the first a.

376. The Verbs of the First Conjugation form the present Stem or Base by the addition of nu, or nā if the root end in a vowel; but unu or unā if the root end in a consonant.

Remarks. (a) The u of nu and unu may be strengthened to o.

(b) This u or o may, before a personal ending beginning with a vowel, be changed to va (27, ii a, b).

EXAMPLES.

Roots.

Bases.

su, to hear suṇā or suṇo pāpuṇā or pāpuṇō

(c) The long ā of nā, unā is retained before the Personal endings of the Present and of the Imperative except the 3rd Person Plural. Occasionally, however, it is found shortened.

- (d) In a few cases the n is de-lingualised and changed to the dental nasal, viz, n, following in this the analogy of the Sanskrit.
- 377. Verbs of the Fifth Conjugation form their bases by adding $n\bar{a}$ to the root, which as a rule ends in a vowel.

Remarks. (a) If the final vowel of the root is long (2), it is shortened before $n\bar{a}$.

(b) Under the influence of a preceding Sanskrit τ or τ., nā is sometimes lingualised and becomes nā.

EXAMPLES.

Roots.	Bases.	-
ci, to heap, collect	cinā.	
ki, to buy, barter (Sans. krī)	kīnā or kinā.	
dhū, to shake	dhunā.	
ji, to conquer, win	jinā.	
as, to eat	asnā.	
jā, to know	jānā.	
yu, to mix, associate	yunā	

Remarks. The long a of nā is retained in all the persons of the Present and Imperative, except in the 3rd Plural. The short form in na is also often found.

378. The Verbs of the **Sixth Conjugation** form their Special Bases by adding u to the root; this u generally strengthens to o, which before an ending beginning with a vowel is changed to va (27).

EXAMPLES.

Roots.	Bases.
kar, to do, make	 karo
tan, to stretch, expand	tano
kun, to make a sound	kuņo
van, to beg, ask for	vano

Remarks. (a) The conjugation of Jkar, highly arregular and formed on several bases, will be given in full later on.

(b) The roots belonging to this Conjugation are remarkably few-

379. The Verbs of the seventh Conjugation form their Special Bases by adding to the root aya, which by contraction may be replaced by e. The forms in e are more commonly met with than those in aya. (Compare: 1st Conjugation, 3rd Division).

Remarks. The following should be carefully noted:

- (a) When the radical vowel is u, it is changed to
 φ, provided it be not followed by a Conjunct Consonant.
- (b) Radical a, if followed by a single Consomant, is generally lengthened, in some cases, however, it remains short.
- (c) It will be perceived from the above that the verbs of the Seventh Conjugation have two bases: one in c and one in aya (Compare: 1st Conjugation, 3rd Division).

EXAMPLES.

Roots

Bases

cur, to steal
gup, to guard, shine
pus, to nourish
bandh, to bind
tīr, to finish, accomplish
chadd, to throw away
kath, to say

core or coraya
gope or gopaya
pose or posaya
bandhe or bandhaya
tire or tiraya
chadde or chaddaya
kathe or kathaya

380. A great many roots can form their bases according to two or three or even most Conjugations, in which case the meaning of each Special Base from the same root, differs, in most instances, from the original meaning of the root itself. This will be better understood by several examples. The numbers after the bases refer to the Conjugations.

EXAMPLES. Roots. Bases. subh sobha (1), to shine: \subh + a = sobha. sumbha (2), strike: \(\subh + m + a = \sumbha subh kosa (1), to call, cut: \(\lambda \text{kus} + a = \text{kosa}. \) kus kus kussa (3), to embrace: Jkus + ya, kusya == kussa (76). teka (1), to go: Jtik+a=teka. tik tikunā (4), to oppress : √tik+unā = tikuņā tik re (1), to expand: $\sqrt{ri} + a = re$. rī rīnā, (5), to inform : Irī+nā=rīnā. tî laya (1), to liquify: \$\li+a=laya. 17 līnā (4), to approach : Ilī + nā = līnā. Iī. tana (1), to aid, assist: \lan + a = tana. tan tano (6), to expand, stretch: $\sqrt{\tan + u}$ (=0) tan -tano. vaddh vaddha (1), to grow, increase. I vaddh + a == vaddha. vaddh vaddhe (7), to pour from one vessel into another: \vaddh+e=vaddhe. vida (1), to know: \langle vid + a = vida. vid vijja (3), to be, have: \(\square\) vid + ya = vidya = vid vijja. vid

d · vind (2), to find, get, enjoy : \(\sqrt{vid} + m + a = \)
vinda.

yid vede, vedaya (7), to feel, speak : Jvid + e = vede or vedaya.

CONJUGATION OF THE PRESENT SYSTEM.

First Conjugation.

381. The bases of the verbs having been formed according to the rules given in the preceding paragraphs, there only remains to add to them the appropriate Personal Endings. We now give the Personal Endings for the tense of the Present-System, which is by far the most important, omitting the Present Participle, which will be treated in a special chapter.

Present Indicative.

Pe	ers. Activ	e. Voice.	Pers. K	Reflective. Voice.
	Sing.	Plur.	Sing.	Plur
				1
I.	mi	ma	e	mhe
2.	si	tha	se	vhe
3.	ti	nti	te	nte, re
		Impo	erfect.	
I.	a, am	amhā	im	mhase
2.	0	ttha ·	se	vham
3.	a	u	ttha	tthum
		Imper	rative.	
I.	mi	ma	е .	āmase
2.	hì	tha	ssu	vho
3.	tu	ntu	tam	ntam
		Opto	tive.	1
ı.	eyyāmi	eyyāma	eyyam	eyyāmhe
2.	eyyāsi	eyyātha	etho '	eyyavho

etha

eyva

Remarks. (a) In the singular Optative Active Voice, e may be substituted for eyyāmi, eyyāsi and eyya.

- (b) The vowel of the base is dropped before a Personal Ending beginning with a vowel.
- (c) Before mi and ma of the Present Indicative, the a of the base is lengthened.
- (d) In the 2nd person singular Active of the Imperative, hi may be dropped and the base or stem alone used. Note that before hi the a of the base is lengthened.
- 382. As has been said above (370), the First Conjugation has four divisions. The roots ending in a consonant and adding a to form the base, are extremely numerous.
- 383. The following is the paradigm of Jpac, to cook.

Present Indicative.

I cook, etc.

Active.		Reflective.	
Sing.	Plur.	Sing.	Plur.
 pacāmi pacasi pacati 	pacāma pacatha pacanti	pace pacase pacate	pacamhe pacavhe pacante pacare
	Imperfe		
 apaca apacam apaco apaca 	apacamhā apacattha apacu	apacim apacase apacattha	apacāmhase apacamhase apacavham apacatthum

Imperative.

Let me cook, etc.

Active.		Reflective.		
	Sing.	Plur.	Sing.	Plur.
	pacāmi pacāhi pacı	pacáma pacatha	pace pacassu	pacāmase pacavho
3.		pacantu	pacatam	pacantain

Oplative.

I may, should, can, could-cook, etc.

I.	paceyyāmi	paceyyāma	paceyyam	paceyyāmhe
2.		paceyyātha	pacetho	paceyyavho
3.	pace paceyya pace	paceyyum	pacetha	pacerarii

Remarks. (a) The Augment a of the Imperfect may be omitted, so that we also have the forms: paca, pacam, paco, etc.

- (b) The final vowel of the 3rd person singular active may also be long: apaca, apaca.
- 384. The above Personal Endings of the Special Tenses are affixed to the Special Base of the seven Conjugations, after the model of Jpac.
- 385. Roots of the 1st Conjugation in i, ī and u, ū require no explanations. The base being obtained 371, 3), the above Endings are merely added to it.

Johū, to be; base; bhava Jnī, to lead; base, naya.

3. bhavatam

Present.

			ACTIV	E.	
		Sing.	Plur.	Sing.	Plur.

	2.	bhavassu	bhavavho	nayassu	nayavho

nayatanı

bhavantam

nayantam

Optative.

ACTIVE.

Sing. Plur. Sing. Plur.

- bhaveyyāmi, bhaveyyāma nayeyyāmi, nayeyyāma bhave naye
- bhaveyyāsi, bhaveyyātha nayeyyāsi, nayeyyātha bhave naye
- bhāveyya, bhaveyyum nayeyya, nayeyyum bhave naye

REFLECTIVE.

- bhaveyyam bhaveyyāmhe nayeyyam nayeyyāmhe
- 2. bhavetho bhaveyyavho nayetho, nayeyyavho
- 3. bhavetha bhaveram nayetha nayeram

386. The roots of the first conjugation which take the Personal Endings directly (371, 2) are not numerous.

387. It must be here noted that in Pāli all the roots are not conjugated in the Active and the Reflective Voices for all the tenses. Especially so is the case with the roots that take the Personal Endings directly.

EXAMPLES.

Jyā, to go; Jvā, to blow; Jbhā, to shine:

- 1. Sing. Plur. Sing. Plur Sing. Plur. 2. yāmi yāma vāmi vāma bhāmi bhāma
- 3. yāsi yātha vāsi vātha bhāsi bhātha
- 4. yāti yanti vāti vanti bhāti bhantti

Remarks. Before nti, 3rd Plural, ā of the root is shortened.

388. In the Optative, a y is inserted before the Personal Endings:

yāyeyyāmi, yāyeyya; vāyeyya, vāye, etc., etc.

389. Some roots of this class are gunated (110) generally in the Reflective and 3rd Plural Present Active: Jbrū to speak.

Active.		Reflective.	
Sing.	Plur.	Sing.	Plur.
1. brūmi	brūma	brave	brümhe
2. brúsi	brūtha	brūse	brüvhe
3. brūti	bravanti	brute	bravante

Remarks. In the Plural 1st and 2nd Persons Reflective, the u is sometimes found shortened.

390. Other roots of this conjugation are:

Jhan, to strike, kill, 3rd singular = hanti, but 3rd plural = hananti.

In the Aorist we have: ahani, hani, etc.

Ji to go, strengthened to e; the weak base ya is also used (cf. 1st Conjugation, 3rd division, such roots as n1: strong base ne and weak base naya. Similarly, ji: strong base je and weak base jaya.) We therefore obtain—

I.	emi	ema
2.	esi	etha
3.	eti	enti and yanti

Athā, to stand, thāti, thāsi, etc.

pā, to guard, protect, pāti, pāsi, etc.

Remarks. (a) Roots of this class may, like others belonging to different Conjugations, be compounded with Verbal Prefixes.

EXAMPLES.

Jkhyā, to tell $+ \bar{a} = \bar{a}$ khyā $+ ti = \bar{a}$ khyāti; Jthā+ ni = nitthā+ ti = nitthāti, to be finished. Jhan+ ni = nihan + ti = nihanti, to strike down.

di+upa=upe(21)+ti=upeti, to approach.

- (b) the ā of Jthā is shortened to a, when the root is reduplicated (1st Conjugation, 4th Division). •
- (c) thā, in composition with Verbal Prefixes, often assumes the Special base thaha.

EXAMPLES.

Jthā + sam = santhāti, or santhahati, or santithatia (See Niggahīta Sandhi), to stand.

Jthā+pati=patithāti, or patithahati, to stand fast, . firmly.

Jthā+ud =utthāti, or utthahati, to stand up.

391. Similarly, $\lambda dh\bar{a}$, which at first sight would appear to belong to the 1st Conjugation, 2nd Division, de-aspirates itself into daha, and migrates into the λpac class (370, 1). Moreover, it is used only with Verbal Prefixes. This root also belongs to the reduplicating-class (372) and consequently has also the base dadhā. A base dhe, of the same root, is extensively used.

EXAMPLES.

√dhā to carry, bear, hold + ni = nidahati, or nida-dhāti, or nidheti, to put down, hold aside (= lay aside.)

√dhā+abhi=abhidahati or abhidadhāti or abhidheti, to declare, point out.

392. Some roots belonging to the Reduplicating Class (371, 4th Division), also take the Personal Endings directly in the Present Tense and the Imperative.*

^{*}Throughout this chapter many Pāli Grammars have been consulted, such as: Saddanīti, Niruttidīpani, Galonpyan, Akhyātapadamāla, etc.

393. By false analogy, some roots in i (371, 3rd Division) seem to belong to the class of roots which take the endings directly; but, in reality, these roots belong not to the 2nd Division, but to the 3rd Division, the endings being added, not after the root, but after the strengthened (Chapter IV, p. 33) base, i or $\bar{\imath}$ having first been changed to e under influence of a (21, i). Those bases are conjugated exactly like J curbase core, paradigm of which is given lower down. The Reflective Voice of such roots is formed from the base in aya.

EXAMPLES.

Inī, base ne or naya.

Present.

Active.		Reflective.		
Sing.	Plur.	Sing.	Plur.	
1. nemi 2. nesi 3. neti	nema netha nenti	naye · nayase nayate	nayāmhe nayavhe nayante

1. nemi 2. nehi 3. netu	nema netha nentu	naye nayassu nayatarh	nayāmase nayavho nayantam	
emark. The O	ptative ma	y also be for	10 to	

Remark. The Optative may also be formed on the base in ne, as:

0	h	ta	ti	7)	P	
	r		W- D		•	٠

Sing.	Plur.	Sing.	Plur.
1. neyyāmi	neyyāma	neyyam	neyyāmhe
2. neyyäsi	neyyätha	netho .	neyyavho
3. neyya	neyyurh	nayetha	nayeram

394. Other roots are:

3. dadātu

√sī, to lie down, base: se or saya.
√ji, to conquer, base: je or jaya.
√di, to set a net, base: de (in oddeti).

Remark. The most important root of the Root-Class is Jas, to be, which is rather defective; it will be given in a special chapter (See Defective Verbs).

REDUPLICATING CLASS.

395. The verbs of this class are characterised by taking a reduplicating syllable: the rules have been given above (372). The conjugation presents no difficulty. For instance: $\sqrt{d\bar{a}}$, to give.

ACTIVE.

	Prese	nt.	Imperfect.		
	Sing.	Plur.	Sing.	Plur.	
I.	dadāmi	dadāma	adada	adadamhā

	Sing.		Plur.	7	
1.	. dadāmi		dadāma		
2.	2. dadāhi, dadā		dadātha		

dadantu

396. Some tenses of this verb are formed directly from the base; they will be given in their proper place.

Remarks. (a) Of \$\int d\overline{a}\$, we also find the bases: daja and de, formed by false analogy: dajjāmi. dajjasi, dajjati; dajjāma, dajjatha, dajjanti, etc., demi. desi, deti; dema, detha, denti, etc.

- (b) There is an anomalous form of the singular Present very probably formed on the analogy of the plural: dammi, dasi, dati.
- (c) The Reflective forms do not exist for most of the tenses, only a very few are met with: the first singular and the first plural: dade, dadamase.
- (d) In the root Jtha the final ā of a base is preserved long only in the first singular and plural Present:

Sing.	Plur.
tiţţhāmi	tiţţhāma
titthasi	titthatha, thatha
tiţţhati	tiṭṭhanti

It will be remarked that thatha, and person plural, is formed directly from the root.

The 2nd, 3rd, 4th, 5th, 6th and 7th conjugations.

397. The conjugation of the 2nd, 3rd, 4th, 5th, 6th and 7th Classes does not present any difficulty; the Personal Endings are added as has already been shewn for the First Conjugation.

Second Conjugation.

398. Achid, base: chinda (373), to cut,

Present (Active).

Singular. chindami, chindasi chindati Plural. chindama chindatha chindanti

Present (Reflective).

Singular. chinde chindase chindate Plural. chindamhe chindavhe chindante

399. The other Tenses are formed regularly, as: chindeyyami, chindeyyasi, chindeyya, or chinde; chindeyyama, chindeyyatha, chindeyyum.

And so on for the other Tenses.

Remark. The root ruch, to obstruct, has five bases: rundhati, rundhiti, rundhiti, rundheti and rundhoti.

Third Conjugation.

400. div, base: dibba (77), to play.

Present (Active).

Singular. dibbāmi dibbasi dibbati
Plural. dibbāma dibbatha dibbanti

Present (Reflective).

Singular. dibbe dibbase dibbate

Plural. dibbāmhe dibbavhe dibbante

The other Tenses are formed regularly, as: Imperfect: adibba, adibbo, adibbā, adibbamhā, adibbattha, adibbu. Optative: dibbe, dibbeyya, dibbeyyāmi dibbeyyāsi, etc.

Fourth Conjugation.

401. Jsu, base: sunā (376) or suno, to hear.

Present (Active).

Sing. Plur. Sing. Plur.

suņāmi suņāma or suņomi suņoma

suņāsi suņātha or suņosi suņotha

3. suņāti suņanti or suņoti suņonti, sunvanti

Remarks. (a) The other Tenses are formed on the base: suṇā, final ā being dropped before initial i and e, as suneyyāmi, suneyyāsi, etc., sunissāmi, suņissāma, suņissasi, etc.

- (b) Jsak, to be able, belongs to this conjugation, but has developed several bases; sakkunāti, with the k doubled; sakkoti, by assimilation (57)=sak+no-sakno=sakko+ti=sakkoti. Similarly, there is a form sakkāti, obtained by the same process; sak+nā=saknā, sakkā+ti=sakkāti: and still another form occurs, with short a: sakkati.
- (c) Jāp, to attain, with prefix pa (pa+āp=pāp), shows three forms: pappoti, pāpunāti, pāpunoti; Jgan, to take, seize, has for base: ganhā, with metathesis (111, p. 35): ganhāmi, ganhāsi, etc.
- (d) We have already said that the n is very often de-lingualized (376, d). That is to say, many of the roots belonging to the 4th Conjugation form their bases according to the 9th Conjugation of Sanskrit verbs, by adding nā to the root. For instance, from Joi, to collect, to heap, we have: cināti, to gather; ocināti, ocinati, to pick up, to gather. Remark that the base may be with short a as well as with long a and that this is the case with many of the roots of this Conjugation of: sancinati, sancinoti, sancināti, to accumulate.

(e) From Jbhū we have a verb: abhisambhunati and abhisambhunoti, to obtain. The root of this verb is said by some grammarians to be Sanskrit Jbhrī, but this is most improbable. Some Native grammariansgive a root sambhū, found only in the Dhammapada, not perceiving it is merely a compound of prefix sam + Jbhū.

Fifth Conjugation.

402. Jahu, to shake; base dhuna (377).

Active.		Reflective.	
Sing.	Plur.	Sing.	Plur.
dhunāmi	dhunāma	dhune	dhunāmhe
dhuṇāsi	dhunātha	dhunase	dhunavhe
dhunāti	dhunanti	dhunate	dhunante dhunare
	Sing. dhunāmi dhunāsi	Sing. Plur. dhunāmi dhunāma dhunāsi dhunātha	Sing. Plur. Sing. dhunāmi dhunāma dhune dhunāsi dhunātha dhunase

Remarks. (a) Other verbs belonging to this Classare: Jinā. jā, nā to know, base: jānā; Jas, to eat, base: asnā; Jmun = man, to think, base: munā.

(b) The student will have remarked that the 4th and 5th Conjugations very often interchange their bases. This is owing to the false analogy of Sanskrit Roots.*

^{*}Up to date I did not know that Pali would have to be taught in the B. A. classes but the news has been just received that it is to be taught, and that, moreover, the students in the B. A. will be required to study, to a certain extent, Sanskris

Sixth Conjugation.

403. Akar, to make, to do, base : karo (378).

Present.

Sing.	Plur.
1. karomi	karoma
2. karosi	karotha
3. karoti	karonti

Remarks. (a) There are several bases of the root kar, as: karo, kara, kubb; the conjugation of this verb, as already said (378, a) will be given in full in the Chapter on Defective Verbs.

tan to stretch, base: tano (strong); weak base =

Present.

Activ	e.		Ref	lective.
Sing.	Plur.	Sing	7.	Plur.
tanomi	tanoma	tanve	(27)	tanumhe
tanosi tanoti	tanotha	tanuse		tanuvhe tanvante (27)

grammar, thus making its elementary teaching necessary in the F. A. The news is welcome indeed for, as scholars well know, a certain amount of Sanskrit is indispensable to a better understanding of Pali. The difficulty alluded to on page 22 of the present book, that "the difficulty thus experienced arises from their ignorance of Sanskrit, without a—at least slight—know-ledge of which the study of Pali becomes sensibly more difficult," has now been removed. To meet the new curriculum. a short treatise on Comparative Phonology and Morphology will be prepared as a companion to this grammar, which, we hope, will lighten the tasks of the young student.

(b) The root belonging to this Class are very few.

Seventh Conjugation.

404. The roots of the 7th Conjugation, as has been remarked above (379), have two bases; one in e and one in aya, which are conjugated exactly like the roots of the 1st Conjugation, 3rd Class (See 393).

Irregular Bases.

Some roots form their Special bases according to none of the above given rules; and they are in consequence called *Irregular*. The principal are here given.

√gam, to go Special base gaccha Jyam, to restrain Special base vaccha Jguh, to hide Special base guhe √dhā, to hold Special base daha, dhe (391) Jdā, to give Special base dajja √jā, jan, to be born Special base jāya √pā, to drink Special base piva Idams, to bite Special base dasa √dhmä, to blow Special base dhama √vyadh (=vadh) Special base vadha Asad, to sit Special base sida Itha, to stand Special base tittha √is, to wish Special base iccha. I vad, to speak, Special base vajja, vajje vada, vāde Special base mīya, miyya, mar, to die mara

Jgah, to take, seize Jgam, to go

Special base gheppa* Special base ghamma,

gaggha*

Jjir, to grow old, decay Special base jiya, jiyya Jdis, das, to see Special base dakkha

daccha*

THE AROIST.

405. The Aorist is the only true past tense in Pali. The Personal Endings of the Imperfect and those of the Aorist have become hopelessly mixed up and the Native grammarians are at a loss to differentiate between the Imperfect and the Aorist; but the Aorist has generally superseded the Imperfect. There are many anomalies which the student cannot possibly understand without a slight knowledge of Sanskrit grammar; he need not, however, be detained by these considerations just now. The usual Endings of the Imperfect have already been given (381); much will be achieved if he, for the present, devotes his attention to the following paragraphs.

As tudy of the Chapter on "Comparative Phonology and Morphology " will make clear to him these appar ent anomalies.

406. The Aorist is supposed to be formed from the root but, as a matter of fact, it is formed indifferently either from the root or from the base.

Most of the changes noticed above correspond to similar changes which occur in the 1st, 4th and 6th Confugations of Sansk it Verbs.

^{*}These forms are given by the Saddaniti and the Akhyatapadamālā. They are regularly conjugated like gaccha: ghammāmi, ghammasi, ghammati, etc., gagghami, gagghasi, gagghati etcghamme, ghammeyya, gagghe, gaggheyya, etc. The bases dakkha, daccha from Jdas, dis are formed on the false anology of the Future base, which we shall see when treating of the Future.

407. The desinences of the Aorist are:

Active. Reflective.

Sing. Plur. Sing. Plur.

1. am, m, im, imha, imhā. a imhe
a, ā
2. i, o, ā ittha ise ivham
3. ā, i, ī um, imsu, ū ā, a tthum, atthum

Remarks. (a) The student will remark, on comparing the above Endings with those of the Imperfect, that it is difficult to make out the Imperfect from the Aorist (the blending of Imperfect and Aorist is well known to students of Comparative Philology): the only criterion is, that the Imperfect is generally formed on the Special Base, and the Aorist, on the root. But even this is not an absolute criterion, and the fact remains that these two tenses can scarcely be differentiated.

(b) Of the above Endings, however, the most commonly used and most distinctively Aoristic are:

Sing.	. Plur.	
ı. im	imha, imhā	
2. i	ittha	
3. i	imsu (isum)	

- (c) The nasal of am is often omitted, and a alone remains.
- (d) The Aorist of the great majority of verbs is formed with the desinences given in (b).

408. The Aorist may be divided into three types:

- (i) Radical Aorist.
- (ii) Stem or Base Aorist.
- (iii) Sigmatic Aorist.

Remarks. (a) As its name indicates, the Redicall Aorist is formed directly from the root.

- (b) The Sterm Aorist is formed on the Special Base.
- (c) The Sigmatic Aorist is distinguished by an state that comes between the root and the personal endings given in (407), (b).

(i) THE RADICAL AORIST.

409. This Aorist is not very common. We will give a few examples. Let it be first remarked that the Aorist may also take the augment a before it, as does the Imperfect.

410. from Jgam, and Jgā and gū (subsidiary forms) of Jgam,) to go, we have:

(a) Sing.	Plur.
1. agam, agamā agamim	agumha
2. agā, agamā	aguttha
3. agā, agami	agurh
0.00	agamimsu

(b) Jas, to be (with augment a)—
Sing. Plur.

1. asim āsimha
2. āsi āsittha

3. āsi āsum, āsimsu

411. JTha

Sing. Plur.

1. attham atthamha
2. attho atthatha
3. attha atthamsu atthum

Remarks. For the doubling of initial th see 33.

412. From Jkar we find: akam (1st singular), no loubt formed on the analogy of:

akā (1st, 2nd and 3rd singular): akā being itself from the Vedic form: akar, the loss of the r is compensated by the lengthening of the final a.

In the 1st singular we also have: akaram, akarim. In the plural:

2. akattha; 3. akarum, akaru, akarimsu

413. Jhū (a form of J bhū) to be.

3rd singular: ahū, ahu, and before a vowel, ahud.

ıst plural : ahumhā ; 3rd plural : ahum.

414. Jda

ist singular: adā, which is also and and 3rd singular; in the plural we find: 3rd adum, adamsu, adāsum.

415. The augment a is not inseparable from the Aorist, so that we meet with such forms as $g\bar{a} = ag\bar{a}$, etc.

(ii) STEM AORIST.

on the stem or base, not on the root. The augment may or may not be retained.

Apā, base: piva, to drink.

	Sing.	Plur.
ı.	pivim	pivimha
	pivi	pivittha
3.	pivi	pivimsu

For the Reflective:

1. pive	pivimhe	
2. pivise	pivivham	
3. piva, pivā	pivu, pivum	
	pivimsu, pivisum	

417. The great bulk of Primitive Verbs (369) forms their Aorist according to the above (piva): it is therefore extremely common, both with and without the augment; let it be stated once for all that this augment is of much more frequent occurrence in prose than in poetry; in the latter its retention or its rejection is regulated by metrical exigencies. We will give a few more examples:

√ bhuj to eat, base: bhuñja; √gam, to go, base: gaccha.

	Sing.	Plur.	Sing.	Plur.
1.	bhunjim	bhuñjimha	gacchim	gacchimha
		buňjimhä		gacchimha
	bhuñji	bhuñjittha	gacchi	gacchittha
3.	bhuñji	bhuñjimsu	gacchi	gacchimsu
			gañchi	

(iii) SIGMATIC AORSIT.

418. Sigmatic Aorist is formed by inserting an s between the radical vowel or the vowel of the base and the personal endings given above (407, b.)

419. So that we obtain the following desinences:

Sing.	Plur.
1. sim (=s+im)	simha (=s+imha)
2. si (=s+i)	sittha (=s+ittha)
3. $si (=s+i)$	sum (=s+um)

- 420. As will be readily understood, this formation of the Aorist is used with roots ending in vowels, and the s is inserted to join the endings to the root or to the base. It will be seen lower down, however, that they are added also to some roots ending in a consonant, when the s becomes assimilated to that consonant.
- 421. The signatic desinences are used mostly with the Derivative Verbs, principally the Causative Verbs (See Dérivative Conjugation), which end in the vowel c. The verbs of the 7th Conjugation, which also end in c, form their Aorist in the same way.

EXAMPLES.

(Causative Verbs.)

422. Jna, to abandon, Causative base: hape.

Atas, to tremble, Causative base : tase.

	Sing.	Plur.	Sing.	Plur.
Ι.	hāpesim	hāpesimha	tāsesim	tāsesimha
2.	hāpesi	hāpesittha	tāsesi	tāsesittha
	hāpesi	hāpesum	tāsesi	*täsesum

Remarks. In the 3rd plural the form in imsu is also frequent: hapesimsu, tasesimsu.

(Verbs of the 7th Conjugation.)

423. Jour, to steal, base: core; Jkath, to tell, base: kathe.

	Sing.	Plur.	Sing.	Plur.
I.	coresim	coresimha	kathesim	kathesimha
2.	coresi	coresittha	kathesi	katesittha
3.	coresi	coresum	kathesi	kathesum
		caresimsu		kathesimsu

Remarks. (a) To the base in aya endings given in (407, b) may be added directly without the insertion of sigmatic s, so that we have also:

Sing:	Plur.	Sing.	Flur.
1. corayim	corayimha	kathayini	kathayimha
2. corayi	corayittha	kathayi	kathayittha
3. corayi	corayum	kathayi	kathayum
	corayimsu		kāthayimsu

- (b) This holds good for the Causative Verbs, which have also a base in aya.
- 424. The Sigmatic Aorist desinences are placed after some roots which do not belong to the 7th Conjugation or to the Derivative Verbs:
- (i) After roots ending in a vowel, with or without the augment a.
- (ii) After some roots ending in a consonant, in which case the usual rules of assimilation (85) are strictly applied.

EXAMPLES OF (i).

Jdā, to give: adāsim, adāsi, adāsimhā, etc.
 Jtha, to stand: aṭṭhāsim, aṭṭhāsimha, etc.
 Jhā, to abandon: ahasim, ahāsi, ahāsimha, etc.
 Jsu to hear, assosim, assosi, assosimha, etc.
 Jyā, to go: yāsim, yāsi, yāsimha, etc.

Remarks. From an illusory $Jk\bar{a}$ (= kar, to do), we find: akāsim, akāsi, akāsimha, etc.

From Jñā, to know: aññāsim, aññāsi, aññāsimha, etc.

EXAMPLES OF (ii).

425. At a first reading, the student had perhaps better leave unnoticed the few references to Sanskrit Grammar which will be found in the next few paragrahs. Let him merely assume the forms as they are given: the more advanced student ought, of course, to read them with attention. The chapter on Comparative Phonology will greatly help him in understanding the various changes in the root, which we will now bring to his notice.

426. The s (initial) of Sigmatic desinences, as above given (419), assimilates itself to the last consonant of the root according to the usual rules of assimilation.

(a) Form Jais = Sanskrit Jarg, we find addakki = Sanskirt adrak-s-is.

The following forms are also found: addakhī, adakhi, dakhi.

- (b) From Jsak, to be able = Sanskrit Jsak, we have sakkhi, asakkhi; Sanskrit = çak-ş-is.
- (c) Jkus, to revile = Sanskrit Jkrug, gives akkocchi, but akkosi, without the Sagmatic s, is also met with.
 - (d) Johanj, to break, gives Aorisi bhankhi.

Remark. The above examples will, I think, be sufficient to make the student understand the nature of changes which occur in the formation of the Sigmatic Aoist when the roots end in a consonant; this consonant is generally $s \ (= Sanskrit \ s)$ and sometimes j. In Sanskrit, final $s \ (= Pali \ s)$ is regularly changed to s before the initial s of verbal endings thus giving the group ksa, which in Pali becomes kkha. Again, by

another rule of Sanskrit phonetics, final j becomes g_* and as no word can end in a mute sonant, this g is changed to its corresponding surd, that is, to k.

This class of the Sigmatic Aorist, however, is not numerous.

SYSTEM OF THE PERFECT.

427. As has been seen, the Perfect System consists of the Perfect tense and the Perfect Participle. The participle will be treated of in the chapter on Participles.

428. The Perfect is characterized by the reduplication of the root. The rules have already been given (372) and should now be read over carefully.

429. The endings are:

Perfect. Active Reflective Sing. Plur. Sing. Plur. I. a mha mhe . ttha ttho vho 2. e ttha 3. a re

Remarks. (a) Roots ending in a consonant insert an i before the above endings beginning with a consonant.

(b) The Perfect is of very rare occurrence.

base: babhūv. Perfect base: papac. Jbhū, Perfect

	Active.		Active.		
	Sing.	Plur.	Sing.	Plur.	
2.	papaca papace papaca	papacimha papacittha papacu	babhūva babhūve babhūva	babbūvimha babhūvittha babhūvu

papacit-	papacire.	babhūvit-	babhüvire.

tha.

THE FUTURE SYSTEM.

- 431. This system includes the Future, the Conditional and the Future Participle. The Participle will be considered in a special chapter.
- 432. The Future System has for special characteristic the sign: ssa inserted between the root and the personal endings.

Remarks. (a) The Future System is frequently formed on the Present base.

- (b) The vowel i is often inserted between the ssa and the root or base: in this case the final vowel of the root or base is dropped.
- (c) When the ssa is added directly to a root ending consonant, the same changes which occur in the Aoust occur also in the Future System, through the assimilation of the initial s of ssa.

433. The Personal Endings for the Future are:

Active.		Reflective.	
Sing.	Plur.	Sing.	Plur.
I. mi	ma	· m	mhe
2. Si	tha	se	vhe
3. ti	nți	te	nte, re-

Remarks. (a) It will be seen that in the Active the endings are the same as those of the Present Indicative (381).

(b) Before mi, ma and mhe the a of ssa is leng-

EXAMPLES.

- 434. (i) without connecting vowel i.
- (a) Ji, to go, special base c (390), future base:

	letive		Reflective.		
	Sing.	Pural	Sing.	Plur.	
ı.	essāmi	essāma	essam	essāmhė	
2.	essasi	essatha	essase	essavhe	
3.	essati	essanti	essate	essante	

່ ປ່ ຖະ to lead, special base ne (371,3) future base : ກessa.

Singular: nessāmi, nessasi, nessati: Plural nessāma, nessatha, nesaanti, etc.

(b) Ithā, to stand, Singular: thassāmi, thassasi, thassati; Plural: thassāma, Ghassatha, thassanti, etc.

Remarks. In the above ssa is added directly to the sport; for the shortening of radical a see (34). Again:

Jda, to give, Singular: dassāmi, dassasi dassati; Plural: dassāma, dassatha, dassanti.

(ii) with connecting vowel i.

(c) bhū, to be, special base: bhava, future base: bhavissa.

Active.

Reflective.

Sing. Plur. Sing. Plur.

- bhavissāmi bhavissāma bhavissāmhe-
 - 2. bhavissasi bhavissatha bhavissase bhavissavhe-
 - 3. bhavissati bhavissati bhavissate bhavissante-
 - (ii) with assimilation of sea.
- (d) Jbhuj, to eat, gives bhokkha as future base: (=Sanskrit Jbhuj=bhok+sya=bhoksya) and wehave: bhokkhati, bhokkhate, bhokkham, etc.

J chid, to cut, gives: checcha (Sanskrit J chid = chet + sya = chet sya) then: checchāmi, checchasi, checchati, etc.

Jdis, to see, gives a future: dakkha (=Sans-Jdrg=drak+sya=draksya): from this we find: dak-hhati, but more frequently dakkhiti. Similarly, from root Jsak, to be able, is obtained sakkhiti.

435. A double future is also found formed from bases like bhokkha, dhakka, which, as has been just now explained, are already future, by adding to them ssa with the connection vowel—i.

EXAMPLES.

Jeak, future base: sakka, sakkhissāmi, sakkhissasi, sakkhissati, sakkhissāma, etc.

436. From hoti, the contracted form of bhavati, to be, we find the following numerous forms for the future:

Singular.

 hemi, hehāmi, hohāmi, hessāmi, hehissāmi, hohissāmi, I shall be.

hesi, hehisi, hohisi, hessasi, hehissasi, hohissasi, Thou will be.

 heti, hehiti, hohiti, hessati, hehissati, hohissati, He will be.

Plural.

- hema, hehāma, hohāma, hessāma, hehissāma, hohissāma, We shall be.
- hehta, hehitha, hohitha, hessatha, hehissatha, hohissatha, You will be.
- henti, hehinti, hohinti, hessantha, hehissanti, hohissanti, They will be.

J kar, to do, gives:

Sing.		Plur.		
1.	kāhāmi, I shall do	kāhāma, we shall do		
2.	kāhasi, kāhisi, thou wilt do.	kāhatha, you will do		
3.	kāhati, kāhiti, he will do	kāhanti, kāhinti, they will do		

THE CONDITIONAL.

- 437. The Condition takes the augment a before the
 - 438. The personal endings are as follows:

Active.		Reflective.		
Sing.	Plur.	Sing.	Plur.	
I. ssa	ssamhā	ssam	ssāmhase.	
2. sse, ssa, ssasi	ssatha	ssase,	ssavhe.	
3. ssā, ssa, ssati	ssamsu	ssatha	ssimsu.	

Remarks. The above endings are generally joined to the root or the base by means of the connecting vowel i.

pac, to cook :

. Active.

Reflective.

Sing.

Plur.

Sing.

Plur.

apacissam apacissamhā apacissam apacissāmhase

 apacisse apacissatha apacissase apacissa apacissi

 apacissā apacissamsu apacissatha apacissimsu apacissati

Remarks. (a) The Conditional may be translated by "If I could cook," "If I should cook," etc.

(b) The conditional is not very frequently used.

THE PARTICIPLES.

(a). Present Participle.

ACTIVE.

439. All paticiples are of the nature of verbal adjectives, and must agree with their nouns, in number, gender and case.

440. The terminations of the present participle active are: nta, am, or m,; nta and m are added to the base am is added to the root.

EXAMPLES.

Root. Base. Pres. Part. Act. (base) Jpac, to cook, paca pacām, pacanta cooking Jkar, to do, kara karonta karam doing Ichid, to cut chinda, chindam chindanta cutting Jbhan, to say, bhana, bhanam bhananta saying Jbhū, to be, bhava bhavam bhavanta; being √pā, to drink, piva, pivam pivanta drinking 441. Verbal bases ending in c (1st Conj. 3rd. Division; 7th. Conj. and causal bases*) which have also another base in aya, take only the termination nta after the base in c, and both nta and m after the base in aya.

EXAMPLES.

(1st and 7th Conjugations)

Root. Base. Pres. Par. Act. (base)

Jour, to steal core, coraya corenta. corayam, cora yanta

√kath, to tell kathe, kath- kathenta, kathayam aya kathayanta

√nī, to lead, ne, naya nenta, nayam, nayanta √ji, to con- je, jaya jenta, jayam, jayantaa quer

(Causalive.)

Root. Caus. Base. Pres. Part, Act. Base dhāre, dhārayan, dhārayan,

dhar, to dhārāpa, dhārāpa, dhārāpa-

hold dharape, dharapaya, dharapenta, dharapayan, dharapayanta.

māre, māraya, mārenta, mārayam, mar, to mārayama.

die, marape, marapaya, marapenta, marapayam, marapayanta

chid, to chede, chedaya chedayam, chedayam,

cut, chedāpe, chedāpaya chedāpenta, chedāpayam, chedāpayanta.

^{*} See Derivation or Secondary Conjugation.

442. Bases in nã, no, unã, uno (4th Conj.) and nã (5th Conj.) generally take the termination nta.

EXAMPLES.

Root. Base. Pres. Part. Act. (Base).

su, to hear, suņā, suņo, suņanta, suņonta

kī, to buy, kiņā, kiņanta

443. The stem or base of this Present Participle is in at or ant as:

Pres. Part.

Root. Stem. Nom. Sing. Masc.

√pac, pacat, pacant pacam, pacanto

Jear, carat, carant caram, caranto

√bhan, bhanat, bhanant bhanant, bhananto

444. The Feminine is formed by adding i to the stems or bases in at and nta.

445. The Neuter is in in like the masculine.

EXAMPLES.

Root. Stem. Masc. Fem. Neut.

Jpac pacat { pacam pacatī pacam pacam pacant pacantam

Jehie chindat Schindam chindati chindam chindant chindanto chindanti chindantam

446. These participles are declined like mahā (226) in the Masculine, Feminine and Neuter.

The Present Participle may often be translated by "when..., while"....etc.

Reflective Participle.

447. The Reflective Participle is formed by the addition of mana to the base. It is declined like purisa, kaññā, and rūpam.

EXAMPLES.

Reflective Participle.

Root.	Masc.	Fem.	Neuter.
√ pac	pacamāno	pacamānā	pacamānam
J car	caramāno	caramānā	caramānam
√dā	dadamāno	dadamānā	dadamānam
Jsu	suņamāno	suņamānā	suņamānarh

448. Another Reflective Participle, much less frequent than the above, is formed by adding ana to the root. It is declined like that in mana.

EXAMPLES.

Reflective Participle.

Root.	Masc.	Fem.	Neut.
√pac	pacāno	pacānā	pacānam
Jear	carāno	carānā	carānam
√dā ·	dadāno	dadānā	dadānam

Remarks. As may be seen from the last example, dadana, this participle may also be formed from the base.

The Future Participle.

- 449. The future participle is either active or reflective.
- (a) In the active, it takes the endings of the present: participle active, nta, m (or am), and is declined like mahā.
- (b) In the reflective, the endings are: māna and āna, and it is declined like purisa, kaññā and rūpam.
 - (c) All these endings are added to the future base.

EXAMPLES. (i) Future Participle Active.

Root	s.	Masc.	Fem.	Neut.
√pac	•	issam issanto	pacissatī pacissantī	pacissam pacissantam
√car	17.55	ssam ssanto	carissatī carissantī	carissam carissantam
√su		issam issanto	suņissatī suņissanti	suņissam suņissantam

(ii) Future Participle Reflective.

1 pac	pacissamano	pacissamānā	pacissamānam	
100	pacissāno	pacissānā	pacissānam	
Jcar	carissamāno	carissamānā	carissamānam	
10	carissano	carissānā	carissānam	
Jsu	suņissamāno	suņissamāna	suņissamānam	
	suņissāno	suņissānā	sunissānam	

The Passive Perfect Participle.

450. This participle is very widely used. It is formed from the root by affixing to it the suffix ta or the suffix na.

Remarks. The suffix ta is by far the most commonly used in the formation of this participle.

451. ta is affixed in several ways:

- (i) If the root end in a vowel, it is added directly without any change taking place in the root.
- (ii) When the root ends in a consonant, ta may be joined to it by means of connecting vowel i.
- (iii) When the root ends in a consonant, ta may become assimilated to it according to the usual rules.

Remarks. At this stage, the student ought to read carefully the chapter on Assimilation (p. 22 jf.)

Examples.

Roots ending in a vowel. 452: Present. Pass. Perf. Part. Root. Inahā, to bathe nahāyati, he bathes nahāta, bathed bhavati, he is, Jbhu, to be, bhūta, been. becomes becāme become neti, nayati, he leads nīta, led √nī, to lead jeti, jayati, he con- jita, conquered Jii, to conquer quers cinăti, he collects cita, collected Jci, to collect bhayati, he is afraid bhita, afraid, Jbhi to be affrightened raid. ya, to go, un- yati, he goes yāta, gone, undergo dergone Jñā, to know jānāti, he knows ñāta, known

Remarks. There are a few exceptions to roots in final \bar{a} .

/pa, to drink, makes pita, drunk.

Jtha, to stand, makes thita, stood, standing.

Jdha, to hold, becomes hita, held.

Jda, to give, dinna, given.

(ii) Roots ending in a consonant and taking voweli before ta.

Root. Present Pass. Perf. Part.

pac, to cook pacati, he cooks pacita, cooked cal, to shake calati, he shakes calita, shaken gah, to take ganhāti, he takes gahita, taken kapp, to arrange kappeti, he arranges kappita,

arranged khād, to eat khādati, he eats khādita, eaten likh, to write likhati, he writes likhita, written maṇḍ, to adorn maṇḍeti, he adorns maṇḍita, adorned gil, to swallow gilati, he swallows gilita, swal-

lowed

kath, to tell katheti, he tells kathita, told

Remarks. (a) Participles like pacita, calita, etc., are declined like purisa, kaññā and rūpam.

(b) In the neuter, these participles are often used as nouns:

has, to smile, Passive Perfect Participle: hasita, smiled; neuter: hasitam, a smile.

Jeall, to thunder, Passive Perfect Participle: gajjitta, thundered; neuter: gajjittam, the thunder.

Jiv, to live, Passive Perfect Participle: jīvita, lived; neuter: jīvitam, life.

Root

(iii) ta assimilated to the root.

· 453. The suffix ta assimilates, or is assimilated to, the last consonant of the root:

P. P. P. rules of assimilation.

Root.	r. r. r. rutes	oj assimilation.

154. (a) Roots in 7	generally drop the	r before ta
ru.	EXAMPLES.	

Jkar, to make	kata,	made	(81)
Jsar, to remember	sata,	remembered	(81)
√mar, to die	mata,	dead	(81)

455. (b) Roots in n generally drop final n before ta.

EXAMPLES.

Iman, to think mata, thought

√khan or khan, khata (also: khāta, from a collateral form khā = khan), dug

Jhan, to kill hata, killed

456. (c) sometimes final m is also dropped.

EXAMPLES.

Jgam, to go gata, gone

Jram, to sport rata, amused, delighted

457. (d) In a few cases, final τ lingualizes the following t, as:

I har, to seize, carry hata, seized, carried

458. Pass. Perf. Part. which takes na.

The suffix na is much less common than ta, and like it:

- (i) it may be joined to the root by means of connecting vowel i, or
- (ii) it may be joined directly to roots ending in a vowel:
- (iii) when added directly to roots ending in a consonant, that consonant is assimilated to n of na, and sometimes the n of na is assimilated to the final consonant.

Remarks. na is added generally to roots in d and r.

459. Examples of (i)

Root. Pass. P.P. Rules of assimilation.

J sad, to settle sinna, settled (69, ii, iii).

Remarks. The form sinna is found only for the verb nisidati, to sit down, = \sad + ni (prefix); when \sad is preceded by other prefixes, the Passive Perfect Participle assumes form; sanna, as

sad—ava = Passive Perfect Participle: ava sanna, sunk, settled.

sad+pa=Passive Perfect Participle: pasanna, settled.

(Note that the base of root sad is sida.)

1	chid,	to cut	chinna, cut	(69, ii, iii)
1	chad,	to cover	channa, covered	(69, ii, iii)
1	dā, to	give	dinna, given	(69, ii, iii,)

In this last example, \bar{a} of the root has been dropped and the n doubled to compensate for its loss; the form datta, given (= $d\bar{a} + ta$, with the t doubled to make for the shortening of \bar{a}), is found sometimes.

Remarks. It will be seen from the above four examples that the insertion of i is to a great extent optional.

1	tar, to	cross	tinna, crossed	(83)
-		wander	cinna, wandered	(83)
1	kir to	scatter	kinna, scattered	(83)

Remarks. In these examples, i is inserted and then n reduplicated and lingualized according to rule (83)

460. Exam	PLES OF (iii)	4
Root.	P. P. P.	Rules of assimilation.
- U bhaj, to break	bhagga, broken	(57)

In these two examples, final i of the root having become, against the usual phonetic laws, g, the n of suffix na, is assimllated to it by rule 57. (426, Remark).

lag, to adhere

lagga, adhered

461.

EXAMPLES OF (ii)

√1ī, to cling to √lū, to cut, reap Jkhi, to decay, cease

līna, clung to lũna, reaped, cut

khina, decayed (final i is lengthened)

√gilā, (glā, 113), to

gilāna, ill

be ill

I ha, to be weak, low hina, low, wasted, inferior In the last example, radical a is replaced by i.

462. A few Passive Perfect Participles are irregular, such as: jhāma, burnt, from √jhā, to burn; phulla, expanded, split, from Jphal, to expand, split; but these are properly speaking derivatve adjectives used as participles.

463. Sometimes two forms of the Passive Perfect Participles for the same root are met with:

lag, to adhere Jgam, to go

P. P. P. lagga and lagita P. P. P. gata and gamita

Jda, to give Tkas, to plough P. P. P. kattha and kasita

P. P. P. dinna and datta

464. The participles in ta and na are declined like purisa, kaññā and rūpam.

PERFECT PARTICIPLE ACTIVE.

465. The Perfect Participle Active, is formed by adding vā to the Passive Perfect Participle.

EXAMPLES.

Root. P. P. P. P. A.

√pac, to cook pacita, cooked pacitavā, having cooked.

√bhuj, to eat bhutta, eaten bhuttavā, having eaten.

√kar, to do kata, made katavā, having made.

Remarks. (a) These Perfect Participles Active are declined like gunavā, ex., pacitavā, pacitavatī or pacitavantī, pacitavam or pactiavantam.

(b) The P. P. Active is also formed with suffix vī (231), in this case the a before vī is lengthened to ā. They are declined like medhāvī, 235 (that is, like dandī, nadī and vārī) as: pacitāvī, having cooked; bhuttāvī, having eaten.

FUTURE PASSIVE PARTICIPLE.

466. This participle, also called participle of necessity, potential participle and gerundive, is formed by adding to the root the suffixes: tabba, ya, aniya and iy,

Remarks. (a) Roots ending in u ū, generally form the F. P. from special base.

- (b) This participle is passive in sense, expresses suitability, fitness, propriety and may be translated by: "fit to be...." "must be...." "ought to be...." that which is expressed by the root.
- (c) These participles, like those already treated of, are adjectives and are treated as such; they are declined like purisa, kaññā and rūpam.

TABBA.

467. This suffix is the most common. It is added;(i) directly to roots ending in a vowel;

(ii) to roots ending in a consonant, it may be joined by means of connecting vowel i:

(iii) when added directly—without connecting vowel i—to roots ending in a consonant initial t of tabba is assimilated to or assimilates the last consonant of the root in exactly the same manner as in the formation of the Passive Perfect Participle.

Examples of (i)

Root. Fut. P. P.

Ahā, to abandon hātabba, fit to be, that ought to be, that must be abandoned.

databba, fit to be, that ought to be, that must be given.

Jpā, to drink pātabba, fit to be, that ought to be drunk.

Remarks. (a) Roots ending in i, ī, change i, ī to e before tabba:

Inī, to lead, netabba, fit to be, that must be led
Jji to conquer, jetabba, fit to be, that must be
conquered.

Ji, to go, etabba, fit to be, that must be gone to.

(ii) Roots in u, u form the Fut. P. P. on the Special Base:

Root. Fut. P. P.

Jbhū, to be, bhavitabba, fit to be, that ought to, that must be.

/ku, to sing, kavitabba, fit to be, that ought to be, that must be sung.

In the case of root su, to hear, we find the u merely strengthened: sotabba, fit, etc., to be heard.

Examples of (ii)

EXAMPLES. OF (iii).

√gam, to go gantabba, fit, etc., to be gone to (67).
√kar, to do kattabba, (80); kātabba (82), fit etc., to be done.
√labh, to receive laddhabba, fit, etc., to be received

(63. Remark).

VA.

468. The initial y becomes assimilated to the last consonant of the root according to the usual rules of assimilation (79ff). Sometimes the radical vowel is strengthened.

EXAMPLES.

	* SEPTIME	Rules of
Root.	Fut. P. P.	Assimila-
	:	tion.
Jgam, to go	gamma, fit, proper,	
	etc., to be gone to	(71, i)
Isak, to be able	sakka, able to be don	e (71)
√khād, to eat, chew	khajja, that can be	
A State of the second	chewed.	(71, vi)
Avaj, to avoid	vajja, that ought to	40.4 \$ 100
to de design	be avoided.	(71, 74)

Jbhū, to be

bhabba, that ought to be=proper, possible (77)

In this last example, the radical vowel \tilde{u} has been strengthened before ya: $bh\tilde{u} + ya = bhav + ya = bhavya = bhabba$.

Jlabh, to obtain labbha, fit, worthy to be obtained Jbhuj, to eat bhojja, to be eaten = eatables, food Jbhid, to break bhijja, to be broken (71, vi) levva, to be licked, Jih, to lick, sip (98, Remark) sipped I has, to laugh hassa, fit to be laughed at (76)Jgah, to take gayha, that can be taken, seized (78, 111)

(a) ya is, in a few cases, joined to the root by means of yowel i. For instance:

√kar, to do, make, we have, kāriya, that ought to be, or can be done, with lengthening of radical a.

kayya, that ought, etc., to be done, with assimilation of final r to ya.

kayīra, that ought, etc., with metathesis. (111.)

Johar, to support, bhāriya, that ought to be maintained, with lengthening of radical a.

(c) After roots ending in a long, initial y of ya is

doubled and final a of the root is changed to e.

EXAMPLES.

√hã, to abandon heyya, to be abandoned, that ought to be abandoned.

√pã, to drink peyya, that can, may, or ought to be drunk.

dā, to give

deyya, to be given, that ought to or can be given.

(c) ya is likewise doubled after roots i, ī and the i or ī is changed to e.

EXAMPLES.

√nī, to lead

neyya, to be led, that ought to be led.

√ji, to conquer

jeyya, to be conquered, that can be conquered.

ANIYA.

469. The suffix aniya is added to the root or to the base.

EXAMPLES.

Root.

Fut. Past. Part.

Jpac, to cook
Jpūj, to honour

pacanīya, fit to be cooked pūjanīya, worthy to be honoured.

Jkar, to do, make karanīya, that ought to be made or done.

(Observe that the n is lingualized through the influence of radical r, 83).

Jbhū, to be (base: bhava) bhavanīya, that ought to be.

The Gerund.

470. The gerund is formed by means of suffixes: tvā, tvāna, tūna, ya, and tya. It is indeclinable and partakes of the nature of a participle.

Remarks. (a) The suffix tvā is most commonly met with; tvāna, tūna, and sometimes tūnam are used as substitutes of tvā and are met with in poetry much more than in prose.

- (b) ya is not so restricted in use as tvāna and tūna.
- (c) tya which becomes regularly cca (74, $\bar{i}v$), is merely a form of ya, initial t being inserted between the gerundial suffix ya and a root ending in a vowel (ex., $pa_1 + \lambda i$, to depart + ya = pa + i + t + ya = petya = pecca, having departed. (110).

In Pāli ya is added indiscriminately to simple roots or to roots compounded with prefixes: but as in Sanskrit (in which it is never used after roots) it is much more common after compound verbs.

TVA, TVANA, TUNA.

471. The suffix tvā may be:

- (i) joined to the root by means of connecting vowel i;
- (ii) the initial t of the suffix is, in a few cases, assimilated to the last consonant of the root;

(iii) the vowel of the root is gunated;

- (iv) Sometimes the last consonant of the root is dropped before suffixes tvā, tvāna and tūna;
 - (v) the final long vowel of a root is shortened before these suffixes;
- (vi) the suffixes are added to the special base as well as to the root.

EXAMPLES.

Root.

Gerund.

√pac, to cook √khād, to eat pacitvā, having cooked (i) khāditvā, having eaten (i) Root.

Gerund.

√labh, to obtain

laddhā, obtained (ii), (63), Remark) labhitvā, having obtained (i)

√ni, to lead Ichid, to cut Vkar, to make Itha, to stand, remain Jbhī, to fear

netvā, having led (iii) chetvā, having cut (iii, iv) katvā, having made (iv) thitvā, having stood, remain-

da, to give Jbhuj, to eat

ed (i) bhitya, having feared, fearing (v) datvā, having given (v)

get

bhutvā, having eaten (iv) Jāp-pa=pāp, to patvā, having got (iv, v)

Ji, to conquer

jitvā, jetvā, having conquered (iii)

Remarks. From root that, we have also: thatva; from Jda, daditva, daditvana; from Jkar: katūna, kattūna; from /kam, to step, to proceed: nikkamitvā, nikkamituna; Jsu, to hear; sutvā, sotunam, sunitvā, sunitvāna.

YA, TYA.

472. (i) ya is used mostly with roots compounded with prefixes.

(ii) in a few cases it is used with simple roots.

(iii) tya is regularly changed to cca.

(iv) ya is added directly to roots ending in long a.

(v) ya may be added to the Special Base.

(vi) ya is assimilated to the last consonant of the root.

(vii) ya may be joined to the root or to the base by means of i.

EXAMPLES.

	DAAMPLES.
Isic, to sprinkle	nisificiya, having besprinkled (i, vii)
√jā, to know	vijāniya, having known, dis- cerned (i, v, vii)
√ikkh, to see	samekkhiya, having reflected (i, vii)
√cint, to think	cintiya, having thought (ii, vii)
√bhuj, to eat	bhuñjiya, having eaten (v, ii, vii)
√dā, to give	ādāya, having given (i, iv)
√hā, to abandon	vihāya, having abandoned (i, iv) .
√ñä, to know	abhiññaya, having known (i, iv)
√gah, to take	gayha, having taken (ii, iii)
√gam, to go.	gamma, having gone (vi, 71; ii)
√vis, to enter	pavissa, having entered (vi, i)
√sad, to sit down	nisajja, having sat (vi, 71, 74)
√sad, to sit down	nisidiya, having sat (i, vii, v) (See 459. Remark)
√kam, to tread	akkamma, having trodden (vi, 71, 33, 35)
√i, to go	pecca, having gone, departed = pa+i+tya (21, i; 74, iv)
√i, to go	abhisamecca, having comprehended = abhi + sam + ā + i + tya (21, i)
√han, to strike	āhacca, having struck, =ā + han+ tya, final n being dropped before initial t. (n, dropped before t)
√han, to strike	upahacca, having vexed, = upa + han + tya. (See last remark)
Ihan, to strike	uhacca, having destroyed, = u + han +tya. (See last remark)
√i, go	paticca, following upon, from, = patic
	The second of the second secon

Ahar, to take away, ahacca, having reached, attained, = a + har + tya. (81)

This last should not be confounded with the gerund from J han, given above.

Remarks. (a) Sometimes the gerund having been formed by means of ya, the ya is dropped, the root alone remaining, as:

abhiññā, having known, =abhiññāya.
paṭisankhā, having pondered, = paṭisankhāya.
anupādā, not having clung, not clinging, =anupā-dāya (an + upa + ā + √dā + ya)

(b) Some roots seem to take a compound gerundial suffix, made up of ya and $tv\bar{a}$, and joined to the root by means of i, as:

āruyhitvā (Iruh), having ascended.
ogayhitvā (Igāh = gah), having dived, = ogayha,
ogāhitvā

(c) There are some anomalous forms: disvā, from √dis, to see = having seen. datthu = disvā.

anuvicca, from Jvid, to know=having known; final d being dropped before tya.

pappuyya from √āp+pa=pāp, to obtain=pāpayitvā.

vineyya, from Ini, having removed.

niccheyya, from Inis = having ascertained.

In these last three examples the y has undergone - reduplication.

atisitvā, from Jsar Sānskrit sr. (?), having approached, having excelled.

(d) The student will have remarked that several forms are met with from the same root, as:

Jdā, datvā, daditvā, daditvāna, dāya.

Jkar, kariya, karitvā, katvā, katvāna, kātūna, kattūna.

Jgah, gayha, ganhiya, ganhitva.

Most roots can thus have several forms.

The Infinitive.

473. The Infinitive is generally formed by means of suffix tum.

474. The suffixes tave, tuye and taye are also met with, but seldom.

475. Tum, like the suffix of the P. P. (450, ff) may be:

(i) joined to the root or to the base by vowel i;

(ii) to the roots in ā, it is added directly;

(iii) roots ending in i, ī, change final i, ī to e; and roots in u, ū, change u, ū to o;

(iv) initial t of tum is assimilated to the last consonant of the root; the last consonant may also be assimilated to t;

(v) tum is also added to the Special Base.

EXAMPLES.

Jpac, to cook	pacitum, to cook	(i)
Jkhād, to eat	khāditum, to eat	(i)
Athar, to spread	tharitum, to spread	(i)
dā, to give	dātum (ii)	1
Itha, to stand	thătum (ii)	
Jyā, to go	yātum (ii)	. 3
√ji, to conquer	jetum (iii)	

√nī. to lead	netum (iii)	
√su, to hear	sotum (iii)	
Jlabh, to obtain	laddum, to obtain, Remark)	(iv, · 63,
Jbhuj, to eat	bhottum, to eat (iii,	iv, 59-a)
Jap, to obtain + pa		
Jgam, to go	gantum, to go	(iv; 67)
Ji, to go	etum, to go	(iii)
√su, to hear	sunitum, to hear	(v)
Joudh, to know	bodhitum, to know	(i, iii)
Jbudh, to know	bujjhitum, to know .	(i, v)
√sī, to lie down	setum, to lie down	(iii)
Isī, to lie down	sayitum. (v)	
√jā, to know	jānitum, to know	(v)
which to cut	chinditum, to cut	
Jehid, to cut	chettum, to cut (iii, vi)	iv; 62—

TAVE, TUYE, TAYE.

476. These suffixes are Vedic and but seldom used in Pāli; tave, however, is more frequently met with than the other two.

√nī, lead nitave, to lead vippahātave, to abandon, = vi+ √hā, to abadden pa + ha + tave unnametave, to ascend, rise, = ud-Inam, to bend + nam + e + tave nidhetave, to hide, bury, = ni+, √dhā, to hold base dhe (391) + tave Amar, to die marituye, to die. loined by vowel i ganetuye, to count. Added to agan, to count the base gane dakkhitaye, to see (404) dis, to see

477. The student will have remarked that several forms for the same root are often met with.

Remarks. (a) The Infinitive is used both passively and actively.

- (b) The Dative of nouns in aya is often used with an infinitive sense.
- (c) The Infinitive expresses purpose and may be translated by: "for the purpose of, in order to."

(B)-Derivative or Secondary Conjugation.

- 478. The Derivative Conjugation includes: (1) the Passive; (2) the Causative; (3) the Denominative; (4) the Desiderative and, (5) the Intensive.
- 479. It is called *Derivative Conjugation* because the above named five kinds of verbs are derived from the simple root with a well-defined modification of the sense of the root itself.
- 480. Except for the Causative, Derivative verbs are not conjugated in all the tenses and in all voices.

(1) THE PASSIVE.

- 481. The Passive Conjugation is formed by adding the suffix ya to the root.
- 482. The suffix ya having been added and the Passive Base obtained, the Personal Endings of either the Active Voice or of the Reflective Voice are added to the base.
- 483. Ya is affixed to the root in three ways:
 - (i) Directly after roots ending in a vowel-

- (ii) To roots in a double consonant, ya is joined by means of i, this i being lengthened to i. It is also joined by means of i when a root ends in a consonant that does not generally reduplicate (s, h and r).
- (iii) It may be added directly to roots ending in a consonant; in this case the y of ya becomes assimilated to the last consonant of the root according to the Rules of Assimilation. (70, f(.)
- (vi) Ya is also added to the Special Base by means of i, lengthened.

EXAMPLES OF (i).

Remarks. (a) When ya is added to roots ending in a vowel, the vowel of the root undergoes some change especially vowels: a, i and u.

(b) Radical ā is changed to ī before ya and radical i, u, are lenghtened to ī, ū.

Root.

Jdā, to give √pā, drink √dhā, to hold Jji, to conquer Jci, to heap Jku, to sing su, to hear

Passive Base.

diya, to be given piya, to be drunk dhiya, to be held jīya, to be conquered ciya, to be heaped up kūya, to be sung suya, to be heard

(c) Radical long ī and ū, remain unaffected: bhū, to become bhūya, to have become Jlu, to reap luya, to be reaped Ini, to lead

niya, to be led

(d) In some instances, the long vowel before ya is shortened, in which case the y is doubled.

Root.

Jni, to lead
Jsu, to hear
Jdā, to hear

Passive Base.

Jnīya, or niyya Jsūya, or suyya Jdīya, or diyya

Personal Endings being added, we obtain, for instance from Jji, to conquer, base jīya (or jiyya):

PRESENT.

Active.

Sing.

Plur.

. jīyāmi, I am conquered jīyāma, we are conquered

jīyasi, thou art conquered jīyatha, you are conquered

 jīyati, he is conquered jīyanti, they are conquered

PRESENT.

· Reeflctive.

Sing.

Plur.

t. jīye, I am jīyāmhe, we are conquered conquered

2. jīyase, thou art conquered

jīyavhe, you are conquered

jīyate, he is con- jīyante, they are conquered quered

Optative, (1) jīyeyyam, jīyeyyāmi: (2) jīyetha, jīyeyyāsi; (3) jīyetha, jīyeyya, etc., etc.

Imperative; (1) jīye, jīyāmi; (2) jiyassu, jīyāhi; (3) jīyatam, jīyatu.

EXAMPLES OF (ii).

Root.

Passive Base.

Jpucch, to ask

Jhas, to laugh

Jvas, to live

Jkar, to make

Jsar, to remember

Jmah, to honour

Passive Base.

pucchiya, to be asked

hasiya, to be laughed at

vasiya, to be lived upon
kariya, to be made

sariya, to be remembered

mahiya, to be honoured

EXAMPLES OF (iii)

Jlabh, to obtain

Jpac, to cook

Jbhan to speak

Jkhād, to eat

Jhan, to kill

Jbandh, to bind

Jabha, to be obtained (70, 71)

pacca, to be cooked (70, 71)

bhañña, to be spoken (70, 71)

khajja, to be eaten (70, 71, 34)

hañña, to be killed (70, 71)

bajjha, to be bound (70, 71, 74)

EXAMPLES OF (iv).

Jgam, to go gacchiya, to be gone to bujjhiya, to be known Jis, to wish, desire icchiya, to be wished for

485. Long i before ya of the Passive, is sometimes found shortened, as: mahiyati or mahiyati, to be honoured.

486. It is usual to form the Passive of the roots ending in a cansonant preceded by long \bar{a} , by means of \bar{i} ; $Ex. \ Jy\bar{a}c$, to beg = yacīyati; Jaj, to drive+prefix $pa=p\bar{a}j$, to drive=pājīyati, to be driven.

487. Ya may be added directly after some roots ending a consonant without assimilation taking place and without the insertion of connecting vowel ī; as: Ilup, to cut, elide=lupya+ti=lupyati, to be elided, cut off; Igam, to go=gamya+ti=gamyati, to be gone to.

Remarks. (a) We have already said that when the before ya is shortened, initial y is reduplicated by way of compensation (483, d).

(b) The Perfect, the Aorist, the Future and the Conditional (which four tenses are called: General Tenses—see, 367) of the Reflective Voice, are often used in a passive sense.

488. The Passive may assume several forms from the same root:

Akar, to do, make, gives Passive: karīyati, kariyyati, kayirati (with metathesis), kayyati (with assimilation of τ , 80).

Jgam, to go, gives: gamiyati gacchiyati, gam-

yati.

Jgah, to take, gives: gaybati (metathesis); gheppati, quite an anomalous form.

√hā, to abandon : hāyati, hīyati.

482. Anomalous forms of the Passive.

√vah, to carry, Passive Base=vuyh: vuyhāmī,. vuyhasi, vuyhati, vuyhe, vuyhase, vuyhate, etc.

Jvas, to live, Passive Base = vuss : vussami,

vussasi, vussati, etc.

Jyaj, to sacrifice, Passive Base = ijj, to be sacrificed: ijjāmi, ijjasi, ijjati, etc.

Jvac, to speak, Passive Base = ucc: uccāmi,.

uccasi, uccati, etc.

Jvac, to speak, Passive Base = vucc: vuccāmi, vuccasi, vuccasi, etc.

490. Final s of a root, which is not usually susceptible of reduplication is, however, sometimes found reduplicated as: Jdis, to see, becomes, dissati, to be seen; Jnas, to destroy = nassati, to be destroyed.

CAUSATIVE VERBS.

- 491. Causal or Causative verbs are formed by adding to the root the suffixes:—
 - (i) aya, which is often contracted to e.
- (ii) āpaya, which likewise may be contracted to āpe.
- 492. (i) The radical vowel of the root is gunated or strengthened before these suffixes, if followed by one consonant only.
- (ii) It remains unchanged when it is followed by two consonants.
- (iii) In some cases, radical a is not lengthened although followed by a single consonant.
- (iv) Roots in i, \bar{i} , and u, \bar{u} form their causal from the Special Base.
- .(v) Other verbs, too, may form the causal from the Special Base.
 - (iv) Some roots in a take ape, apaya.

	EXAMPLES.
Root.	Causative Bases.
pac, to cook	pāce, pācaya, pācāpe, pācāpaya, to cause to cook (i)
Akar, to do	kāre, kāraya, kārāpe, kārāpaya, to cause to do (i)
-/gah, to take	gāhe, gāhaya, gāhāpe, gāhāpaya, to cause to take (i)
√mar, to kill	māre, māraya, mārāpe, mārāpaya, to cause to kill (i)
Jsam, to be ap-	same, samaya, samape, samapaya,

Root.	Causative Base.
Jgam, to go	game, gamaya, to cause to go, (iii): we find also: game
Jchid, to cut	chede, chedaya, chedape, cheda- paya, to cause to cut (i)
√bhuj, to eat	bhoje, bhojaya, bhojāpe, bhojā- paya, to cause to eat (i)
√rudh, to hinder	rodhe, rodhaya, rodhape, rodha- paya, to cause to hinder
Jbhid, to break	bhede, bhedaya, bhedāpa, bhedā- paya, to cause to break (i)
Jsu, to hear .	sāve, sāvaya, sāvāpe, sāvāpaya, to cause to hear (iv)
Jbhū, to be	bhāve, bhāvaya, etc. (iv)
√sī, to lie down	sāye, sāyaya, sayāpe, sayāpaya, to cause to lie down, (iv, iii)
√nī, to lead	nāyaya, nayāpe, nayāpaya, to cause to lead (iv, iii)
√pucch, to ask	pucchāpe, pucchāpaya, to cause to ask (ii)
Jdhā, to place, with perfix pi	pidhāpe, pidahāpaya, to cause to shut. (vi)
ika .	pidahāpe, pidahāpaya, to cause, to shut. (v, ii)
Ada, to give	dāpe, dāpaya, to cause to give (vi)
Jtha, to stand	thape, thapaya, to place (vi, with a shortened).

DOUBLE CAUSAL.

493. There is a double causal formed by adding apape to the root.

EXAMPLES.

Root. Simple Causal. Double Causar

I pac, to cook pāce, pācāpe, etc., pācāpāpe, pācāpāpayæ

I chid, to cut chede, chedāpe, etc., chedāpāpe, chedāpāpayæ

I bhuj, to cat bhoje, bhojāpe, etc., bhojāpāpe,

Remarks. The double causal may be translated by So get to, or, to make to cause to......." For instance : to purisam dasam odanam pacapapeti, "He causes the man to cause the slave to cook the food" or "He gets the man to make the slave to cook the food."

bhojāpāpaya

Note that the first accusative or object purisam may be, and is often, replaced by an Instrumentive.

494. The causative verbs are declined like the verbs in i, i, of the 1st Conjugation, 3rd Division (393, 385); and like the verbs of the 7th Conjugation (379).

EXAMPLES.

Jpac, to cook, causalive base: pāce, pācaya, pācāpe, pācāpaya, to cause to cook.

PRESENT.

Singular.

- pācemi, pācayāmi pācāpemi, pācāpayām, I cause to cook.
- pācesi, pācayasi pācāpesi, pācāpayasi, thou causest to cook.
- pāceti, pācayati, pācāpeti, pācāpayati, he causes to cook.

Plural.

- pācema pācayāma pācāpema, pācāpayāma, we cause to cook,
- pācetha, pācayatha pācāpetha, pācāpayatha, you cause to cook.
- pācenti, pācayanti, pācāpenti, pacāpayanti, they cause to cook.

OPTATIVE.

Singular.

 pāceyyāmi, pācayeyyāmi, pācāpeyyāmi, pācāpayeyyāmi, I should cause, etc.

 pāceyyāsi, pācayeyyāsi, pācāpeyyāmi, pācāpayeyyāsi, thou shouldst cause, etc.

 pāceyya, pācayeyya, pācāyeyya, pācāpayeyya, he should cause, etc.

Plural.

 pāceyyāma, yācayeyyāma, pācāpeyyāma, pācāpayeyyāma, we should cause, etc.

pāceyyātha, pācayeyyātha, pācāpeyyātha, pācāpayeyyātha, you should cause, etc.

 pāceyyum, pācayeyyum, pācāpeyyum, pācāpayeyyum, they should cause, etc.

And so on for the other tenses.

Remarks. (a) The bases in e and pe take the Sigmatic Aorist Endings (418, 419).

(b) The bases in aya take the other Endings (407, b). As, pācesim, pācesi, pācāpesim, pācayim, pācayim, pācayim, pācapayim, pācāpayim, etc.

Causal Passive.

405. The passive of a causal verb is formed by joining the suffix ya of the Passive to the Causative Base, by means of i lengthened to ī, final vowel e of the Causative base having been dropped first. The Causal Passive may be translated by "caused to....., made to do" the action expressed by the root.

EXAMPLES.

Root. Simple Causal. Causal Passive. Verb.

Jpac, to cook pacati pāceti, pāciyati, to be caused to cook bhuj, to eat bhuñjati, bhojeti, bhojiyati, to be caused to eat

kar, to do karoti kāreti, kārīyati, to be caused to do

Remarks. Connective vowel i may also be found short.

496. Some verbs, although in the Causative, have merely a transitive sense as:

Icar, to go, Causative careti, to cause to go = to administer (an estate).

Jbhū, to be, Causative bhāveti, to cause to=to cultivate, practise.

497. Verbs of the 7th Conjugation form their causal by adding ape or apaya to the base, the final vowel of the base having first been dropped.

Root. Base.

Jeur, to steal core

Jkath, to tell kathe

Jtim, to wet teme

Simple Verb.

coreti, corayati kathethi, kathayatti temeti, temayati Casual.

corāpeti, corāpayati kathāpeti, kathāpayati temāpeti, tempayāti

DENOMINATIVE VERBS.

498. So called because they are formed from a noun-stem by means of certain suffixes.

499. The meaning Denominative Verb is susceptible of several renderings in English; it generally expresses "(a) "tobe act as, to be like to wish to be like" that which is denoted by the noun; (b) "to wish for, desire" that which is signified by the noun; (c) "to change or make into" that which is denoted by the noun; (d) "to use as or make use of" that which is expressed by the noun.

500. The suffixes used to form Denominative Verb-

(i) aya, aya, e

(ii) īya, iya

(iii) a.

(iv) āra, āla. (These two rather rare).

(v) ape.

means of the above suffixes, the Personal Endings of the tenses are added exactly as they are after the verbs.

Noun-stem.

Denominative Verbs.

pabbata, a mountain pabbatāyati, to act like a mountain

macchara, avarice

macchārayati, to be avaricous.

Noun-stem. :samudda, the ocean

nadi, river arañña, forest

dhana, riches

putta, a son

ipatta, a bowl cīvara, a monk's robe ·dolā, a palankin

winā, a lute

upakkama, diligence, plan gana, a following

samodhāna, connection sarajja, modesty, shyness

tanhā, craving mettam, love karuna, mercy, pity sukha, happiness dukkha, misery

ainha heat branches pariyosana, end . Denominative Verbs.

sammuddāyati, to be or act like the occan nadīvati, to do, act like a river araññiyati, to act (in town) as inthe forest

dhanayati, dhanayati, to desire riches

puttīyati, to desire, or, treat as a son

pattivati, to wish for a bowl cīvarīyati, to desire a robe dolāyati to desire a, or, wish for one's own palankin vināyati, to use the lute = to play on the lute

upakkamālati, to make diligence, to devise plans ganayati, to wish for a follow-

ing or disciples samodhāneti, to connect, join

sărajiati, to be shy, nervous

tanhāyati, tanhīyati, to crave mettāyati, to love karuņāyati, to pity sukhāpeti, to make happy dukkhāpeti, to make miser-

able unhapeti, to heat, warm jatā, mattedhair, tangled vijatāyati, disentangle, comb out

pāriyosānati, to end, to cease

502. Denominatives can also be formed from the stems of adjectives and adverbs; as:

dalha, firm, strong dalhāyati, to make firm, strong

santam, being good santar

santarati, to act well, or handsomely

atta, afflicted, hurt attayati, to hurt, afflict

Remarks. (a) Suffixes ara and ala are simply modifications of ava.

(b) There is an uncommon way of forming Denominative Verbs from nouns: the 1st, 2nd or 3rd syllable of the noun is reduplicated and the suffix tyisa or yisa added to the word thus reduplicated; the vowel u or i may or may not be inserted between the reduplication.

Noun Stem.

Denominative Verb.

putta, son pupputtīyisa

pupputtīyisati, to wish to be (as) a son

putta, a son

puttittīyisati, to wish to be (as)
a son

kamalam, flower kakamalay

kakamalāyisati or kamamalāyisati or kamalalāyisati, to be (as) a flower

(e) The Causal and Passive of all Denominatives are formed in the usual manner.

DESIDERATIVE VERBS.

503. As its very name indicates, the Desiderative Conjugation expresses the wish or desire to do or be that which is denoted by the simple root.

504. The Desiderative is not extensively used in Pali; however, it is frequent enough to warrant a careful partial of the rules for its formation.

ful perusal of the rules for its formation.

505. The suffix sa is the characteristic sign of this conjugation; another characteristic is the reduplication of the root according to the rules already given (372). The student ought first to look carefully over those rules.

EXAMPLES.

Desid. Base. Desiderative Verh. Root. Jsu, to hear sussusa sussusati, to desire to hear = listen (33, 372-70) Jbhuj, to eat bubhukkha bubhukkhati, to wish to eat (86; 372-5) √tij, to bear titikkha. titikkhati, to endure, be patient 372-76) Ighas, to eat jighaccha jighacchati, to desire to eat (89; 372 -7a) ¿Jpā, to drink pipāsa, pivāsa pivāsati, to desire to drink (372-7a). (pivāsa, from the root).

√kit, to cure cikiccha cikicchati, to desire to cure, to treat (88; 372—2)

506. It will be remarked that the initial s of sa is-

507. The bases being obtained, the personal endingsare added as usual.

Remarks. The Causal and Passive are formed in the usual way.

INTENSIVE VERBS.

508. The Intensive Verbs, also called Frequentative Verbs, express the frequent repetition or the intensification of the action denoted by the simple root. The characteristic of the Intensive conjugation is the reduplication of the root according to the usual rules (372).

509. These verbs are not very frequent in Pāli.

EXAMPLES.

Root.

Intensive Verb.

Jlap, to talk

Jkam, to go

Jgam, to go

Jcal, to move

lālappati, lālapati, to lement cankamati, to walk to and fro jangamati, to go up and down cancalati, to move to and fro, to tremble

The personal endings are added as usual.

510. DEFECTIVE AND ANOMALOUS VERBS.

was, to be.

PRESENT SYSTEM.

Present.

Singular.

1. asmi, I am
amhi, I am
2. asi, thou art
3. atthi, he is

Plural. asma, we are amha, we are attha, you are santi, they are

Imperative.

asmi, let me be, amhi, let me be
 ahi, be thou
 atthu, let him, her, it be

asma, let us be amha, let us be attha, be ye santu, let them be

VERBAL PREFIXES.

Upasagga (23. Remark) are prefixed to verbs and their derivatives; they have been, on that account, called Verbal Prefixes. They generally modify the meaning of the, root, or intensify it, and sometimes totally alter it; in many cases, they add but little to the original sense of the root.

515. The usual rules of sandhi apply when prefixes are placed before verbs. When a prefix is placed before a tense with the augment a, the augment must not change its position, but remain between the prefix and the root, as agā + ati = accagā (74, i), and not; aatigā.

516. These prefixes are as follows:

A-to, at, iowards, near to, until, as far as, away, all round.

Jkaddh, to drag, draw = ākaddhati, to draw towards, to drag away. Jkir, to pour, scatter=ākirati, to scatter all over or around, to fill.

√cikkh, to show, tell=ācikkhati, to point out,.. tell to (to communicate).

√chad, to cover=acchādeti, to cover over or all around, to put on clothes (33, 35).

Remarks. This prefix reverses the meaning of some-

√dā, to give, but ādāti, to take.

√gam, to go, base:gaccha=āgacchati, to come.

ati, (before vowel = acc), beyond, across, over, past, very much, very; it expresses excess.

Akam, to slep, go = atikkamati (33), to step over. to go across, go past, to escape, to overcome, to transgress, excel, to elapse.

√nī, to lead=atineti, to lead over or across, to irrigate.

√car, to act = aticarali, to act beyond, too much,
in excess = to transgress.

adhi, (before vowels = ajjh) over, above, on, upon, at, to, in, superior to, great. It expresses sometimes superiority.

Ivas, to live = adhivasati, to live in, to inhabit.

√gam, to go=ajjhagamā, he approached=adhi+augment a+gamā (Aorist).

Jbhās, to speak = adhibhāseti, to speak to, to address.

anu, after, along, according to, near to, behindless than, in consequence of, like, gradually, beneath.

√kar, to do=anukaroti, to do like, vis., to imitate, to ape.

Jkam, to go+anukkamati, to go along with, to follow.

Jdhav, to run=anudhavati, to run aster=to pursue.

Jgah, to take=anuganhati, to take near, beneath = to protect.

apa, off, away, from, away from, forth: it also implies detraction, hurt, reverence.

√ci, to notice, observe=apacāyati, to honour, respect; apaciti, reverence.

Inī, to lead = apaneti, to lead away, vis., to take away, to remove.

√gam, to go, =apagacchati, to go away. √man, to think =apamaññati, to despise.

api, on, over, unto, close upon. This prefix is very seldom used; it is prefixed mostly to the roots: $dh\bar{a}$, to put, set, lay, and nah, to bind, join. It is moreover found abbreviated to pi in most instances.

Jdhā, to put, set, lay = pidahati, to cover, close, shut. Apidhanam, pidahanam, pidhānam, covering, lid, cover.

Jnah; to bind, join = pinayhati, to bind on, join on.

abhi, to, unto, tawards, against, in the direction of-It also expresses excess, reverence, particularity. (Before a vowel = abbh).

Jgam, to go = abhigacchati, to go towards, approach.

Jkankh, to desire, abhikankhati=to desire particularly, to long for, yearn.

Jjal, to blaze = abhijalati, to blaze excessively, vis., fiercely.

Jvand, to salute = abhivandati, to salute reverentially.

ava, down, off, away, back, asie, little, less. Implies also: disrespect, disregard.

Remarks. ava is often contracted to o.

√jā, to know=avajānāti, to despise.

√har, to take=avaharati, to take away. Avahāro, taking away.

√khip, to throw = avakhipati, to throw down.

√lok, luk, to look = oloketi, to look down = avaloketi.

ud (=the u of native grammarians: for the assimilation of final d to the following consonants see 58, 60, 62, 65. Before h, sometimes final d is lost and the u lengthened.

Upwards, above, up, jorth, out.

√khip, to throw = ukkhipati, to throw up, get rid
of; ukkhepanam, excommunication.

~chid, to cut = ucchindati, to cut off.

√thā to stand=utthahati, to stand up, rise. Utthānam, rising.

√har, to take=uddharati (96), to draw out. Uddharanam, pulling out.

Remark. ud reverses the meaning of a few verbs: Jpat, to fall = uppatati, to leap up, spring up.
Jnam, to bend = unnamati, to rise up, ascend.

as, like, up to (opposed to apa), below, less.

Jkaddh, to drag = upukaddhati, to drag or draw towards, to draw below or down.

wards, unto; vis., to help, upakāro, help, use; upakaranam, instrument, lit. doing with.

Jkam, to step, go = upakkamati, to attack, lit., to go towards.

ni (sometimes lengthened to nī, and before a vowel=nir) out, forth, down, into, downwards, in, under.

Jkam, to go = nikkhamati, to go out, to depart.

√dhā, to place = nidahati or nidheti, to deposit, hide.

I har, to take = niharati, to take out.

Ihan, to strike = nihanti, to strike down.

pa, onward, forward to, forth, fore, towards, with-It expresses: beginning.

√bhā, to shine = pabhāti, to shine forth, to dawn.

Pabhā, radiance.

√bhū, to be=pabhavati, to begin to be, vis., to spring up, originate.

√jal, to burn = pajjalati, to burn forth, to blaze.

back again, in return; to, towards; near.

Jbhas, to speak = patibhasati, to speak back, to

reply.

Jkhip, to throw=patikkhipati, to refuse. Patikkhepo, refusing.

Jkam, to step = patikkhipati, to step back, to

retreat.

para, away, back, opposed to, aside, beyond.

Jkam, to go = parakkamati, to strive, put forthe

√ji, to conquer=parājeti, to overcome.

pari, around, all around, about, all about, all over. Expresses completeness, etc.

Jear, to walk = paricarati, to walk around, vis., to serve, honour. Paricaro, attendance; paricea, having encircled (=pari+ \(\si i + \text{tya} \)).

√chid, to cut = paricehindati, to cut around=to limit, mark out.

√dhāv, to run = paridhāvati, to run about.

√jā, to know=parijānāti, to know perfectly, exactly.

vi, asunder, apart, away, without. Implies separation, distinctness, dispersion.

Achid, to cut = vicchindati, to cut or break

asunder = to break off, interrupt.

Jjā, to know=vijānāti, to know distinctly, to discern; vijānam, knowing.

Akir, to scatter=vikirati, to scatter about, to spread.

sam, with, along, together, fully, perfectly.

Jbhuj, to eat = sambhuñjati, to eat with.

Ivas, to live = samvasati, to live together with; samvaso, living with.

Remarks. It should be borne in mind that two, and sometimes three, of the above prefixes may combine. The most common combinations are—

vyā, written byā (=vi+ā); vyākaroti, to explain (Jkar); vyāpajjati, to fall away (Jpad, to go).

ajjho (=adhi+o, o=ava), ajjhottharati, to over whelm (Jthar, to spread).

ajjhā (=adhi+ā), ajjhāvasati, to dwell in (Jvas);

ajihāseti, to lie upon (si).

anupa (=anu+pa), anupakhādati, to eat into (\(\shrt{khād} \), anupabbajati, to give up the world (\(\shrt{vaj} \), to go).

anupari (Janu + pari), anuparidhāvati, to run upand down (Jdhāv); anupariyāti, to go round and round (Jyā).

anusam (= anu + sam) anusangito, chanted together

rehearsed; anusañcarati, to cross.

samud (= sam + ud), samukkamsati, to exalt: samucchindati, to extirpate (Achid); samudeti, to remove (Ji).

'samudā (=sam + ud +ā,) samudācarati, to address, practise (\(\sigma\); samudāhato, produced (\(\sigma\); samudāgamo, beginning (Jgam).

samupa (= sam + upa), samupeti, to approach (\(\sqrt{i} \);

samupagacchati, to approach.

samā (= sam + ā), samāharati, to gather (/har) : samāgamo, assembly (/gam).

samabhi (= sam + abhi), samabhisiñcati, to sprinkle

(Isiñc).

upasam (=upa+sam), upasamharati, to bring together (I har); upasamvasati, to take up one's abode in (Jvas, to live).

Remark. The student must be prepared to meet with some other combinations; the general meaning of a word can always be traced from the sense of the several combined prefixes.

517. It is important to note that the prefixes or prepositions are used, not only with verbs, but also with verbal derivatives, nouns and adjectives, as: anutire, along the bank; adhicittam, high thought; abhinilo, very black.

518. pari is often written : pali (72).

519. pari, vi and sam very often add merely an intensive force to the root.

520. After prefixes, sam, upa, para, pari, and the word bura, in front, Ikar sometimes assumes the form : khar. Ex.: purakkharoti, to put in front, to follow = pura + Jkar : parikkharo, surrounding = pari + Jkar.

521. A few adverbs are used very much in the sameway as the Verbal Prefixes, but their use is restricted to a few verbs only. They are—

avi = in full view, in sight, in view, manifestly, visibly. It is prefixed to the verbs: bhavati (Jbhū) and karoti (Jkar). Ex.: āvibhavati, to become manifest, visible, to appear, be evident; āvikaroti, to makemanifest, clear, evident; to explain, show.

antara = among, within, between, used with Idhā, to put, place. Ex.: antaradhāyati, to vanish, disappear, hide; antaradhāpeti, to cause to vanish or disappear.

attham (adv. and noun) = home; disappearance, disappearing, setting; used with verbs of going = to-set, disappear (of moon, sun and stars). Mostly used with the verbs gacchati and eti (Ji,) to go. Ex.: atthangacchati, to disappear, to set; atthameti, to set (of the sun).

pātu (before a vowel: pātur) = forth to view, manifestly, evidently, used with bhavati and karoti-Ex.: pātubhavati, to become manifest, evident, clear, to appear, to arise: pātubhāvo, appearance, manifestation; patukaroti, to manifest, make clear, evident; to produce.

pura, in front, forward, before, used almost exculsively with karoti: (cf. 520). Ex.: purakkharoti, to put or place in front, to appoint or make a person (one's) leader, and thence: to follow, to revere.

sense of decorating. Ex.: alankaroti, to adorn, embellish, decorate.

tire—out of sight; across, beyond, prefixed to roots kar and dha, in the sense of covering, hiding, etc. Ex.: tirodhapeti, to veil, to cover, put out of sight; tirodhanam, a covering, a veil; tirokaroti, to veil, to screen; tirokarani, a screen, a veil.

522. Prefixes du and su are never used with verbs.

(See Chapter on Adverbs) and prefix a (an), is very

seldom so used.

523. To finish this chapter on Verbs, we will now give the paradigm of a verb fully conjugated.

Jpac, to cook.

PRESENT SYSTEM.

(stem paca).

.2. pa	casi	pacatha	pacase	pacavhe
.3. pa	cati	· pacanti	pacate	pacare pacante
		Imper	ect.	
		I cooked	, etc.	
7. ap	aca	apacamhā	apacim	apacāmhase
apa	cam	apacamha		apacamhase
2. ap	aco	apacattha	apacase	apacavham
.3. ap	aca	apacu	apacattha	apacatthum

Imperative.

Let me cook, etc.

I.	pacāmi	pacāma	pace,	pacamāse
2.	pacāhi, paca	pacatha	pacassu,	pacavho
2.	pacatu.	pacantu	pacatam.	pacantam

Optative.

I should, would, could, can, etc., cook.

paceyyāmi paceyyāma paceyyam paceyyāmhe pace

paceyyāsi paceyyātha pacetho paceyyavho pace

paceyya paceyyum pacetha, paceram pace

Present Participle.

Mas. pacam	pacamāno
pacanto	pacāno
Fem. pacatī,	pacamānā
pacantī	pacānā
Pent, pacam	pacamānam
pacantam	pacānam

AORIST SYSTEM.

(Stem: pac).

Aorist.

I cooked, or, I have cooked, etc.

ı.	apacim	apacimhã	apaca	apacimhe
2.	apací	apacittha	apacise	apacivham
3.	apaci	apacum	apacā	apacum .
	apacī .	apacimsu	apacũ	apacimsu

Remarks. The augment a may be left out.

PERFECT SYSTEM.

(Stem : papac).

Perffect.

I cooked, etc.

1. papaca papaciyaha papaci papacimhe
2. papace papacittha papacittho papacivho
3. papaca papacu papacittha papacire

Perfect Participle Active.

Having cooked.

Act. Refl.

Mas. pacitavā pacitavā
pacitavanto pacitavanto
pacitāvī pacitavatī
pacitavantī pacitavantī
pacitavantī pacitavantī
pacitāvinī pacitāvinī

Neut. pacitavam pacitavam pacitavantam pacitavi pacitavi

Remarks. The Perfect Participle is the same for the Reflective as for the Active Voice. (For formation see 465).

FUTURE SYSTEM.

(Stem: pacissa).

Future.

I shall cook, etc.

1. pacissāmi, pacissāma pacissamh pacissāmhe pacissasi, pacissatha pacissase pacissavhe pacissati, pacissanti pacissate pacissante

Conditional.

If I could cook, etc.

apacissam apacissamhā apacissam apacissāmhase

2. apacisse apacissatha apacissase apacissavhe

3. apacissā apacissamsu apacissatha apacissimsu Future Participle.

Mas. pacissam

pacissamāno

pacissanto Fem. pacissatī pacissāno pacissamānā

pacissantī

pacissānā

Neut. pacissam
pacissantam

pacissamānam pacissānam

Infinitive : pacitum.

Gerund: pacitvā, pacitvāna, pacitūna, paciya

Fut. P.P.: pacitabba, pacaniya.

P.P.P.: pacita.

524. Paradigm of Jour, to steal.

Base: coraya or core.

Active.

PRESENT SYSTEM.

First form.

Second form.

(base, coraya). (base, core).

Present.

1.	corayāmi	corayāma	coremi	corema
2.	corayasi .	corayatha	coresi	coretha
2.	coravati	coravanti	coreti	corenti

Imperfect.

(from base coraya only).

1. acoraya	acorayamhā
acorayanı	acorayamha
2. acorayo	acorayattha
3. acorava	acorayu

Imperative.

1. corayāmi	corayāma	coremi	corema
2, corayāhi	corayatha	corehi	coretha
3. corayatu	corayantu	coretu	corentu

Optative

1.	corayeyyāmi	corayeyyāma	coreyyāmi	coreyvāma
2,	corayeyyāsi	corayeyyātha	coreyyāsi	coreyyātha.
-	coravevva	coraveyvurh	COLEANS	corevvuris

corayeyya corayeyyum coreyyum coraye

Present Participle.

Masc.	corayam	corayanto	corento
Fem.	corayati	corayantī	corentī
Neut.	corayan	corayantam	corentam

AORIST SYSTEM.

Aorist.

1. corayim	corayimhā coresim		coresimhā
	corayimha		coresimha
2. corayi	corayittha	 coresi 	coresittha
3. corayi	corayum	coresi	coresum
Fig. 15-	corayimsu		coresimsu

PERFECT SYSTEM.

The Perfect Tense of these verbs is not generally met with but it would be: cucora, cucore, cucorimha, etc).

Perfect Participle Active.

Mas. corayitavā

coritavā

coravitavanto

coritavanto

corayitāvī

corităvi

Fem. corayitavatī

coritavatī

corayitavantī

coritavantī

corayitāvinī

corităvinī

Neul. corayitavam

coritavam

corayitavantam

coritavantam

corayitāvi

corităvi

FUTURE SYSTEM.

Future.

1. corayissāmi, corayissāma coressāmi, coressāma

2. corayissasi, corayissatha coressasi, coressatha

3. corayissati, corayissanti coressati, coressanti

Conditional.

acorayissam

acorayissamhā

2. acorayisse

acorayissatha

3. acorayissā

acorayissamsu

FUTURE PARTICIPLE.

Active.

Masc. corayissam coressam

corayissanto coressanto

Fem. corayissati coressati

corayissanti corcssantī

Neut. corayissam coressam

corayissantam coressantam

res. Participle Reflective.

Masc. corayamano corayano Fem. corayamana corayana

Neut. corayamānam corayānam

Infinitive. corayitum, coretum

Gerund. corayitvā, coretvā

P. P. F. corayitabbo, coretabbo

P. P. P. corito, corita, caritam

525. The Reflective Voice presents no difficulty: it is generally formed on the base in aya:

Reflective.

Present. Imperfect.

Sing. Plur. Sing. Plur.

coraye corayāmhe acorayam acorayāmmhase

2, corayase corayavhe acorayase acorayavham

3. corayate corayante acorayattha acorayatthuris

Passive Voice.

526. The Passive Voice is formed in the usual way by joining ya to the base by means of vowel i lengthened to ī, the final vowel of base being dropped before ī.

EXAMPLES.

Present.

Singular.

Plural.

1. corīyāmi, I am robbed

corīyāma, we are

2. corīyasi, thou art robbed

coriyatha, you are robbed

3. corīyati, he is robbed

coriyanti, they are robbed

And so on for the other tenses.

527. The Causal and the Denominative Verbs are conjugated exactly like coreti.

528. The following paradigm will familiarize the student with the changes which take place in the principal forms of the Verb:

Root.	Special Base.	Active.	Reflective	Passive.	Causal.	Causal Passive.
pac, to cook paca	paca	paccati	pacate	paccate, paccati	paccate, paccati (paceti, pacapeti paccate, paccati	pāciyati pācāpiyati
Jda, to give	dadā	dadati	dadate	dīyate, dīyati	dapti, dapapeti	däpīyati
Jul, to lead	ne, naya	ne, naya neti, nayati nayate	nayate	nīyate, nīyati niyyati	nayayati, nayapeti nayapati	nayāpīyati
Jhan, to kill	hana	hanatî, han- hanate		haññate, haññati	hannate, hannati (haneti, hanapeti hanapayati	hanapiyati hanayiyati
Vkhad, to eat	khāda	khādati	khādate	khajjate, khajjati	khādate khajjate, khajjati (khādati, khādayati khādapīyati	khādapīyati khādāpīyati
Jiu, to cut	lunā	lunāti	lunate	lüyate, lüyati	laveti, lavayati	laviyati
Jbhū, to be	bhava	bhavati	bhavate	bhūyate, bhūyati	bhavate bhūyate, bhūyati [bhāvapeti, bhāvapati	bhāvīyati
Jabh, to get	labha	labhatí	labhate	labbhate, lab- bhati	(labbeti, labhayati (labhapeti, labhapayati	labhāpiyati
Jsu, to hear	suņā	suņāti	suņate	süyate, süyati	saveti, suņāpeti	savīyati
	oùns	suņoti				

CHAPTER XI. INDECLINABLES.

529. Under the term "indeclinables" are included all those words which are incapable of any grammatical declension, that is: Adverbs, Prefixes, Prepositions, Conjunctions and Interjections.

ADVERBS.

530. Adverbs may be divided into three groups :

- (i) Derivative Adverbs, formed by means of suffixes.
- (ii) Case-form Adverbs;
- (iii) Pure Adverbs.

(i) Darivative Adverbs.

- (a) These are formed by the addition to pronominal stems, and to the stems of nouns and adjectives of certain suffixes.
- (b) Under this head come the "Adverbial Derivatives from numerals" given in (279ff), and the "Pronominal Derivatives" given in (336ff). The student ought now to read again these two classes of Adverbs.
- (c) The suffix to (346) is also added to prepositions, nouns and adjectives, to form a very large class of adverbs; to is an ablative suffix (120) and therefore the adverbs formed with it have an ablative tense.
 - (i) from prepositions: abhito, near; parato, further.
 - (ii) from nouns: dakkhinato, southerly, on the south; pācīnato, easterly, on the east; pitthito, from the surface, from the back, etc.; pārato, from the further shore; orato, from the near shore.
 - (iii) from adjective; sabbato, everywhere.

- (d) suffixes tra and tha (346), showing place, are also used with adjectives: aññatha or aññatra, elsewhere; sabbatha, everywhere; ubhayattha, in both places.
- (e) suffix $d\bar{a}$ (345) is likewise used with adjectives and numerals: $ekad\bar{a}$, once; $sad\bar{a} = sabbad\bar{a}$, at all times, always.
- (f) dhi is used like dhā (281,283): sabbadhi, everywhere.
- (g) suffixes so and sā (122, e, d) likewise form adverbs: bahuso, in a great degree; atthaso, according to the sense: balasā, forcibly.
- (h) Iti (347) is extensively used as the particle of quotation; it is often abbreviated to ti. (Sce Syntax.)

532. Case-form Adverbs.

- (a) some cases of pronouns and adjectives are used adverbially.
- (b) Accusative Case. This case is very much used adverbially: kim, why; tam, there; idam, here; yam, because, since; from pronouns.
 - (c) From nouns: divasam, during the day; rattim, at night; raho, in secret; saccam, truly; attham, for the purpose of.
 - (d) From adjectives: ciram a long time; khippam, quickly; mandam, stupidly.
 - (e) Some adverbs of obscure origin may be classed as the accusative case of nouns or adjectives long obsolete: such are: mitho, mithu, one another, mutually; aram, presently; sajju, immediately; tunhī, silently; alam, enough; sāyam in the evening; isam, a little, somewhat; jātu, surely, certainly; bahi, outside.

The Instrumentive. This case also is much used adverbially.

From pronouns: tena, therefore; yena, because.

From nouns: divasena, in a day; māsena, in a month; divā, by day; sahāsā, suddenly.

From adjectives: circna, long; dakkhinena, to the south; uttarena, to the north; antarena, within.

The Dative Case; the adverbial use of the Dative is restricted: atthāya, for the sake of, for the purpose of; cirāya, for a long time; hitāya, for the benefit of.

The Ablative Case is used frequently in an adverbial sense; especially so is the case with pronouns,

kasmā, why? yasmā, because; tasmā, therefore; pacchā, behind, aster; ārā, afar off; helthā, below.

The Genitive Case is seldom used adverbially; from pronouns we have: kissa, why? from adjectives: cirassa, long; from nouns: hetussa, causally.

The Locative is very often used adverbially; as: bāhire, outside; dūre far; avidūre, not far; samīpe, santike, near; rahasi, privately, in secret; bhuvi, on earth, on the earth.

(iii) Pure Adverbs.

By these are understood the abverbs which are not obtained by derivation and which are not case-forms; such are:

kira, kila, they say, we are told that; hi, certainly indeed; khalu, indeed; tu, now, indeed; atha, atho and, also, then, etc., etc.

na, expressing simple negation; mā, expressing prohibition; mā is often used with the Aorist. Nanu,

used in asking questions to which an affirmative answer is expected. Nu, used in asking simple questions; no, not, nāna, surely, perhaps; nānā, variously.

The particle kva, where?

The above particles are called nipātā by the grammarians, they number about two hundred.

Verbal Prefixes have already been treated of (514).
INSEPARABLE PREFIXES.

(a) a, and before a vowel an, not, without, free from-

abhaya, free from fear; abāla, not foolish; apas-

santo, not seeing; anāloketvā, without looking.

(b) du, and before a vowel dur, bad, ill, hard, difficult, as: dubbanno (33 remark), ugly, ill-favoured; dubbinnto, ill-conducted; duddamo, difficult to tame; duggo, difficult to pass; dujjano, a bad man; dukkaro, difficult to perform; dujjīvam, a hard life.

(c) su, has the contrary meaning of du: good, well, easy, it implies excess, facility, excellence; subhāsito, well spoken; subahu, very much; sudanto, well tamed; sukaro, easy to perform; sulabho, easy to

be obtained.

Remarks. After du, the initial consonant is generally reduplicated; reduplication seldom takes place after su.

(d) sa, which is used instead of sam (516), expresses the ideas of "possession, similarity; with, and; like; including." sabhāriya, with (his) wife; salajja, having shame, ashamed; sabhogā, wealthy; savihārī living with; sadevaka, including the world of gods.

Remarks. The particle sa is the opposite of particle

a, an.

PREPOSITION.

- 533. It has been seen that Verbal Prefixes are properly prepositions and are used with nouns as well asverbs.
- 534. Many adverbs are used with a prepositional force along with nouns. Those of class (ii), Caseform-Adverbs, are seldom used as prepositions, except perhaps those in to.
- 535. Prepositions, or words used prepositionally, may govern any case, except the Nominative and Vocative.
- 536. Most of the Verbal Prefixes require the noun to be in one case or other.
- 537. The cases mostly used with prepositions or prepositional Adverbs are: the genitive, the instrumentive and the accusative.

But only a few are used separately from the nounthey govern.

For examples see "Syntax of Substantives."

CONJUNCTIONS.

- 538. Indeclinables distinctly conjunctive are very few. The principal are:
- (a) Copulative: ca, and, also, but, even. It is never used as the first word in a sentence; atha, and, then, now; atho, and, also, then.
- (b) Disjunctive: $v\bar{a}$ (never at the beginning of a sentence) or; uda, or; uda $v\bar{a}$, or; $v\bar{a}$ $v\bar{a}$, either....or; yadi $v\bar{a}$, whether; yadi $v\bar{a}$yadi $v\bar{a}$, whether.....or; atha $v\bar{a}$, or else, rather; na $v\bar{a}$, or not; $tath\bar{a}$ $p\bar{\imath}$, neve theless.

- (c) Conditional: yadi, sace, if; ce (never at the beginning of a sentence), if; yadi evam, yajj, evam, if so.
 - (d) Causal: ki, for, because; certainly.

INTERJECTION.

Ahaha, alas! oh! aho! ah! aho vata, oh! ah! are, sirrah! I say! here! dhi, dhī, shame! fie! woe! bho, friend! sir! I say! bhane, I say! to be sure! maññe, why! methinks! he, oh! sādhu, well! very well! very good!

General remarks. The use of some particles will be given in the chapter on Syntax.

CHAPTER XII.

- 539. Declinable stems are frequently joined to one another to form Compounds. In the older language compounds are simple and rarely consist of more than two or three stems: but the later the language is, the longer and the more involved they become.
- 540. Compounds may also have an indeclinable as the first member; there are even a few compounds made up entirely of indeclinables.

Remarks. The Case-endings of the first member or members of a compound are generally dropped; only in a few instances are they preserved.

- 541. There are six kinds of Compound Words:
 - (i) Dvanda—Copulative or Aggregative Compounds.
 - (ii) Tappurisa Dependent Derterminate Compounds.

- (iii) Kammadhāraya—Descriptive Determinate Compounds.
- (iv) Digu-Numeral Determinate Compounds.
 - (v) Abyayibhāva-Adverbial Compounds.
- (vi) Bahubbihi—Relative or Attributve Compounds.

Remarks. Native grammarians distribute the above into four classes by making Nos. iii and iv subdivisions of No. ii, Tappurisa; but this classification, through lack of sufficient distinctness, confuses the student unnecessarily. We shall therefore follow the above division (541).

Dvanda.

(Copulative or Aggregative Compounds) .:

542. The members of these compounds are co-ordinate syntatically, in their uncompounded state; each member would be connected with the other by means of the conjunction ca, and.

543. Dvanda Compounds are of two kinds:

 The compound is a plural and takes the gender and declension of its last member.

(ii) The compound takes the form of a neuter singular and, whatever the number of its members, becomes a collective. This is the case generally with the names of: birds, parts of the body, persons of different sexes, countries, trees, herbs, the cardinal points, domestic animals, things that form an antithesis, etc., etc.

Remarks. The following rules are given as to the order of the members of dvanda compounds:

(a) words in i and u are placed first;

(b) shorter words are placed before longer ones;

- (c) ī and ū (long) are generally shortened in the middle of the compound;
- (d) sometimes a feminine noun, in the middle of the compound, takes the masculine form (candimasuriyā) sometimes, or remains unchanged (jarāmaraņam).

EXAMPLES OF (i)

Samaṇā ca brāhmaṇā ca = samanabrāhmaṇā, samaṇas and brahmins.

Devā ca manussā ca = devamanussā, gods and men. Devānan ca manussānan ca = devamanussānan, of gods and men.

Candimā ca suriyo ca = candimasuriyā, the sun and the moon.

Aggi ca dhūmo ca = aggidhūmā, fire and smoke.

Dhammo ca attho ca = dhammattha, the spirit and the word.

Sāriputte ca Moggallāne ca = Sariputtamoggallāne, in Sariputta and in Moggallāna.

Examples of (ii)

 Note that the compounds which come under (ii), sometimes assume the form of the plural like those of No. (i).

Mukhanāsikam = mukhañ ca nāsikā ca, the mouth and the nose.

Chavimamsalohitam = chavi ca mamsan ca lohitan ca, the skin, flesh and blood.

Jarāmaraņam = jarā ca maraņañ ca, old age and death.

Hatthapādam or hattapādā == hatthā ca pādā ca, the hands and feet.

Hatthiassam = hatthino ca assā ca, elephants and

Kusalākusalam or kusalākusalā = kusalam akusalam ca, good and evil.

Vajjimallam or vajjimallā = Vajjī ca Mallā ca, the

Vajjians and the Mallians.

544. The compounds which take the plural form are called: Itaritara, because the members of the compound are considered separately; those that take the neuter singular form: samāhāra, because the several members are considered collectively; those that take either the plural or the neuter are called: Vikappasamāhāra.

Tappurisa.

(Dependent Determinate Compounds.)

545. In these compounds the first member is a substantive in any case but the Nominative and the Vocative, qualifying, explaining or determining the last member.

Remarks. (a) The Case-ending of the first member is elided:

(b) In a few cases, the Case-ending is not elided; these compounds are called: Alutta Tappurisa.

(c) The ā of such words as : rājā, mātā, pitā, bhātā

etc., is shortened in the first member.

(d) Generally, a tappurisa follows the gender of the last member.

(i) tappurisa with accusative case. (Dutiya Tappurisa).

Araññagato = araññam gato, gone to the forest. Sukhappatto = sukham patto, attained happiness. Saccavādi = saccam vādi, speaking the truth.

Kumbhakāro = kumbham kāro; a pot-maker = a potter.

Pattagāho = pattam gāho, receiving a bowl. Atthakāmo = attham kāmo, wishing the welfare of.

(ii) tappurisa with instrumentive case.
(Taliya Tappurisa.)

Buddhabhāsito = Buddhena bhāsito, spoken by the Buddha.

. Viññugarahito=viññûhi garahito, censured by the wise.

Sukāhaṭam = sukehi āhatam, brought by parrots. Jaccandho = jātiya andho, blind by (=from) birth. Urago = urena go, going on the breast = a snake. Pādapo = pādena po, drinking with the foot (root) = a

tree.

Remarks. In some tappurisa compounds, a word, necessary to express properly the full meaning, is altogether elided.

Gulodano = gulena samsattho odano = rice mixed with molasses.

Assaratho = assena yutto ratho = a carriage yoked with horses = a horse-carriage

Asikalaho = asinā kalaho, a combat with swords.

(iii) tappurisa with dative case.

(Catutthī Tappurisa.)

Remarks. In these compounds, the last member designates the object destined for or attributed to that which is expressed by the first member.

Kathinadussam = kathinassa dussam, cloth for the kathina robe (the kathina robe is a robe woven within a single day as a meritorious act, on a fixed day, each year).

Sanghabhattam = sanghassa bhattam, rice (prepared) for the clergy.

Buddhadeyyam = Budhassa deyyam, worthy to be

offered to the Buddha.

Rājāraham = rañno araham, worthy of (lit. to) the king.

(b) Compounds formed by adding kāmo "desirous of," to an infinitive are considered to be tappurisas in the Dative relation * as:

Kathetukāmo = kathetum kāmo, desirous to speak. Sotukāmo = sotum kāmo, desirous to hear. Gantukāmo = gantum kāmo, desirous to go.

(iv) tappurisa with ablative case.

(Pañcamī Tappurisa.)

Remarks. These express: fear of, separation or going away from, freedom from, etc.

Nagaraniggato = nagaramhā niggato, gone out from town.

Rukkhapatito=rukkhasmā patito, fallen from the tree.

Sāsanacuto = sāsanamhā cuto, fallen away from religon.

Corabhito = cora bhito, afraid of the thief.

Pāpabhīruko = pāpato bhīruko, fearing sin.

Pāpajigucchi = pāpato jigucchī; loathing evil.

Bandhanamokkho=bandhanasmā mokkho, freedom from bonds or fetters.

Lokaggo = lokato aggo, greater than the world.

Mātujo = mātito jo, born from a mother.

(v) tappurisa with genitive case. (Chatthi Tappurisa)

Remarks. (a) Tappurisas in the Genitive relation are by far the most common.

- (b) Final i and \bar{u} of the first member are as a rule shortened to i and u respectively.
- (c) The word: ratti, night, takes the form rattans at the end of a tappurisa.

Răjaputto = rañño putto, the king's son, a prince. Dhaññarāsi = dhaññānam rāsi, a heap of grains.

Naditīram = nadiyā tīram, the river-bank (from nadī).

Bhikkhunisangho = bhikkuninam sangho, the assembly of the nuns (from bhikkhuni).

Naruttamo = naranam uttamo, the greatest of men.

(vi) tappurisa with locative case.

(sattamī tappurisa.)

Araññavāso = araññe vāso, living in the forest. Dānajjhāsayo = dāne ajjhāsayo, inclined to almsgiving.

Dhammarato = dhamme rato, delighting in the Law.

Vanacaro = vane caro, walking in the woods.

Thalattho=thale tho, standing on firm ground.

Pabbatattho=pabbatasmim tho, standing on a mountain.

Anomalous Tappurisa.

(a) Sometimes the first member of a Tappurisa is placed last:

Rājahamso=hamsānam rājā, the swan-king, but also: hamsarājā.

Alutta Tappurisa.

(b) In these the Case-endings are not dropped:

Pabhankaro=pabham karo, making light=the sun.

Vessantaro = vessam taro, crossing over to the merchants (a king's name).

Parassapadam = parassa padam, word for another = Active Voice.

Attanopadam = attano padam, word for ones self = Reflective Voice.

Kutojo = kuto jo, sprung whence?

Antevāsiko = ante vāsiko, a pupil within = a resident pupil.

Urasilomo = urasi (loc.) lomo, having hair on the breast = hairy-breasted.

The student will remark that the case of the first member may be any case but the Nominative and Vocative.

546. (iii) Kammadhāraya.

Descriptive Determinate Compounds.

Remarks. (a) In Kammadhāraya Compounds, the adjective: mahanta assumes the form: mahā, and if the consonant which follows is reduplicated, the form: maha.

- (b) The word: santa, good, being, takes the form: sa (Sans, sat).
 - (c) The word: puma, a male, rejects its final a.
- (d) When the two members of a Kammadharaya are feminine, the first one assumes the form of the masculine.

- (e) The Prefix na, not, is replaced by a before a consonant, and by an before a vowel.
- (f) Prefix ku, meaning bad, little, may become ka before a consonant, and kad before a vowel.
- (g) In their uncompounded state, the two members of a Kammadharaya are in the same case.
- (i) The Kammadhäraya Compound (which is alsocalled: Missakatappurisa) is divided into nine classes:
- (t) Visesanapubbapada Kammadhāraya, in which the determining or qualifying word is placed first, as:

Mahāpuriso = mahanto puriso, a great man.

Mahānadī = mahantī nadī, a large river.

Mahabbhayam = mahantam bhayam, great fear.

Aparapuriso = aparo puriso, the other man.

Kanhasappo = kanho sappo, a black snake.

Nīluppalam = nīlam uppalam, a blue lotus.

(2) Visesanaparapada, or Visesanuttarapada-Kammadhāraya; in this, the second member determines the first.

Narasettho = naro settho, the oldest man.

Purisuttamo = puriso uttamo, the greatest man.

Buddhaghosācariyo = Buddhaghoso ācariyo, the teacher Buddhaghosa.

Săriputtathero = Săriputto thero, the Elder Săriputta.

(3) Visesanobhayapada-Kammadhāraya, the two members of which are determinate.

Remarks. A word, as for instance, so, he, is generally understood between the two members of these compounds.

Sītuņham = sītam (tañ ca) uņham, heat and cold.

Khañjakhujjo = khañjo (ca so) khujjo, (he is) lame (and) hump-backed.

Andhabadhiro=andho (ca so) badhiro, (he is) blind (and) deaf.

Katākatam = katam (ca tam) akatam, (what is) done (and) not done.

(4) Sambhāvanāpubbapada-Kammadhāraya; in which the first member indicates the origin of the second term, or the relation in which the second term stands to the first. In these compounds such words as: ili, namely, thus, called; evam, thus, called; sankhāto, called, named, hulvā, being, are generally understood, in order to bring out the full meaning of the compound.

Hetupaccayo = hetu (hutvā) paccayo, the term (middle term) being, or considered as, the cause = the term which is the cause or condition.

Aniccasaññā=anicca iti saññā, the idea, namely, Impermanence.

Hīnasamato = hīno hutvā samato, equal in being low, unworthy.

Dhammabuddhi = dhammo iti buddhi, knowledge (arising from) the Law.

Attadithi = attā iti ditthi, the (false) doctrine of personal identity.

(5) Upamā or Upamānuttarapada-Kammadhāraya, in these compounds, analogy is expressed between the two terms. The word: viya, like, is understood between the two members.

Buddhādicco = ādicco viya Buddho, the sun-like-Buddha.

Munisiho = siho viya muni, lion-like-sage, lionsage.

So.

Munipungavo, sage-bull.

Buddhanago, Buddha-elephant.

Saddhammaramsi = ramsi viya saddhammo, Lightlike-Good Law, the Light of the Good Law.

Remarks. The words: ādicca, sun, sīha, lion; pungava, usabha, bull; nāga, elephant, are frequently used as in the above examples, to denote: superiority, greatness, excellence, eminence, so that Buddhādicco may be translated: the eminent Buddha; munisīho, the great sage; munipungavo, the eniment sage, etc., etc.

(6) Avadhāranapubbapada-Kammadhāraya, in which the first member specifies a general term. Native grammarians, in resolving these compounds, insert the word: eva, just, even (but which in these examples cannot be translated into English) between the two terms of the compounds. In English, these compounds must be translated as if they were in the Genitive relation.

Guṇadhanam = guṇoe vadhanam, wealth of virtues. Sīladhanam = sīlam eva dhanam, treasure of morality or of piety.

Paññāsattham = paññā eva sattham, the sword of wisdom.

Paññāpajjoto = paññā eva pajjoto, the lamp of wisdom.

Avijjāmalam = avijjā eva malam, the stain of ignorance.

(7) Kunipālapubbapada-Kammadhāraya, the first member of which is: ku, (see, f).

Kuputto = ku + putto, a bad son.

Kudāsā = ku + dāsā, bad slaves.

Kadannam = kad + annam, bad food.

Kāpuriso = kā + puriso, a bad man.

Kadariyo=kad+ariyo, badly noble=not noble=ignoble=miserly, stingy.

Kalavanam = ka + lavanam, a litle salt.

(7) Nanipātapubbapada-Kammadhāraya, (see e).

Anariyo = na +ariyo, ignoble.

Anīti = na + īti, free from calamity = secure.

Anūmi = na + ūmi, not having waves, waveless.

Anatikkamma = na + atikkamma (gerd.) not transgressing or trespassing.

Anatthakāmo = na + atthakāmo, not wishing for the welfare of.

(9) Pādipubbapada-Kammadhāraya, in which the first member is pā, pa, or any other prefix.

Pāvacanam = pā + vacanam, the excellent word = Buddha's word.

(Native grammarians take $p\bar{a}$ to be the abbreviation of the word: pakattho = excellent).

Pamukho = pa + mukho (having the face towards), facing, in front of, chief.

Vikappo = vi + kappo(thought, inclination), option.

Atidevo=ati+deva, Supreme deva or God.

(Note that devā becomes : devo),

Abhidhammo = abhi + dhammo (Law, doctrine) = transcending Doctrine = Metaphysics.

Uddhammo=ud+dhammo, wrong or false doctrines.

Ubbinayo = ud + vinayo (Discipline for the monks) = wrong Discipline.

Sugandho=su+gandho, good smell=fragrance. Dukkatam=du+katam, a bad, sinful act.

547 Nouns in Apposition.

Nouns in Apposition are considered to be Kammadhāraya Compounds.

Vinayapitakam, the Vinaya-Basket (a part of the Buddhist Scriptures).

Angajanapadam, the Province of Bengal. Magadharattham, the Kingdom of Magadha.

Citto gahapati, Citta, the householder.

Sakko devarājā, Sakka, the Lord of gods.

Remark. Sometimes the last member of a Kammadhāraya, being feminine, assumes the masculine form. As:

Dighajangho = dighā + janghā (feminine), longlegged.

548.

Digu (iv).

(Numeral Compounds).

There are two kinds of Digu:

(i) Samāhāra Digu, which being considered as collective, takes the form of the neuter singular in m.

(ii) Asamāhāra-Digu, when the Digu does not express a whole, but the objects indicated by the last member are considered individually, the compound, as a rule, taking the form of the plural.

Remarks. (a) Some words, when last member of a Digu, change their final vowel to a, if it be any other than a.

(b) The stems only of the numerals are used as first members.

(i) SAMAHARA-DIGU.

Tilokam, the three worlds (collectively).

Tiratanam, the Three Jewels (collectively).

Catusaccam, the four Truths (collectively).

Sattāham = satta + aham (day), seven days = a week - Pañcasikkhāpadam, the five Precepts (collectively) - Dvirattam = dvi + ratti, two nights (remark a).

Pañcagavam = pañca + gavo, (remark a).

Tivangulam = ti + v (inserted, 28) anguli, three fingers.

Navasatam, nine hundred.

Catusahassam, four thousand.

(ii) ASAMAHARA-DIGU.

Tibhavā, the three states of existence.
Catudisā, the four-quarters.
Pancindriyāni, the five senses = panca + indryāni.
Sakaṭasatāni = sakaṭa + satāni, one hundred carts.
Catusatāni, four hundred.
Dvisatasahassāni, two hundred thousand (dvi sata sahassāni).

549. (v) Adverbial Compounds. (Abyayibhāva.)

Remarks. (a) These compounds have for first member an indeclinable (529 ff).

(b) The Abyayibhāva generally assumes the form of the accusative singular in m, and is indeclinable.

(c) If the final vowel of the last member is ā long, ā is replaced by am; other long vowels (except ā), are shortened.

(i)

Upagangam = upa + gangāyam (loc.), near the Ganges.

Upanagaram = upa + nagaram, (loc.), near the town. Upagu = upa + gunnam (plural,) close to the cows.

Anuratham = anu + rathe, behind the chariot.

Yāvajīvam = yāva + jīvā (abl.), as long as life lasts. Antopāsādam = anto + pāsādassa, within the palace. Anuvassam = anu + vassam, year after year = every year.

Anugharam = house after house = in every house.
Yathābalam = yathā + balena, according to (one's)
power.

Pativatam = pati + vatam (acc.) against the wind.

Tiropabbatam = pabbatassa tiro, across the mountain-Uparipabbatam = pabbatassa + upari, upon the

Paţisotam = sotassa + paţilomam, against the stream Adhogangam = gangāya + adho, below the Ganges Upavadhu = upa + vadhu, near (his) wife.

Adhikumāri = adhi + kumāri, the young girl.

mountain.

(ii)

Sometimes, however, the case-ending is retained; the case thus retained being mostly the Ablative and the Locative. But in most cases, the neuter

form is also met with for the same compound. The Ablative termination may be retained when the indeclinable is: pari, apa, ā, bahi, yāva, etc.

Yāvajivā or yāvajivani-as long as life lasts.

Apapabbatā or Apapabbatam—away from the mountain.

Bahigāmā or bahigāmam-outside the village.

Abhavaggā or ābhavaggam—to the highest state of existence.

Purāruņā or purāruņam (=aruņamhā pure), before daylight.

Pacchābhattā, or pacchābhattam, after meal.

Tiropabbatā or tiropabbate (loc.) or tiropabbatam, beyond, on the other side of, the mountain.

Anto-avicimhi (loc.), in hell.

Anutire, along the bank.

Antaravithiyam (loc.) in the street.

Bahisāņiyam (loc.), outside the curtain.

550. (vi) Relative or Attributive Compounds. (Bahubbīhi).

Remarks. (a). A Bahubbīhi Compound, when resolved into its component parts, requires the addition of such relative pronouns as: "he, who, that, which," etc., to express its full meaning; a Bahubbīhi is therefore used relatively, that is, as an adjective, and, consequently, the final member assumes the forms of the three genders, according to the gender of the noun which it qualifies. A Bahubbīhi is equal to a relative clause.

(b) All the Compounds explained above (Dvanda, Tappurisa, Kammadhāraya, Digu, Abyayibhāva), become, if used as adjectives, Bahubbīhi Compounds.

- (c) Bahubbihi being adjectives qualifying nouns, must agree in gender, number and case with the noun which they qualify.
- (d) It follows from (c) that a Bahubbīhi may be in any case relation but the Vocative.

The following are the different kinds of Bahubbīhi.

(1) Pathama-Bahubbihi, Relative in the Nominative Case.

Chinnahattho puriso = hand-cut-man = a man whose hands have been cut off:

Here, chinnahattho, is the Bahubbihi qualifying the noun puriso.

Lohitamakkhitam mukham = lohitena makkhitam mukham, the mouth besmeared with blood; lohitamakkhitam is the Bahubbihi.

Susajjitam puram, a well-decorated city; susajjitam is the Bahubbihi.

(2) Dutiyā-Bahubbīhi, Relative in the Accusative Case; that is, the Bahubbīhi gives to the word which it determines or qualifies the sense of the Accusative-relation.

Agatasamano sanghārāmo = imain sanghārāmain samano āgato, this monastery the priest came to = the monastery into which the priest came; Agatasamano = Bahubbīhi.

Ārūļhanaro rukkho=so naro imam rukkham ārūļho, the ree up which the man climbed. Ārūļhanaro=Bahubbīhi.

(3) Tatiya-Bahubbīhi, Relative in the Instrumentive Case in which the Bahubbīhi gives to the word it determines the sense of the Instrumentive relation.

Jitindriyo samano = yena jitani indriyani so samano, the samana by whom the senses have been conquered. Jitindriyo = Bahubbihi.

Vijitamāro Bhagavā = so Bhagavā yena Māro vijito, the Blessed One by whom Māra was vanquished = the Blessed One who vanquished Māra. Vijitamāro = Bahubībhi.

(4) Catutthī-Bahubbīhi, Relative in the Dative relation, that is, in which the Bahubbīhi gives to the word it determines the sense of the Dative relation.

Dinnasuńko puriso = yassa suńko dinno so, he to whom tax is given. Dinnasuńko = Bahubbīhi.

Upanītabhojano samaņo =so samaņo yassa bhojanam upanītam, the priest to whom food is given. Upanītabhojano = Bahubbīhi.

(5) Pañcamī-Bahubbīhi, Relative in the Ablative Case in which the compound gives to the word determined the sense of the Ablative relation.

Niggatajano gāmo = asmā gāmasmā janā niggatā, that village from which the people have departed=an abandoned village. Niggatajano= Bahubbīhi.

Apagatakāļakam vattham = idam vattham yāsmā kāļakā apagatā, the cloth from which (the) black spots have departed = a cloth free from black spots. Apagatakāļakam = Bahubbīhi.

(6) Chatthī-Bahubbīhi, Relative in the Genitive Case in which the compound gives to the word it determines the sense of the Genitive relation.

Chinnahattho puriso = so puriso yassa hattho chinno, the man whose hands are cut off. Chinnahattho = Bahubbihi.

Visuddhasīlo jano = so jano yassa sīlam visuddham, that person whose conduct is pure=a moral person. Visuddhasīlo = Bahubbīhi.

(7) Sattamī- Bahubbihi, Relative in the Locative Case, that is, in which the Bahubbīhi gives to the deter-

mined word the sense of the Locative Case.

Sampannasasso janapado = yasmim janapade sassāni sampannāni, a district in which the crops are abundant = a fertile district. Sampannasasso = Bahubbīhi.

Bahujano gāmo = yasmim gāme bahū janā honti, a village in which are many persons a populous village, Bahujano Bahubbihi.

(c) The word determined by the Bahubbihi Compound is as often understood as expressed; for example:

Dinnasunko (4) = he who receives taxes = a taxcollector.

Jitindriyo (3) = he who has subdued his senses.

Lohitamakkhito (1)=besmeared with blood.

Sattahaparinibbuto = dead since a week.

Somanasso=joyful (lit,. he to whom joy has arisen).

Chinnahattho (6) = he whose hands have been cut off.

Māsajāto = a month old (lit., he who is born since one month).

Vijitamāro (3) = he who has conquered Māra = the Buddha.

(f) In some Bahubbihi, the determining word may be placed either first or last without changing the meaning:

> Hatthachinno or chinnahattho. Jātamāso or māsajāto.

(g) Feminine nouns ending in $\bar{\imath}$, \bar{w} as well asstems ending in tu (= $t\bar{a}$, see, 163, words declined like satth \bar{a} ,) generally take the suffix ka, when they are the last member of a Bahubb $\bar{\imath}$ hi; possession is then implied:

Bahukattuko deso=a place in which there are

many artisans.

Bahukumārikam kulam = a family in which there are many girls.

Bahunadiko janapado = a district wth many rivers.

Note that long \(\tilde{\ta}\) is shortened before ka; the same remark applies to long \(\tilde{\ta}\).

(h) When a feminine noun is the last member of a Bahubbihi, it takes the masuline form if determining a masuline noun, and the first member, if also feminine, drops the sign of the feminine:

dīghā janghā, a long leg; dīghajanghā itthī, a long-legged woman, but: dīghajangho puriso,

a long-legged man.

(i) The adjective mahā, may be used as the first member of a Bahubbīhi: mahāpañňo, of great wisdom, very wise.

(j) Sometimes ā is added to the words: dhanu, a bow; dhamma, the Law, and a few others when last members of a Bahubbīhi:

Gandhivadhanu = gandhivadhanvā (27,ii), Arjuna, he who has a strong bow.

Paccakkhadhammā, but also paccakkhadhammo = to whom the Doctrine is apparent.

551. The student will have remarked that all the examples given above of Bahubbihi, are Digu, Tappurisa, Kammadhāraya, Dvanda, Abyayibhāva. used relatively. To make the matter clearer, however, a few examples are here given.

Dvanda used relatively.

Nahātānulitto, bathed and anointed.

Kusalākusalāni kammāni, good and bad actions.

Tappurisa used relatively.

Buddhabhāsito dhammo=the Doctrine spoken by the Buddha=Buddhena bhāsito dhammo.

Sotukamo jano = a person desirous to hear = one desirous to hear.

Nagaraniggato = one or he who has gone out of town.

Kammadhārayu used relatively.

Gunadhano=rich in virtues.

Sugandho=fragrant.

Khanjakhujjo puriso=a lame and hump-backed man.

Dighu used relatively.

Dvimulo rukkho=a two-rooted tree.

Pañcasatāni sakatāni = five hundred carts.

Sahassaramsi=the thousand-rayed =the sun.

Abyayibhāva used relatively.

Saphala = saha phala = fruitful (lit., having fruits). Savāhano Māro = Māra with his monture.

Niraparādho Bodhisatto=the faultless Bodhisatta.

Upapada Compounds.

552. When the second member of a Dutiyā-Tappurisa Compoundisa Kita noun or Primary derivative (see Chapter XIII—Primary and Secondary Derivation), and the first member a noun in the Accusative relation, the compound is called Upapada. Such a compound may therefore be called indifferently: upapada or upapadatappurisa, or simply: tappurisa.*

^{*} Naruttidipani-

EXAMPLES.

Atthakāmo = attham kāmo, wishing for the welfare of (kāmo is a kita derivative).

Kumbhakāro = kumbham kāro, a pot-maker = a potter (kāro is a kita derivative). So:

Pattagāho = pattam gāho, receiver of the bowl.

Rathakāro = ratham kāro = carriage maker = cartwright.

Brahmacārī, = brahmam cāri, one who leads the higher life.

Dhammaññū=dhammam ñū, he who knows the Law.

Anomalous Compounds.

553. A few compounds are found which are quite anomalous in their formation, that is, they are made up of words not usually compounded together. These compounds must probably be considered as of very early formation, and be reckoned amongst the oldest in the language. We give a few examples:

Vitatho=vi+tathā, false, unreal.

Yathātatho = yathā + tathā, real, true, as it really is.

Itihā (=iti, thus + ha—lengthened to ā)=thus indeed=introduction, legendary lore, legend.

Itihāsa (=iti, thus+ha, indeed+āsa, was)=thus indeed it was=itihā.

Itihītihā (=itiha+itihā)=itihā, itihāsa.

Itivuttam (=iti, thus + vultam P.P.P. of vatti, to say)=thus it was said. Name of a book of the Buddhist Scriptures.

Itivuttaka (=iti+vuttam+ka—suffix)=itivutta.
A ññamaññam (=aññam+aññam), one another.

Paramparo (=param + para) = successive.

Ahamahamikā (= aham, I+aham + ika—suffix), egoism, arrogance, the conceit of superiority; lit, connected with: I).

Complex Compounds.

554. Compounds, as above explained, may themselves become either the first or the last member of another compound, or two compounds may be brought together to form a new one, and this new one again may become a member of another compound, and so on to almost any length, thus forming compounds within compounds. These compounds are almost used relatively, that is, they are Bahubbīhi. The student ought to bear in mind that, the older the language is, the fewer are these complex compounds, and the later the language, the more numerous do they become; it therefore follows that long compounds are a sign of decay and, to a certain extent, a test as to the relative age of a text.

EXAMPLES.

Varanarukkhamüle, at the foot of the varana tree, is a tappurisa compound in the genitive relation, and is resolved as follows:

varanarukkhassa mūle; varanarukkhassa iş itself a kammadhāraya compound = varana eva rukkha. It is therefore a tappurisa compound, the first member of which is a kammadhāraya compound.

Maranbhayatajjito, terrified by the fear of death, a bahubbīhi qualifying a noun understood, and is a tappurisa in the instrumentive relation:

maranabhayena tajjito; maranabhaya is itself a tappurisa in the Ablative: marana bhaya.

Sīhalatthakathāparivattanam, the translation of the Singhalese Commentaries, is first: a tappurisa compound = Sīhalatthakathāya parivattanam, second, another tappurisa: Sīhalāya aṭthakathā = the Commentaries of Ceylon = the Singhalese Commentaries.

Aparimitakalasancitapunnabalanibbattaya, produced by the power of merit accumulated during an immense (period of) time, the whole is a bahubbihi feminine in the Instrumentive. We

resolve it shortly:

Aparimitakālasañcitapuññabala, a tappurisa determining nibbattāva:

Aparimitakālasañcitapuñña, akammadhāraya determining bala;

Aparimitakālasañcita, a kammadhāraya de-

termining puñña.

Aparimitakāla, a kammadhāraya determining sancita; lastly, aparimita is a kammadhāraya = a + parimita. In its uncompounded state it would run as follows: aparimite kāle sancitassa punnassa balena nibbattāya.

Remark. The student should follow the above method in resolving compounds.

Changes of certain words in compounds.

555. Some words, when compounded, change their final vowel; when last members of a bahubbihi, they, of course, assume the endings of the three genders, according to the gender of the noun they determine. The most common are here given:

Go, a cow, bullock, becomes, gu, gavo or gavam; pañcagu, bartered with five cows (pañcahi gohi kīto); rājagavo, the king's bullock (raňňo go); dāragavam, wife and cow (dāro ca go); dasagavam, ten cows.

Bhūmi—place, state, stage, degree, storey, becomes bhūma: jātibhūmam, birth-place (jātiyā bhūmi); dvibhūmam, two stages (dvi bhūmiyo); dvibhūmo, two-storeyed. Ka, is sometimes superadded, as: dvibhūmako = dvibhūmo.

Nadī—a river, is changed to nada: pañcanadam, five rivers; pañcanado, having five rivers.

Anguli - finger, becomes angula (see, 548, a).

Ratti—night, is changed to ratta (see, 548, a); here are a few more examples: digharattam, for a long time (lit., long nights=dighā rattiyo); ahorattam, day and night (aho ratti); addharatto: midnight (rattiyā addham=the middle of the night).

Akkhi—eye, changes to akkha; visālakkho, largeeyed (visālāni akkhīni yassa honti); virūpakkho,
having horrible eyes, name of the Chief of the
Nāgas (Virūpāni akkhīni yassa—to whom (are)
horrible eyes); sahassakkho, the thousand-eyed
— a name of Sakka (akkhīni sahassāni yassa);
parokkham, invisible, lit., "beyond the eye"
(akkhīnam tirobhāgo).

Sakhā—(masc.)—friend, companion, becomes sakho vāyusakho, the breeze's friend=fire (vā-yuno sakhā so); sabbasakho, the friend of all (sabbesam sakhā).

Attā—self, one's self becomes atta, pahitatto, resolute, whose mind is bent upon = lit., directed towards (pahito pesito atta yena, by whom the mind is directed upon); thitatto, of firm mind (thito atta assa, whose mind is firm).

Pumā = male, a man, becomes pum, and final m is assimilated to the following consonant according to the usual rules: pullingam, the male sex: manhood, the masculine gender (pum + lingam, characteristic, sign); punkokilo, a male cuckoo. (pum + kokilo).

Saha—with, is abbreviated to sa, which is placed at the beginning of compounds. ka is sometimes super-added: sapicuka, of cotton, with cotton, as —sapicukam mandalikam, a ball of cotton = cotton ball; sadevako, with the deva worlds; saha is used in the same sense: sahodaka, with water, contain-

ing water (saha udaka).

Santa—good, being, is also abbreviated to sa (see, 546, b) sappurisa, a good man; sajjano, well-

born, virtuous (sa + jana, a person).

Samāna—same, similar, equal, is likewise shortened to sa: sajāti or sajātika, of the same species, of the same class (samānajāti); sajanapado, of, or belonging to, the same district (samānajanapado); sanāmo, of the same name (samāno nāmo); sānābhi, of the same navel=uterine.

Mahanta-becomes mahā (see 546, a).

Jāyā—wife, takes the forms jāni, jam, tudam, * jayam, before the word pati, lord, husband: jāyāpati, jayam_pati, jānipati, jampati, tudampati = husband and wife.

^{*} The Niruttidipani has the following interesting note on the word tudam: "Yatha ca Sakkataganthesu 'daro ca pati ca dampati,ti.' And, lower down: "Tattha 'tu' saddo padapūraņamatte yujjati." (p. 186.)

Verbal Compounds.

556. Many nouns and adjectives are compounded with √kar, to do, and √bhū, to be, or with their derivatives very much in the manner of Verbal Prefixes.

557. The noun or adjective stems thus used change

final a or final i to 1.

EXAMPLES.

dalha, hard, firm; dalhīkaroti, to make firm;

dalhīkaranam, making firm, strengthening.

bahula, abundant, bahulikaroti, to increase, to enlargebahulikaranam, increasing,

bahulikato, increased.

bhasma, ashes, bhasmibhavati, to be reduced to ashes.

bhasmibhūto, reduced to ashes.

CHAPTER XIII.

558. We have now come to a most important part of the grammar: the formation of nouns and adjectives, otherwise called Derivation.

559. In Pali, almost every declinable stem can be

traced back to a primary element called: Root.

560. A root is a primitive element of the language, incapable of any grammatical analysis, and expressing an abstract idea. It is common in European languages to express the idea contained in the root by means of the Infinitive, for instance, I gam, to go; but it must be borne in mind that the root is not an infinitive nor indeed a verb or a noun but simply a primary element expressing a vague indefinite idea. This indefinite idea is developed out of the root and is made to ramify into a diversity of meanings, both abstract and concrete, by means of suffixes.

561. The roots of the Pali language, with slight

variations in form, easily recognizable to the trained eye, are common with those of Sanskrit and consequently with many of the roots of the Indo-European languages.

562. Every true root is monosyllabic as: nas, to perish; $bh\bar{u}$, to shine; ruh, to grow; pac, to cook. Roots which have more than one syllable are the result of (a) the union of a Verbal Prefix with the root itself, both having become inseparable in the expression of a particular idea; for instance; \sqrt{sangam} , to fight =sam + \sqrt{gam} , lit., to come together, to close in upon; and (b) of reduplication (372ff) as \sqrt{j} agar, to be wakeful, from \sqrt{gar} (Sanks. \sqrt{gr}), to awake.

563. There are two great divisions of Derivation:

(i) Kita (krt), or Primary.

(ii) Taddhita, or Secondary.

564. Primary Derivatives are formed from the root itself; Secondary Derivatives from the Primary Derivatives.

565. Native grammarians recognise a third derivation, which they call: unādi (un +ādi), from the suffix un by which a few words are derived. But the unādi derivation is very arbitrary, and the connection between the noun and the root is not clear, either in meaning or in form. These unādi derivatives are included in the Kita-Derivation; unādi suffixes are therefore included in the Kita-Suffixes and will be distinguished by an asterisk (*).

566. We shall, therefore, in the present chapter, treat of Primary and Secondary Derivations. A few hints only will be given on the unadi Derivation.

567. When suffixes, both primary (kita) and secondary (taddhita) are added to roots, nouns or adjectives guna (103ff) frequently takes place; that is, a may be lengthened to \bar{a} , and i and u be respectively changed to e and o.

- 568. Whenever guna takes place by the addition of a suffix, native grammarians put an indicatory sign before or after the suffix to show that guna is to take place; this indicatory sign is generally the letter n and sometimes the letter r. For instance: $\int cur$, to steal + suffix na = cora, a thief. Here the true suffix is a, the letter n being simply indicatory that guna change must take place; again, $\int kar$, to do + na = kara, a doer. But $\int kar + suffix a = kara$, a doer; in this last example no guna takes place, and, therefore, the suffix has not the indicatory sign. This sign is called by grammarians: anubandha. It is therefore clear that the anubandha or 'indicatory sign of guna' is not a part of the suffix.
- 569. European grammarians do not as a rule note the anubandha, but in this book it will be noted and put within brackets, and in small type, after the true suffix, thus (n)a, or kā (n). The true suffixes will come first, printed in hold type.
- 570. Again, some suffixes are shewn by native grammarians by means of some conventional signs: for instance: nvu is the conventional sign for suffix aka; yu, for suffix anam. Such conventional signs will be shewn within brackets after the true suffix; as: anam (yu); this means that anam is the true suffix, yu the conventional sign used by native grammarians to represent the suffix anam.
- 571. It must be remembered that sometimes even some of the prefixes explained in (514ff) undergo guņa, as: virajja+ka = verajjaka; paṭipada+ (n) a = pāṭi-padā; vinaya+(n) ika=venayika.

572. Before some suffixes (generally those with the indicatory n) final c of the root is changed to k, and final j to g; as, $\sqrt{pac+(n)}$ a=pāka, a cook; $\sqrt{ruj+(n)}$ a+roga, disease.

573. The final vowel of a stem may be elided before suffix.

574. The rules of sandhi and assimilation are regularly applied.

(i) Primary Derivatives.

(Kita).

575. As has been said already, Primary Derivatives are formed directly from the roots by means of certain suffixes; these suffixes are called kita suffixes.

576. The kita suffixes are given below in alphabetical order to faciliate reference.

A—(a) (n) (a). By means of this suffix are formed an extremely large number of derivatives, some of which take guna and some of which do not. It forms nouns (substantive and adjective) showing:

ist—action: Jpac, to $cook+a=p\bar{a}ka$, the act of cooking, the cooking; Jcaj, to forsake $+a=c\bar{a}ga$, for saking, abandonment; J bhaj, to divide $+a=bh\bar{a}ga$, dividing; Jkam, to love $+a=k\bar{a}ma$, love.

and cara, a spy; \sqrt{har} , to take, captivate +a = hara, the Captivater (a name of Siva); \sqrt{kar} , to do, make +a = kara, that which does = the hand; also, kara, a doer, maker.

ard—abstract nouns of action: $\sqrt{kar} + a = kara$, action, making; \sqrt{kam} , to step, proceed +a = kama, step, succession, order; \sqrt{kamp} , to shake +a = kampa, shaking, trembling; \sqrt{yuj} , to join +a = yoga, joining.

4th—It forms adjectives: $\sqrt{kar + a = k\bar{a}ra}$, doing, making, also kara, causing, making; \sqrt{car} , to walk, roam, $c\bar{a}ra$, walking roaming, and also: cara, do; \sqrt{plu} , to swim, float +a = plava, swimming, floating.

The student will readily understand that the root may be preceded by any prefix: $sam + \lambda gam + a = sangāma$, assembly; $pa + \lambda vis$, to enter +a = pavesa, entrance; anu $+ \lambda sar$, to go, move, walk +a = anusara, following, conformity. The same remark applies to all the suffixes.

- 577. From the adjectives formed by this suffix (4th) are formed the upapada compounds (552): kammakāro = kammam kāro (kammam karoti' ti), the doer of the act; kumbhakāro = kumbham kāro (kumbham karoti' ti), the maker of the pot = potter.
- 578. Very similar in character with the upapada compounds are those compounds which are names of persons. In our opinion, they are simply and purely upapadas; but Kacchāyana has the following rule: "sañnāyam A NU—that is: To form a proper name, suffix NU (=m=Accusative Case), is added to the first member of the compound, which is the direct object of the root which forms the second member and after which the suffix A is added to denote the agent: arindama, the subduer of his enemies=ari, enemy+m (nu)+Jdam, to subdue+a. So: Vessantara, who has crossed over to the merchants (vessa+m (nu)+Jtar, to cross+a); Tanhankara, creating desire=tanhā desire+m (nu)+Jkar+a. The name of a Buddha.

It will be seen from the above examples that the first member is in the Accusative Case and is governed by the second member which is an agent-noun formed by suffix A.

Remark. The nouns formed by A are masculine; they form the feminine according to rules (183), and

the same applies to the adjectives (197).

Abha*—Used to form the names of some animals; the derivation is obscure. Kalabha or kalabha, a young elephant, from Jkal, to drive, to sound; usabha a bull from Jus (Sank. 15), to go, flow, push : sarabha a fabulous eight-legged kind of deer, from Jsar (Sansk-cr), to injure, break, tear: karabha, a camel, from Jkar, to do.

Aka (nvu)—forms a numerous class of action-nouns and adjectives, with guna of the radical vowel: \sqrt{kar} , to make, $do + aka = k\bar{a}raka$, making, causing; maker, doer; \sqrt{gab} , to take receive + $aka = g\bar{a}haka$, taking, receiving, a receiver: sometimes a—y is inserted between aka and a root ending in a vowel, especially long $d\bar{a}$: \sqrt{d} , to give + $aka = d\bar{a}yaka$, a giver.

Remark. The feminine of these derivatives is

generally in kā or ikā.

Ala*—forming a few nouns of doubtful derivation from, it is said, the roots: I pat to split, slit; I kus, to heap, bring together, cut; I kal, to drive, sound, throw, etc., etc., patala, covering, membrane, roof; kusala, that which is capable of cutting sin = meritorious act; these nouns are neuter.

An-only a few words are derived from this suffix :

√rāj, to rule; +an = rājan, a king, ruler.

Remark. Nouns in an have the Nom. Sing. in ā

(156 ff).

Ana (yu)—this suffix forms an immense number of derivative nouns and adjectives. The nouns are neuter, or feminine in ā; the adjectives are of the three genders. Guna may or may not take place; it is,

however, more common with the adjectives. Nouns: \sqrt{pac} , to cook, +ana=pacanam, the cooking, \sqrt{gah} , to take, +ana=gahanam, the seizing, taking; \sqrt{ha} , stand, to $+ana=th\bar{a}nam$, a place. Adjectives: pa+nud, \sqrt{to} push, move +ana=panudano, removing, dispelling; \sqrt{ghus} , to sound +ana=ghosano sounding; \sqrt{kudh} , to be angry +ana=kodhano, angry. The feminine of these adjectives is sometimes in \bar{a} , sometimes in \bar{i} . Fem. \sqrt{sev} , to serve, stay by, $+ana=sevan\bar{a}$, also, sevanam, service, following: \sqrt{kar} , to execute $+ana=k\bar{a}ran\bar{a}$, agony, torture.

as—This suffix forms a not very large, but importtantclass of words, which have already been explained (160); guna sometimes takes place; they are declinedlike manas (159), their Nom. Sing. is in o. I vac, tosay, speak + as=vacas (vaco), speech, word; Itij, tobe sharp + as = tejas (tejo), sharpness, splendour.

āni*—Rarely found, it properly does not form nouns, but a vituperative negative imperative, with the prohibitive particle a (p. 242, a) before the root, and a dative of the person who is forbidden to act: agamāni = a + Jgam +āni = you are not to go! as in "paradesam te agamāni"—you are not to go elsewhere! "te idam kammam akarāni (a + Jkar +āni).

avi = vī (tāvī)—is used as has already been seen, to

form participles (231) so also :

āna (448), also at, ant = nta (440) so that the Perf. Active, the Pres. Active and the Reflective Participles are considered by native grammarians as coming under the head of Kita Derivatives. The same remark applies to the P P.P.

dhu—so given by native grammarians is, properly:
adhu; it forms but a few derivatives and is only an-

other form of thu = athu (q. v).

i—forms a large class of derivatives, masc., fem. and neuter, as well as a few adjectives. The nouns may be agent-nouns or abstract. But the derivation is not always quite clear (principally of neuter nouns), hence, some grammars include this suffix among the uṇādi. Strengthening takes place in a few roots. Masc: \(\lambda \text{ku}\), to sound, sing + i = kavi, one who sings = a poet; \(\lambda \text{mun} = \lambda \text{man}\), to think + i = muni, one who thinks = a sage. Fem.: \(\lambda \text{lip}\), to smear, rub + i = lipi, a rubbing over, writing; \(\lambda \text{ruc}\), to shine, to please + i = ruci, light, pleasure. Neut.: \(akkhi\), eye: \(aggi\), fire, \(atthin\) thin, bone, and a few others of very doubtful derivation. Adj. \(\lambda \text{suc}\), to beam, glow, burn \(\text{+}i = suci\), beaming, clear, pure.

By means of this suffix is formed, from $\sqrt{dh\bar{a}}$, to bear, hold, a derivative: dhi, which forms many compounds, mostly masculine: sam + dhi = sandhi, connection, union (ingrammar = euphony); udadhi, the ocean = uda, water + dhi, holding (uda + $\sqrt{dh\bar{a}}$ + i); others are: nidhi, a receptacle (ni + $\sqrt{dh\bar{a}}$ + i); paridhi, circle, halo (pari + $\sqrt{dh\bar{a}}$ + i).

Similarly, from $Jd\bar{a}$, to give, with prefix \bar{a} , we obtain: $\bar{a}di$ (= \bar{a} + $d\bar{a}$ +i), and so forth, and so on, etc., lit., = beginning. The word $\bar{a}di$ is much used at the end of compounds.

icca (ricca), and iriya (ririya),—are given by Kacchāyana as kita prefixes, but in reality they are not: both are suffixes of the F.P.P. (466): they are found only in the two examples: kicca and kiriya (lit., what is to be done=) business: $\sqrt{kar + icca} = kicca$ (with elision of radical a and of τ); $\sqrt{kar + iriya} = kiriya$ (with elision of radical a and of τ). But the true derivation* is $\sqrt{kar + tya} = kitya$ (with elision of ar

^{*} Sans k= /kr+tya-krtya; /kr+ya=krya-kriya.

and insertion of i) _ kicca, according to the usual rules (74).

ika-is given for the only root: gam, to go:

gamika, one who goes.

in = i (ni)—This forms a very great number of derivatives whose stem ends in in, and the Nom. Sing. i (see 137, 173); they are properly possessive adjectives, sometimes used substantively. Guna as a rule takes place. Jgah, to take, receive $+in = g\bar{a}hin$ ($g\bar{a}h\bar{i}$), taking, catching; Jkar $+in = h\bar{a}rin$ ($k\bar{a}ri$), doing; $p\bar{a}pa-h\bar{a}r\bar{i}$, a sinner; Jy \bar{a} , to go, $y\bar{a}yin$ ($y\bar{a}yi$) going, nagaray $\bar{a}y\bar{i}$ going to the town; Jd \bar{a} , to give, $d\bar{a}yin$ ($d\bar{a}y\bar{i}$), giving, a giver. Note that a y is inserted between the suffix and the roots ending in \bar{a} long. The feminine is formed according to rules (189).

ina—A few nouns are formed by this suffix; there is no guna: Isup, to sleep + ina = supinam (neut.), a dream, sleep. The derivation of some nouns and adjectives from this suffix is not apparent and clear, and it is also classed as an unadi; I dakkh, to be able,

skilful+ina = dakkhina, able, southern.

ira—The derivatives from this, nouns and adjectives, are few; there is no guna: \(\sqrt{ruc}, \) to shine + ira = \(rucira, \) brilliant, beautiful; \(\sqrt{vaj}, \) to be strong + ira = \(vajira, \) thunderbolt.

iya, ittha—are the suffixes used for the comparison of adjectives (238).

isa*—forms a few vouns, mostly masc., of rather obscure derivation: ✓pur, to fill+isa=purisa a man, person; ✓sun, to oppress+isa=sunisa, an oppressor; ✓il, to shake, come+isa=ilisa, one who shakes; ✓mah, to be great+isa=mahisa, mighty, a buffalo.

itta* (nitta),—is said to express multitude (?); the root is gunated: \(\sqrt{vad}, \) to speak, to play (music) + itta \(= v\bar{a}\) dittam, the multitude of those who play music \(= \) an orchestra. The suffix and its derivatives are incomprehensible; but see—tta, tra where its probable formation will be explained.

ivara*—forms a few neut. nouns of doubtful connection with the roots from which they are derived: √ci, to gather, to depend upon + ivara = cīvaram, a monk's garment = that which is heaped upon or depended upon; √pā, to drink + īvara = pīvaram, beverage = that which is to be drunk.

ka—is added to very few roots which take guna; it forms agent-nouns and adjectives: I vad, to speak + ka=vādaka, one who speaks, a musician; playing (adj.); I dah, to burn + ka = dāhaka, burning (adj.). Note that these words would be better derived from, suffix aka (q. v.) I sukh (Sanks. Cus) + ka = sukkha, dry, dried up; I thu (Sansk, stu) to dribble, drop + ka = thoka, a little. ka often takes a connecting vowel—i or u before a root, and forms the suffixes ika, uka (q. v.)

la—generally with connecting vowels: a or i before it. Ia is but another form of ra (q. v.): $\sqrt{1}$ thu, to be thick, strong + $\ln t$ thu, thick, fat; $\ln t$ to waver, tremble + (a) $\ln t$ the capala, tremulous, fickle, giddy; $\ln t$ to keep, guard + $\ln t$ pala, a guardian; $\ln t$ to breathe, blow softly + (i) $\ln t$ anila, wind, breeze.

lāna—as well as yāna given as primary suffixes, are not at all suffixes; the true suffix is āna, which is a taddhita suffix (q. v.)

ma – forms some abstract nouns, agent-nouns and some adjectives: $Jbh\bar{\imath}$, to fear, be afraid of + ma = $bh\bar{\imath}ma$, terrible, fearful; Jghar (Sansk. ghr) to be warm, to glow + ma = gharma = ghamma, heat, warmth. (Note the assimilation of r (80): Jthu, to praise (S. stu), thoma, praise; $Jdh\bar{u}$, to shake, move hither and thither + ma = $dh\bar{u}ma$, smoke. This suffix, in Pāli, becomes nearly confounded with the next: man, and native grammarians are often at a loss in choosing between these two suffixes: the reason is that no word in Pāli being allowed to end in a consonant, they have included the stems in an in the vowel declension (152, 156 – c, 157 – a).

man—(given as ramma as well as man by Kacchā-yana) forms action-nouns, masc. and neuter, in a few cases the noun being both masc. and neut.; the stems are in an, the nom. in a, o or m: J dhar, to hold, bear + man = dhammo, dhammam, nature, characteristic, duty, the Law; J kar + man = kammam, action, karma (Note the assimilation of r); J bhī, to fear + man = bhemo, fearful, terrible; J khi, to destroy, make an end of + man = khemo, secure, peaceful, khemam, safety, happiness. Most of the derivatives from man have migrated to the class of those formed by the last suffix (ma).

māna—this is the suffix of the Pres. Part. Reflective already seen (447). (See, āna, above, pg. 276).

mi—the number of derivatives from this suffix is very restricted, they are masc. or fem. There is no guṇa; $\lambda bh\bar{u}$, to exist, become $+ mi = bh\bar{u}mi$, the earth, ground, a place; $\lambda \bar{u}r$ (S. vr), to roll, turn from side to side $+ mi = \bar{u}mi$ ($\bar{u}rmi$, note the elision of radical r), a wave.

na—the use of this suffix in forming a certain number of P. P. has been explained (458 ff); it also forms a few nouns; the root takes no guṇa, but through assimilation, the root is not always recognisable: J var, to cover, enclose + na = vanna (80, 83), colour, external appearance; J sup (S. svap), to sleep + na = soppa (S svap), to sleep + S sphur sphr), to shake, to make a jerky motion + S sphur sphr), to shake, to make a jerky motion + S sphur sphr, wing. From J tas (S. trs), J tanhā, thirst, craving; J ji, to conquer + D a = J ina, conqueror.

Connected with this na, are the suffixes ina, una (q. v.); also tana, (=S. tna), from this last is derived the word ratana, gift, blessing, jewel, from $\sqrt[3]{ra}$, to bestow, +tna=tana (note that radical \bar{a} is shortened through the influence of the double consonant in tna. (See 34).

ni—from this we obtain but a few nouns, fem.: $\sqrt[3]{h\bar{a}}$, to quit, forsake $+ ni = h\bar{a}ni$, abandonment, loss, decay; $\sqrt[3]{y}$ u, to fasten, to unite + ni = yoni, womb, origin, a form of existence.

nu—forms a few words mostly masc., some abstract and some concrete: $\int bh\bar{a}$, to shine, to be bright + nu = $bh\bar{a}nu$, beam, light, the sun; $\int dhe$, to drink + nu = dhenu, yielding milk, a milch-cow.

ta 1—This suffix has been explained in the formation of the P. P. P. (450, ff). It also forms a few concrete nouns: $\sqrt{d\bar{u}}$, to go far, to a certain distance + ta = $d\bar{u}ta$, messenger; $\sqrt{s\bar{u}}$, to impel, to set in motion + ta = $s\bar{u}ta$, a charioteer. The student will remark that even these nouns look very much like P. P. P. (see 452—remarks). The suffix ita, also connected with the P. P. P. (452—ii), forms a few derivatives of doubtful connection with roots; palita, grey, lohita, red; harita, green, etc.

ta 2 (S. tas)—forms a few nouns: \(\Jsu, \) to go, pass (+ta=sota, a stream; \(\Jsu, \) to hear+ta=sota, the ear.

ta (ritu, ratu). (S. tr or tar)—This suffix forms a pretty large number of agent-nouns. (See 162). Remark that the base is in u, and the nominative in \(\bar{u} : \Jma, \) to measure, mete out (food, etc.), \(+ta=mata, \) mother; \(\Jsu \) vad, to speak, say + ta=vatta, one who says, tells, a speaker.

ti—This forms a very numerous class of actionnouns, fem., agent-nouns, and a limited number of
adjectives. Fem: Jbhaj, to divide+ti=bhatti (=
bhakti, 426—remark, 59—a), division; Jkitt, to praise
+ti=kitti (with one t dropped), praise; Jgam, go+
ti=gati,(456), a going, journey. So: from Jmuc,
mutti, deliverance; from Jman, to think, mati (455),
thought, etc. Adj.: thā, stand, last+ti=thiti, lasting;
Jpad, to go, step+ti=patti(62), going, a foot-soldier.

tu 1—This is properly the suffix of the infinitive, which has become an Accusative (363—1): but it also forms nouns, chiefly masc., but of the other genders too: √dhā, to lay, put+tu=dhātu, masc., and fem., that which lay (at the bottom)=a primary element, a root, principle; √tan, to stretch +tu=tantu, a thread, masc.; √si, to bind+tu=setu, a tie, bridge.

tu 2-The same as tā (ritu, rātu), above.

tra, ta (tran, ta)—form a large number of derivatives chiefly denoting the agent, and concrete nouns: \sqrt{chad} , to cover over + tra, ta = chatram, chatlam, an umbrella (in chatra, d has been dropped to avoid the collocation of three consonants; in chatta it is assimilated); \sqrt{ga} (a collateral form of \sqrt{gam}), to move + tra, ta = gattam, limb; \sqrt{n} , to lead + tra, ta = netram, nettam, the eye = that which leads.

tha—the derivatives from this are not very numerous; \sqrt{ga} , to $\sin g + \tan gatha$, fem., a song, stanza, verse; $\sqrt{\tan(S. tr)}$, to $\cos s + \tan tittham$ ford, landing-place (with connecting i).

thu and also dhu—give only a few derivatives, and have generally the form athu, adhu. Ivip, vep, to shake, tremble + thu, dhu = vepathu, vepadhu, trembling; Ivam, to throw up, vomit + thu, dhu = vamathu, vamadhu, vomitting.

ra—forms some nouns and adjectives; there is no guna, mostly found in the forms: ira, ura, (q.v.) and ara, Nouns: Jbhand, bhad, to receive, praise+1 ra=bhadra; bhadda (adj.), laudable, good, worthy; Jdhī, to think+ra= $dh\bar{\iota}ru$ (adj.), wise, a wise man; Jbham, to flutter, move in circles+(a) ra=bhamara, a bee.

ri—gives very few derivatives: $\sqrt{bh\ddot{u} + r\dot{i}} = bh\ddot{u}r\dot{i}$ (adj.), abundant, much.

ru—forms some nouns and adj.: $Jbh\bar{i}$, to fear, be afraid + ru = $bh\bar{i}ru$, timid; J can, to rejoice in, to gladden + ru = $c\bar{a}ru$ (with elision of n), dear, gladsome.

u (ru, and u)—although making a large number of derivatives, substantive and adj., as the connection of the meaning with the root, is, in many cases, not easily traced, this suffix is classed with the Unadi; guna may or may not take place. Jbandh, to bind + u = bandhu, a kinsman; $\sqrt{kar} + u = karu$, a doer, maker, artisan; \sqrt{tan} , to continue, extend + u = tanu, a son; \sqrt{tan} , to light up, shine + u = vasu, a gem, good.

uka (nuka)—forms a few nouns and adj. denoting the agent; there is guna; \sqrt{pad} , to tread, step + uka = $p\bar{a}duka$ (fem.), a shoe; $\sqrt{kar + uka} = k\bar{a}ruka$ (masc.), a maker, artisan.

una—forms a few derivatives. $\sqrt{\tan t}$ to cross, pass away + una = $tarun\bar{a}$, just begun, young, fresh; $\sqrt{\tan t}$ to love, pity + una = $tarun\bar{a}$ (fem.), compassion; $\sqrt{\tan t}$ pis, to grind, hurt, destroy + una = $tarun\bar{a}$ (adj.), backbiting, malicious; a tale-bearer.

 $\tilde{\mathbf{u}}$ —forms some adj. and nouns mostly fem. J vid, to know $+ \tilde{\mathbf{u}} = vid\tilde{u}$, knowing; vi + J $\tilde{\mathbf{n}}$ $\tilde{\mathbf{a}}$, to know $+ \tilde{\mathbf{u}} = vi\tilde{n}\tilde{n}\tilde{u}$, knowing.

 $\bar{\mathbf{u}}\mathbf{r}\mathbf{a}$ —A few nouns only. $\int \mathbf{u}\mathbf{n} d\mathbf{t}$ wet, moisten + $\bar{\mathbf{u}}\mathbf{r}\mathbf{a} = und\bar{u}r\mathbf{a}$, a rat.

usa,* ussa—The derivatives from this, very few, are doubtful: Iman, to think + usa, ussa = manussa, mānusa, a man.

vā—this, as the suffix of the P. P. A., has already been noticed (465).

ya—This forms neut. nouns, most of them abstract in meaning. Assimilation takes place regularly, \sqrt{r} is a rule+ya=rajjam, kingship, kingdom; \sqrt{y} vaj, to avoid + ya = vajjam, a fault = what is to be avoided; \sqrt{y} yuj, to yoke, harness+ya=yoggam, a carriage, conveyance. It will be remarked that **ya** is also the suffix of the F. P. P. (466), which often, in the neut. sing., makes nouns.

yana (see remark under : lana).

Remarks. (a) The student will have remarked that the participles Pres. Active, Pres. Reflective; the P. P. P., the Perf. Active and the F. P. P. are considered as belonging to the Primary derivation.

(b) Suffixes: tabba, aniya, ya (nya) and icca are by native grammarians called kicca suffixes (466).

579. (ii) Secondary Derivation. Taddhita.

Remarks. (a) These derivatives are called "secondary" because they are formed by means of suffixes from the "Primary" derivatives explained in the Kita derivation.

- (b) Secondary derivatives are also formed from pronominal base (336, ff.)
 - (c) As in kita, guna may or may not take place.
- 580. The following remarks about the meaning of the Secondary derivation should be well noted:
 - The great bulk of taddhita suffixes form adjectives from nouns.
 - (ii) These adjectives are very freely used as substantives, the masc and fem being generally nouns denoting the agent, while in the neutthey are abstract.
 - (iii) The final vowel of a word is often elided before a Taddhita suffix.
 - (iv) The guna affects mostly the first syllable of the word to which the suffix is added.
- 581. The following is a list in alphabetical order of the taddhita suffixes:
- a (na, and a)—An extremely large number of derivatives are formed by means of this suffix. It is added to nouns and to adjectives used substantively; these derivatives are essentially adjectives, used in most cases substantively. They primarily express connection with, relation with or dependence on that denoted by the "primary derivatives"; this relation is necessarily of many kinds, as shewn below:
- (1) Patronymics; the masc. denotes the son of, the fem., the daughter of, and the neut., the consanguinity

or relation of, Vasittha $+a = V\bar{a}sittho$, the son of, Vasitthi the daughter of, Vāsittham, the relation of Vasittha. So: from Visamitta +a = Vesamitto, Vesamitti, Vesamittam; Manu $+a = M\bar{a}navo$, Mānavī, Mānavam (110, remark), the son, daughter or relation of Manu.

- (2) that which is dyed with: Kasāva, a reddish yellow dye+a=kāsāvo, reddish-yellow, yellow; kāsāvam, a monk's robe (which is dyed with such dye). So: haliddā, turmeric+a=hāliddo, yellow, dyed with turmeric.
- (3) the flesh of: Sūkara, a pig+a=sokaram, pork; mahisa, buffalo+a=māhisam, buffalo's flesh. As adj. =sokaro, relating to pigs; māhiso, relating to buffaloes.
- (4) belonging to: Vidisä (a foreign country)+a= vediso, belonging to a foreign country, a foreigner; Magadhā (Southern Behar)+a=māgadho, belonging to, born in, Magadhā.
- (5) a collection of: Kapota, a dove, pigeon $+a = k\bar{a}poto$, a group of doves, or, relating to doves; mayūra, peacock $+a = m\bar{a}y\bar{u}ro$, a group of peacocks; adj. belonging, relating to peacocks.
- (6) study, knowledge of, knowing: Nimitta, an omen +a=Nemitto, a knower of omens=a fortune-teller; veyyākaranam, exegesis, grammar+a=veyyākaranam, a grammarian; muhutta, a while+a=mohutla, one who studies for a while only; also: relating to a moment=momentary.
- (7) The locality in which something or some one is or exists: Sakuna, a bird+a=sākunam, the place wherein birds roost or resort to; udumbara, a fig tree+ a= odumbaram, a place where fig-trees grow.
 - (8) Possession of: Pañña, wisdom + a = pañño,

possessing wisdom = wise; a wise man; saddhā, faith + a = saddho, one who has faith = believing, faithful, a believer.

aka (naka)—Is said to denote the property of: manussa, a man + a = manussakam, that which belongs to man, the property of man = human. (See ka).

aya -For this, see ya.

ālu—(This is suffix lu, preceded by \bar{a} (See lu); denotes the tendency and forms some past participial adj. Dayā, sympathy, compassion + ālu = dayālu, compassionate; abhijjhā, covetousness = ālu = abhijjhālu, covetous = whose tendency is to be covetous; sīta, cold + ālu = sītālu, chilled, cold.

āna (nāna)—Forms patronymics: Kacca (a proper name)+āna = Kaccāno, Kaccānī, Kaccānam, the son, daughter, offspring of Kacca; cora, a thief+āna =

corano, corani, coranain, the son, etc.

āna (given as a Kita suffix in the forms: lāna, yāna (see pp. 279, 283) forms a very few derivatives; kalya, and by assimilation kalla, healthy, remembering, thinking of + āna = kalyāno, kallāno, blest (with health), happy, good.

āyana (nāyana). — Also forms patronymics: Kacca +āyana + Kaccāyano, Kaccāyanī, Kaccāyanam, the son, etc., of Kacca; Vaccha + āyana = Vacchāyano, Vacchā-

yānī, Vacchāyanam, the son, etc., of Vaccha.

bya—Is said to denote: the state of: Dasa, a slave + bya = dasabyam, the state of being a slave, slavery.

dhā-Has already been noticed (281).

era (nera)—Patronymics; the final vowel of the word is elided. Vidhava+era=Vedhavero, the son of Vidhava; Nalika+era= $N\bar{a}likero$, the son of Nalika; samana, a monk+era= $s\bar{a}manera$, the son, vis., the disciple of the monk=a novice.

- eyya I (neyya)—The state or nature of: Alasa, idle+eyya=ālaseyyam, idleness; sāpateyyam, property (lit. one's own property)=sa, own+pati, master, owner+eyya (note the elision of i in pati).
- eyya 2 (neyya)—Patronymics; with guna. Vinata + eyya = Venateyyo, the son of Vinata; mālī, a gardener + eyya = māleyya, the gardener's son.
- eyya 3—Denotes: the nature of, the origin, the place where a thing is made, or a person or animal reared up: pabbateyyo, whose place or abode is in the mountain, belonging to mountains=pabbata+eyya; suci, purity+eyya=soceyyam, the state of him who is pure, also: purification; kula, family+eyya=koleyyo, belonging to, reared up in a (noble) family=of good family; Bārāṇasī, Benares+eyya=bārāṇaseyyam, that which is made in Benares, lit., that the origin of which is in Benares.
- eyya 4—Fitness, worthiness. This is a form of the F. P. P. already explained (468).
- 1 (ni),—Forms a few patronymics, from nouns in a: Duna+i=Doni, the son of Duna; Anuruddhā+i = Anuruddhi, the son of Anuruddhā; Jinadattha+i= Jinadatthi, the son of Jinadattha.
- 1 2 —After the word pura, town, city, indicates that which belongs or is proper to a city: pori, urbane, polite, affable.
- ika (nika)—Is of very wide application and is added after nouns and adjectives; guna generally takes place. It denotes:
- (1) Patronymics: Nādaputta + ika = Nādaputtiko, the son of Nādaputta; Jinadattha + ika = Jinadatthiko, the son of Jinadattha.
 - (2) living by means of: Nāvā, a boat+ika=nāviko,

one who goes or lives by means of a boat = a boatman; balisa, a fish-hook + ika = $b\bar{a}lisiko$, a fisherman; vetana, wages + ika = vetaniko, one who lives upon wages - a labourer.

- (3) going by means of: pada, the foot + ika = pādiko, one who goes with his feet = a pedestrian; sakaţa, a cart + ika = sākaţiko, one who goes in a cart.
- (4) relating to: samudda, the sea + ika = sāmuddiko, relating to the sea = marine; sakaṭa, cart, sakaṭiko, relating to carts.

(5) playing upon: vinā, a lute, veniko, playing upon a lute, lute-player (27—ii, remark 2); bheri, a drum, bheriko, a drummer, or, relating to a drum.

- (6) mixed with: tela, oil, telikam, that which is mixed with oil; oily; dadhi, curds, dadhikam, that which is mixed with curds, and dadhiko, mixed with or relating to curds.
- (7) making, the maker: tela. oil, teliko, an oil manufacturer.
- (8) connected with: dvāra, door, dvāriko, one who is connected with a door = a door-keeper.
- (9) carrying upon: khanda, the shoulder, khandiko, one who carries on the shoulder: anguli, finger, anguliko, one who carries on the finger.
- (10) born in or belonging to a place, or living in a place; Savatthi, Savatthiko, of, born in, or, living in Savatthi; Kapilavatthu, kapilavatthiko, of, born in, or living in Kapilavatthu.
- (11) studying, learning: Vinaya, the Discipline, venayiko, one who studies the Vinaya; suttanta, a discourse (of the Buddha), suttantiko, one who studies, or knows the Discourses, vis., the Suttapitaka.
 - (12) that which is performed by: manasa, the mind,

mānasiko, mental and mānasikam, the act performed by the mind; sarīra, the body, sārīriko, bodily, corporeal, sārīrikam, the act performed by the body.

- (13) that which is bartered for: suvanna, gold, so-vannikam, that which is bartered for gold; sovanniko, relating to gold; vattha, cloth; vatthikam, that which is exchanged for cloth; vatthiko, relating to cloth.
- (14) possession: dando, a staff, dandiko, one who has a staff, a mendicant; mālā, wreath, māliko, one having a wreath; puttiko, who has sons.
- (15) a collection, herd, group; kedāra, a field, keddārikam, a collection of fields: hatthi, elephant, hatthikam a herd of elephants.
- (16) measure: kumbha, a pot, kumbhiko, containing a kumbha measure, viz., as much as a pot; kumbhikam, that which is contained in a pot.
- ima—Denotes position or direction in space or time; it also shows relation: pacchā, behind, western, pacchimo, hindermost, western; anta, limit, end, antimo, last, final; So, majjhimo, middling, from majjha, middle.

imā—forms a limited number of possessive adj. putta, son. puttimā, who has sons; pāpa, evil, sin, pāpimā, sinful, evil.

This suffix is the same as that noticed (220, 222) with connecting vovel i before it.

in $(n\bar{\imath})$ —forms a numerous class of possessive adj., very often used substantively (137); the stems are in in, and the nominative sing. in $\bar{\imath}$; Danda, a staff dand $\bar{\imath}$, possessed of a staff; manta, design, plan, mant $\bar{\imath}$, one replete with plans, a minister, adviser; papa, sin $+in=p\bar{a}p\bar{\imath}$, having sin, sinful.

ina—a few possessive adj.; mala, dirt, taint+ina = malina, dirty, tainted.

iesika-This is the sign of the Superlative (238).

iya—A few abstract nouns, issara, lord, chief + iya = issariyam, dominion; alasa, lazy, ālasiyam, idleness.

iya-like ima above.

iya, as iya noticed in (466), is essentially a suffix of the F. P. P. The proper form of the suffix, it should be noted, is: īya.

i -See in, above.

i 2—Is used after the cardinals from 11 upwards to form ordinals expressing the day of the month, but also merely ordinals sometimes; ekādasa, $11+1=ek\bar{a}-das\bar{\imath}$, the 11th day or simply, the 11th; catuddasa, 14 $+1=catuddas\bar{\imath}$, the 14th day, or, the 14th.

ka (kan)—Is much used to form adjectives, which in the neut. become abstract nouns; besides, it also forms a certain number of nouns masc, which, however, are adjectives used as substantives. Guna often takes place; rakkhā, protection + ka = rakkhāko, protecting, a guard; rakkhana, defence + ka = rāmaneyyako, delightful, rāmaneyyakam, delightfulness.

It has a few other meanings;

(1) collection, group; rājaputta, prince + ka = rājaputtaka, a group or band of princes; manussa, man + ka = mānussakam, an assembly or group of men.

(2) Diminutives, with, sometimes, a certain amount of contempt implied; pada, foot, pādako, a small foot; rāja, king, rājako, a princeling; putta, son, puttako, a little son; luddha, hunter, luddhako, a young hunter.

(3) Not seldom, ka adds nothing whatever to the primary meaning of the word: kumāra, child, young

prince + ka = kumārako, do, do, nava, young, junior + ka = navako, do, do.

- (4) It is much used after compounds, above all, after Bahubbīhī to form possessives, but often also redundantly.
- (5) The use of **ka** after numerals has been noticed (286).
- kata—Is considered as a suffix by some grammarians; it is used with prefixes: ni+kaṭa=nikaṭa, near; vi+kaṭa=vikaṭa, changed; pa+kaṭa=pākaṭa, evident, public, clear; sam+kaṭa=sankaṭa, narrow. It will be remarked that kata forms adjectives differing very little or even not at all from the meaning of the suffix to which it is added. It is probably a form of kata (P. P. P.), from √kar, to do, make.

kiya—Forms adj. denoting relation, sennection (it is made up, no doubt, of ka+iya). Andha, the Andhra country + kiya = andhakiya, relating or belonging to the Andhra country; jāti, birth + kiya = jatikiya, relating to birth, congenital.

la—Forms a few adj. and nouns; it is often preceded by the vowels i and u: bahu, many + la = bahulo, abundant; vācā words + la = vācālo, talkative, garrulous; phena, froth = phenila, frothy, the soap plant, soap; mātā, mother + ula = mātulo, maternal uncle; vaṭṭa, a circle + ula = vaṭtulo, circular; kumbhī, a pot, jar + la = kumbhīlo, a crocodile = one who has (a belly like) a jar. Ia is another form of ra(q.v.); r and I often intercharge (47, vi).

lu-For this see : ālu above.

ma—Forms ordinals (see 274); ma has, sometimes, a superlative meaning (cf, ima, above). ima is the suffix ma with preceding vowel i.

mā (mantu)—(mant) is much used in forming adj. of possession. It has been explained already (220, 221, 222, 223, 224).

maya—With this suffix are formed adjectives denoting: made of, consisting of: suvanna, gold + maya = suvannamaya, made of gold, golden; rajata, silver + maya = rajatamaya, made of silver.

min = mi—This forms a few possessive adjectives; the stems are in in and the nominative sing. in $\bar{\imath}$ (cf., in and $\bar{\imath}$). Go, cow + min = gomin (gomi), possessing oxen, cattle, a possessor of cattle; sa, own + min = samin (sāmī) owner, master, lord.

mi - See last.

- ra From this are made a few adjectives; guṇa, in some examples, takes place. It is often preceded by the vowels a and i. Madhu, honey+ra=madhura, sweet, also sweetness; sikhā, a peak+ra=sikhāra, having a peak, peaked, a mountain; susa, empty, hole +(i) ra=susira, full of holes; kamma, act, work+āra=kammāro, having or doing work, an artificer, smith.
- so Same meaning as ra; medhā, wisdom + so = medhāso, having wisdom, wise; loma, hair + so = lomaso, hairy.
 - si, ssi-see below; (vin=vi).
- ta Forms a few nouns and adj., it is possessive suffix; pabba, a knot, joint, fulness + ta = pabbata, a mountain = that which has joints or fulness; vanka, bent + ta = vankata, bent, crooked.

tama-Is the suffix used in forming the Superlative. (See 238, i).

tana—This suffix forms, from adverbs, a few adjectives: svā (sve, suve), tomorrow+tana=svātano, of tomorrow, belonging to tomorrow; sanam (S. sanā), of old, always+tana=sanantano, ancient, old, perpetual; nū, now+tana=nūtano, fresh, new.

tara—As the suffix of the comparative, tara has already been explained (238, i).

tā i — This suffix forms a numerous class of feminine abstract nouns from adjectives and nouns, and expresses the state, nature or quality of being that which is denoted by the adj. or noun. Lahu, light + tā=lahutā, lightness; sāra, pith, marrow + tā=sāratā, essence, strength; ati (pref.), very, great + sūra, a hero + tā=atisūratā, great heroism.

tā 2—Denotes multitude, collection; jana, person, man + tā = janatā, a multitude of persons = folk, people; gāma, village + tā = gāmata, a collection of villages. So: nagaratā, bandhutā, etc., etc.

ti___Is used in forming the words expressing decades (cf. 251).

tta—(S. tva) forms neuter nouns of the same import as tā (1); puthujjana, a common man + tta=puthujjanattam, the state of being a common man; Buddha, a Buddha+tta=buddhattam, buddhahood; atthi, he is+tta=atthitam, the state of "he is"=existence.

ttana—Used in the same sense as the last (S. tvana), putthujjana+ttana=puthujjanattanam, state of being a common man; vedana, sensation+ttana=vedanattanam, sensitiveness.

tya=cca—(S. tya), forms a few adjectives from indeclinables; ni, in+cca=nicca, inward, inmate=own, eternal, perpetual; amā, with, at home+cca=amacco, inmate, minister (for tya=cca, see 74).

tha-used in forming the ordinals; 4th, 5th, 6th

and 7th (see 251).

tham.—Makes adverbs from pronominal stems; it has been noticed in (337 ff).

thā,-This also has been noticed in (337 ff).

vā (vantu)—(vant), this suffix makes a very large class of possessive adjectives.

It is similar in character to mā (mant). (See 220 ff).

va—Forms a small number of adjectives; anna,

wave+va=annavo, billowy, also the ocean; kesa,

air + va = kesavo, hairy (a name of Visnu).

Vi vin Used to form adjectives of possession. The stems are in in, and the nominative sing. in ī. It has been explained in (231 ff).

It is used also after some words the stem of which ends in s (158, 160), tapas (tapo), austerity, devotion + vī = lapassī (tapasvī), austere, a hermit; yasas (yaso), fame + vī = yasassī (yasasvī), renowned, famous.

Note that initial v of v7, is assimilated to final s, thus giving ss1. The suffix as given by native grammarians is,: ssi, which the student should assume as being the true suffix.

ya (nya)—This forms a very large class of nouns, mostly neuter abstract. Guna takes place in most cases, and assimilation is regular. Alasa, lazy + ya = ālasyam, ālassam, laziness; kusala, skilful + ya = kosallam, skill, mastery; pandita, learned, clever + ya = pandiccam, learning, scholarship; vipula, broad, large + ya = vepullam, development; samāna, equal,

same + ya = sāmañño, common, general; dakkhina, affable + ya = dakkhiñño, affable, kind, dakkhiññam, affability, kindness.

Roots used as suffixes.

(KVI).

582. "Kvi" is an imaginary suffix denoting that the root itself is to be considered as the suffix. When a root ends in a consonant, this consonant is elided, as Jgam=ga, Jghan, to kill=gha. As these form primarily adjectives, they assume, in certain cases, but not always, the endings of the three genders.

583. The student must bear in mind that native grammarians include Kvi in Kita. As, however, they are used as suffixes added after Primary and Secondary derivatives and indeclinables, I have preferred to treat them separately.

584. A list of the principal roots used as suffixes is here given.

bhū—(Jbhū, to be), has generally the meaning denoted by the verb itself: abhi + bhū = $abhibh\bar{u}$, mastering, overcoming, a conqueror (abhibhavati, to overcome); vi + bhū = $vibh\bar{u}$, arising, expanding, ruler, lord (vibhavati, to arise, expand); sam + bhū = $sambh\bar{u}$, offspring, progeny (sambhavati, to be produced, to spring from).

da—(\(\lambda\), to give, bestow); amata, immortality + da = amatado, he who bestows or confers immortality, conferring immortality; lokahita, the world's welfare + da = lokahitado, bestowing, or wishing for, the world's welfare.

ga—(gam, to go); pāra, the further shore + ga = pāτago, gone to the further shore, viz., to Nirvāna; kula, family + upa, near + ga = kulupago, one who goes near a family = a family adviser.

 $g\bar{\mathbf{u}}$ —(a collateral form of \sqrt{gam}); addhā, distance+ $g\bar{\mathbf{u}} = addhag\bar{\mathbf{u}}$, going to a distance, traveller; pāra+ $g\bar{\mathbf{u}}$ = pāra $g\bar{\mathbf{u}}$, as above, $p\bar{a}rago$.

gha - [Jghan = han (59, note)] to strike, kill, smite;

pati, back, in return + gha = poligho, hatred.

ja—($Jj\bar{a}$, jan, to be born, produced): pańka, mud +ja = pańkaja, produced in the mud=a lotus; anda, an egg+ja = andaja, born from an egg=a bird.

ii - (Aji, to conquer); Mara, the enemy of Buddha

+ ii = Māruji, conqueror of Māra.

pa— $(Jp\bar{a}, to drink)$; $p\bar{a}da$, a foot $+pa = p\bar{a}dap\sigma$. drinking by (with) the foot (root) = a tree.

pa (pa, to guard, keep); go, cow + pa = gobo, cow-

keeper.

tha—(Jthā, to stand, exist); nāvā, boat+tha= nāvattho, stored in a boat; ākāsa, the sky, the air+tha =ākāsattho, standing, resting, abiding in the sky.

kha—(Jkhā, a collateral form of Jkhan, to dig) pari, round+kha=parikkhā, that which is dug all round=a moat.

dada—properly the base (371-4) of \sqrt{da} , but considered as a root by some grammarians, is used in the same way as da above: sabbakāmadadam kumbham = an all-desire-granting vessel = a vessel which grants all desires.

585. The Taddhita suffixes may be classified as follows:

Patronymics—a, āna. āyana, era, eyya, i, ika.

Possessive—aka, ika, imā, in=ī, ra, (ara, ira), so.

ssī,mā (mat, mant), min=mī, va, vā, (vat, vant), vī=vin, ta, ina, la.

Group, collection, multitude-a, ika, ka, ta.

State of, quality, abstract idea-bya, eyya, iya, ta, tta, ttana, ta.

Relation (relating to)-a, i, ika, ima, kiya.

The others may be classified as miscellaneous.

586. It will have been remarked that some suffixes are merely made up of a principal one which has taken the vowel a or i or u before it. Such are: aka, ika from ka; aya, iya from ya; ara, ira, ura from ra; ila from la.

SYNTAX.

(Kāraka).

587 Syntax, in Pāli, does not offer any difficulty, for nearly all the relations of the substantives, adjectives and pronouns which will be explained in this chapter are very often obviated by compounding them as has already been explained in the chapter on Compounds; the student who has carefully read and mastered the Compounds has therefore done much and will understand ordinary prose without too much difficulty However, there are peculiar uses of the Cases, without a knowledge of which a thorough mastery of the language would be impossible; we therefore invite the learner to read attentively the present chapter.

(I) ORDER OF SENTENCES.

588. The order of the Pali sentence is very simple in character, compound sentences being rather the exception than the rule:

(1) Whether the sentence be Simple, Compound or Complex, the predicate must always come last.

(2) In a simple sentence containing an object, the order is: (i) Subject, (ii) object and (iii) predicate, as: daso kammam karoti, the slave does the work.

(3) Words qualifying the subject or the object come before the subject and the object respectively, and adverbs. before the verb: ele tayo purisā mahantam sirim sīgham pāpunimsu, these three men quickly attained to great glory.

Remark. Adverbs of time always come first in

the sentence.

(4) The conjunctions, pana, but; udāhu, or, are used to form compound sentences; cc, yadi and sace, if, complex sentences.

(ii) THE ARTICLE,

589. There are no words in Pāli corresponding to the English articles; the words eho, ekacce, one, a certain, are often used in the sense of the indefinite article (253), and so, eso, that, this, do the function of the definite article: so puriso, the man; sā itthī, the woman.

Remark. Substantives not preceded by the above words may, according to the context, be translated as if preceded by the articles: puriso = a man, or the man.

(iii) CONCORD.

590. 1st of subject and predicate.

(1) The predicate may be (i)—a finite verb: bhik-khu gahapatim avādi, the monk admonished the householder; (ii)—a substantive with the verb "hoti" understood after it: yadi etc gunā if these (are=honti) virtues; (iii)—and adjective with "hoti" also understood: tvam atihālo, thou (art=asi) very foolish; (iv)—a P.P.P. used as a finite verb, so pi gato, he too went, lit., he too gone.

(2) When a finite verh is used as predicate, it must agree with the subject in number and person. When there are several subjects of different persons, the verb is put in the first person plural: so ca tvam aham gacchāma, he, thou and I go. Should there be no subject of the first person, the verb is put in the 2nd person plural: so ca tvam gacchatha, he and thou go.

(3) In the case of an adjective or a P.P.P. taking the place of the predicate, the adj. and the P.P.P. must agree with the subject in gender and number; so gato, he went; sa gatā, she went; tam gatam, it went; so taruņo, he is young; sā taruņā, she is young;

tam tarunam, it is young

(4) But if a substantive stands in the place of a verb, no such concord of gender or number needs take place; appamādo nibbānapadam (=nibbānassa padam), vigilence is the path to Nirvāna.

2nd of adjective and substantive.

591. An adjective, or participle (which is of the nature of an adj.), when not compounded with the noun it qualifies, must agree with it in gender, number and case.

3rd of the relative and its antecedent.

592. The relative must agree with its antecedent in gender, number and person.

- (1) The relative may be used by itself, without the noun: yo jānāti so imam ganhātu, he who knows let him take this. Note, that in the above the demonstrative pronoun so is used as a correlative.
- (2) The relative is used instead of a preceding noun: aham ekam upāyam jānāmi, yena amhe ganhi-

tum na sakkissati, I know an expedient by which he will not be able to seize us.

- (3) With the noun expressed: yassa purisassa buddhi hoti so mahaddhano ti vuccati, to whom there is wisdom, he is called very wealthy = he who has wisdom is said to be very wealthy.
- (4) Note that the clause containing the relative is put first; sometimes the clause containing the correlative is placed first for the sake of emphasis as: na so pitā yena putto na sikkhāpīyati, he is no father by whom the son is not made to learn.

(iv) SYNTAX OF SUBSTANTIVES.

503. This is properly government, for the term 'Kār-aka' expresses the relation between the noun and the verb; so that any relation existing between words not connected with a verb cannot be called a Kāraka, consequently the Genitive and Vocative are not considered as cases, for they have no relation whatever with the verb; they are therefore called Akāraka, non-cases.

1. THE NOMINATIVE.

594. The nominative is used very much in the same way as in English; it is the subject of the verb and the latter must agree with it in number and person; see Concord of subject and predicate (590).

(i) The Nominative is used in apposition : Mallike

Kosalarājā, Mallika, king of Kosala.

(ii) It is used absolutely in titles of books, that is, it does not take the termination proper to the nominative.: Mahājanakajātaka, the Birth-story of Mahājanaka.

2. GENITIVE.

595. The true force of the genitive is "of" and "'s" expressing possession.

 (i) The genitive therefore is used primarily to denote possession: suvannassa rāsi, a heap of gold; rukkhassa sākhā, the branch of the tree.

(ii) In such examples as the above, the genitive is often compounded with the noun it qualifies: suvan-

narāsi.

(iii It denotes the whole of which a part only is taken; this is called "partitive genitive": brāhma-nam so pandito, he is clever among brahmins; sabba-yodhānam atisūro, the bravest of all warriors; tumhā-kam pana ekcnā pi, but even not one of you.

(iv) The genitive is used also with words expressing difference, equality, inequality: tassa antaram na passimisu, they did not see the (its) difference; sadiso pitu the same as (his) father; tulyo pitu, equal to his

father.

Remark. In these examples the ablative may also be used: sadiso pitarā.

(v) Words meaning dear or the reverse, take a genitive: sā brāhmanassa manāpā, she (was) dear to the brahmin.

(vi) Likewise words denoting: honour, reverence, etc.: gāmassa pūjito, honoured of the village; rañño mānito, revered by (of) the king.

Remark. In these examples the Inst. may also be

used : gamena pūjito.

(vii) Words of skill, proficiency, etc., and their opposites, govern the genitive: kusalā naccagītassa,

clever in dancing and singing.

(viii) It is used with words indicating locality, time, distance: amhākam Buddassa pubbe, before our Buddha; gāmassa avidūre, not far from the village: upari tesam, above them.

(ix) Believing in or well disposed towards: Bud-dhassa pasanno, he has faith in the Buddha.

Remark. Here the Loc. may also be used: Bud-dhe pasanno.

(x) It is used also with words of remembering or thinking of (with sorrow), pitying, wishing for, giving or apportioning, honouring, filling, fearing and a few others: mālussa sarati, he remembers his mother (with sorrow); na tesam koci sarati, no body remembers them; telassa dadāti, he gives oil; pūrati bālo pāpassa, he fool is full of evil; sabbe tasanti dandassa, all ear punishment.

In these examples the Acc. may be used: telam dadāti.

Remark. Words of fearing also govern the Abl: kin nu kho aham sunakkā bhāyāmi?* Why should I fear the dog?

- (xi) A genitive with a participle in agreement is called a Gen. Absolute. It generally denotes some attendant circumstances: tassa bhattam bhuttassa uda-kam āharanti, when he had finished his meal, they fetched him water.
- (xii) Some other relations of the genitive will present no difficulty, as they have their exact parellel in English.
- 596. It will be seen from the remarks above that the genitive is often used instead of the Accusative, the Ablative, the Instrumentive and the Locative. It is also used adverbially, as kissa, why? It will also be remarked that whenever the genitive is dependent on a verb, it is so on account of its being used instead of another case, as in mātussa sarati.

3. THE DATIVE.

- 597. The person or object to or for whom, something is given or done, is put in the Dative case. The Dat, is consequently used also as indirect object with transitive verbs having an Acc. as direct object.
- (i) The Dat., then, expresses the relations which, in English, are usually denoted by the words to, for; bhikkhussa cīvaram deli, he gives a robe to the priest; yuddhaya paccuggacchāmi, I will set out for battle.
- (ii) the Dat, is governed by verbs expressing praise or blame, anger, believing, disbelieving, assent, envy, pleasure or displeasure, injury, benefit, approval, forgiveness, salutation, blessing, hatred, abuse, concealing, worshipping, carrying. Examples: Baddhassa silaghate, he praises the Buddha; yadi 'ham tassa kuppeyya, if I should be angry with him; duhayati disanam mogho, the flood has injured the country; tuyham saddahāmi, I believe thee; svagatam te, hail to thee! southi tuvham hotu, fare thee well! khama me, forgive me! mayhain sapale, he swears at or, reviles me; tassa sampalicchi, he assented to it; ussuyanti dujjana gunavantanam, wicked people envy the virtuous; tassa atītam āhari, he told him a story; deva pi lesam pihayanti, even the gods desire them envy them; samanassa rocate saccam, truth pleases a monk.
- (iii) The Dat, is commonly used with the verb "to be" to express possession: puttā me n'atthi, no sons are to me=I have no sons.

Remark. When the verb "hoti" is used with the Dat. to express possession, it is generally put in the

singular, even when, as in the above example, what is

possessed is plural.

(iv) The word alam, enough, fit, governs the Dat.: alam kukkuccāya, enough of doubt! alam mallo mallassa, sufficient is a warrior for a warrior!=a warrior is match for a warrior.

(v) The words, attha, object, purpose; hita, benefit, blessing; and sukha, happiness, are used in the Dat. with the meaning respectively of: for the purpose of, for; for the benefit of; for the happiness of; and they govern a Gen.: ropanassa atthaya, or ropanatthaya, for the purpose of sowing; devamanussānam hitāya, for the benefit of gods and men; tassa sukhāya, f r his hapiness.

(vi) The Dat. may denote the purpose for which, and then governs a Gen.: dārassa bharanāya, for the purpose of maintaining a wife=for the maintenance of

a wife = to maintain a wife.

Remark. It will be seen from this example that the

Dat, in ava has the force of an Infinitive.

(vii) The Dat, is also used with the verb mannai, to consider, esteem, when contempt is implied: kalingarassa tuyham manne, I consider thee as chaff = a fig for you! jivitam tinaya na manne, I do not consider life (so much) as grass = I do not care in the least for life.

(viii) The place to which motion is directed is sometimes put in the Dat.: appo saggāya gacchali, (only) the few go to heaven; nirayāya upakaddhati, drags down to hell; so mam udakāya neti, he takes me in the water.

(ix) The Dat, is often used instead of the Accusative, and also of the Locative. 598

4. THE ACCUSATIVE.

(i) The Accusative Case is generally governed by transitive verbs: ratham karoti, he makes a carriage; āhāro balam janeti, food produces (=gives) strength.

(ii) All verbs implying motion govern the Acc.: nagaram gacchali, he goes to town; Bhagavantam upasankamitvā, having approached the Blessed One.

(iii) Verbs having the meaning of, to choose, to name, to call, to appoint, to ask, to make, to know, to consider, etc., take two Accusatives, one a direct object and the other a factitive or indirect object: puriso bhāram gāmam vahati, the man carries the load to the village; purisam gacchantam passati, to see the man going; here gāmam and gacchantam are the factitive objects.

(iv) Causative Verbs likewise govern two Accusatives: puriso purisam gāmam gamayati, the man causes the man to go to the village; ācariyo sissam dhammam pātheti, the preceptor causes the disciple to read the Doctrine.

Remark. In such examples the Instrumentive may be used instead of the factitive object: sāmiko dāscna (or dāsam) khajjam khādāpeti, the master causes the slave to eat the food; purisena (or purisam) kammam kāreti, he causes the slave to do the work.

(v) When the roots; vas, to live: !hā, to stand; si, to lie down; pad to go, step: and vis, to enter, are preceded by the verbal prefixes anu, upa, abhi, adhi, ā and ni, they govern the Acc. gāmam upavasati, he lives near the village: nagaram adhicasanti, they dwell in the village; mancam abhinisīdeyya, be ought to sit on the cot; Sakkassa sahabyatam upapajjati, got into companionship with Cakra=he went to Cakra's heaven.

- (vi) The Acc. is used for the Loc.: nadim pivati = nadiyam pivati, he drinks in the river; gāmam carati = gāme carati, he roams in the village.
- (vii) The indeclinables: abhito, near, in the presence of, on both sides; dhi, dhī, Woe! Fie! Shame! as well as the expression : dhi-r-atthu, Woe, shame be to! antara, between, on the way; parilo, around, everywhere, on every side; anu, by the side of, inferior; pati, to, towards, for, near; pari, around; upa, inferior to; antarena, except, without; abhi, before, govern the Accusative: abhito gamam vasati, he lives near the village; dhi brahmanassa hantaram, woe to him who strikes a brahmin! dhi-ratthu main pūtikāyam, shame on that foul body of mine! upāyam antarena, without expedient; man antarena, excepting me; antara ca rājagaham and on the way to Rājagaha; parito nagaram, around the village; sadhu Devadatto mataram anu. Devadatta is kind to his mother; anu Saributtam, inferior to Sariputta; pabbattam unu, by the side of the mountain; sadhu Devadatto mataram pati, Devadatta is kind to his mother; nadim Neranjaram pati, near the river Neranjara; upa Sāriputtani, inferior to Sāriputta.
- (viii) Duration of time is put in the Acc.: divasam, the whole day; tam khanam, at that moment; ekam samayam, once upon a time.
- (ix) Ordinals in the Acc., denote "number of times": dutiyam, for the second time; tatiyam for the 3rd time.
- (x) Distance is also expressed by the Acc.: yojanam gacchati, he goes one league.

(xi) The Acc. is very often used adverbially: khippain gacchati, he goes quickly; hatthanillehakum bhuñjati, he eats 'licking his hands.'

Remark. This is called the adverbial accusative.

599. 5. THE INSTRUMENTIVE.

(i) The agent by whom or the instrument with which an action is performed is put in the Inst.: cak-khunā rupam passati, (one) sees forms with the eye; hatthena kammam karoti (one) does work with the hands; dāsena kato, done by the slave.

(ii) The Inst shows cause or reason; rukkho vātena oņamati, the tree bends down on account of the wind; kammunā vasalo hoti, he is a pariah by reason

of his work.

The Inst. can therefore be translated by such expressions as: by means of; on account of; through; by reason of: owing to.

- (iii) The conveyance in or on which one goes is put in the Inst.: yanena gacchati, he goes in a cart; vimānena gacchimsu, they went in a flying mansion; hatthinā upasankamati, he approached on his elephant.
- (iv) The price at which a thing is bought or sold is put in the Inst.: kahapanena no detha, give it to us for a kahāpana (a small piece of money); satasahassena kiņitvā, having bought it for 100,000 (pieces of money)
- (v) The direction of route, or the way by which one goes is shown by the Inst.: tā sāladvārena gacchanti, they went by the gate of the hall; hena maggena so gato, (by) which way did he go?
- (vi) It is used to denote infirmity or bodily defects, the member or organ affected being in the Inst: akkhinā so kāno he is blind of one eye; hatthena kuni having a crooked hand.

(vii) Words expressing, birth, lineage, origin nature, are put in the Inst.: jātiyā khattiyo Buddho Buddha is a kṣatriya by birth: pakatiyā bhaddako, good by nature.

(viii) The Inst. expresses the time in which: di-

ram gacchi, he went to the city in a month.

(ix) Also the time at which: tena samayena, at that time....

(x) It expresses companionship, and is then generally used with the indeclinables saha or saddhim, with, together with: nisīdi Bhagavā saddhim bhikksanghena, the Blessen One sat together with the

assembly of the monks.

(xi) The expressions "what is the use of," "what use to...." "what benefit by....," etc., are expressed in Pāli by the Inst. of the thing and the Dat. of the person: kin te jatāhi dummedha, what good to thee, O fool, by matted hair? kin nu me Buddhena, what need have I of Buddha?=what do I care for a Buddha?

(xii) The word attho, desire, need, want, takes an Inst. of the object desired or wanted and a Dat. of the person: manina me attho, I want a jewel (lit., to me is

need of, or desire for, a jewel).

(xiii) Alam, enough, governs also this case: alam idha väsena enough of living here: alam Bud-dhena, Bud. is sufficient for me.

- (xiv) Words denoting "separation" are generally construed with the Inst. piyehi vippuyogo dukkho, separation from those we love is painful.
- (xv) The indeclinables saha, saddhim, samam, with, at: vinā, without, except, govern the Inst. vinādosena, without fault.

Remark. Saha, sometimes expresses "equality": puttena saha dhanavā pitā, a father as rich as his son.

(xvi) Verbs meaning "to convey, to carry, to fetch etc., take the Inst. of the place of carrying: sisena dārukalāpam ucchangena pannam ādāya, taking a bunch of firewood on her head and greens at her hips....

(xvii) The Inst. is often used adverbially (see

above).

(xviii) It is also governed by many prepositions
600. 6 THE ABLATIVE.

(i) The primary meaning of the Ablative is that expressed by the word "from;" that is, it expresses separation, it expresses also many other relations, in which the principal idea of separation is more or less discernible.

(ii) Separation : gāmā apenti, they left the village;

so assā patati, he fell from the horse.

(iii) Direction from: Avicito upari, above the Avici Hell; uddham pādatala, (from) above the sole of the foot.

(iv) The place "wherein" an action is performed is put in the Abl.; in such cases a gerund is sometimes understood according to native grammarians, but the student will remark that these expressions have their exact parallel in English: pāsādā oloketi, he looks from the palace, is said to be equivalent to: pāsādam abhirūhitvā pāsādā oloketi-having ascended the palace he looks from the palace.

(v) Measure of length, breadth or distance is put in the Abl: dīghaso navavidatthiyo, nine spans long; yojanam āyāmato, a league in length; yojanam vitthā-

rato, a league in breadth.

Remark. In these examples the Inst. may also be

used: yojanam āyāmena, yojanam vitthārena.

(vi) That from which a person or animal is warded or kept off is put in the Abl.: yavchi gāvo rakkhati, he keeps off the cows from the barley: landulā kāke vāreli he wards off the crows from the rice.

(vii) With verbs meaning to "hide, conceal," the person from whom one wishes to hide is in the Abl.: upajjhāyā antaradhāyati sissa, the pupil hides himself from his preceptor.

Remark. In such expressions, the Gen. may also be used: antaradhāyissāmi samaņassa Gotamassa, I will hide myself from the samana Gotama.

- (viii) When the verb "antaradhāyati" means, to vanish, to disappear, the place from which one vanishes is put in the Loc.: Jetavane antaradhāyitvā, having disappeared from the Jetavana monastery.
- (ix) But when "natural phenomena" are referred to, the Nom. is used: andhakāro antaradhāyati, darkness disappears.
- (x) Verbs meaning "to avoid, to abstain, to release, to fear, abhor" also govern the Abl.: pāpadhammato viramuti, he refrains from sin; so parimuccati jātiyā, he is released from existence: corchi bhāyāmi, I am afraid of thieves.
- (xi) The Abl. also shews "motive, cause, reason" and can be translated by for, on account of, by reason of, through etc., vācāya marati, he died on account of his speech: sīlato nam pasamsanti, they praise him for his virtue.

Remark. In these examples, the Inst. may be used as well: sīlena pasamsanti.

(xii) It is used with words showing "proximity:" gāmā samīpam, near the village.

Remark. In these examples, the Gen. may be used.

- (xiii) Verbs meaning "to be born, to originate from" etc., govern the Abl.: corā jāyali bhayam, from a thief fear arises.
- (xiv) The following indeclinables govern the Abl.: ārakā, far from, after—ārakā tehi Bhagavā, far from them is the Blessed One: upari, above, over—upari pabbatā, over the mountain. So: pati, against, instead, in return; rile, except, without; aññatra, vinā, without, except; nānā different, away from; puthu, and, before a vowel, puthag, separately, without, except; ā, till, as far as; yāva, till, as far as; saha, with; Buddhasmā pati Sāriputto, Sar. takes the place of; Bud.: ribe saddhammā, without the true Doctrine: etc.
- (xv) It should be noted that the Abl. is very frequently used, instead of the Instrumentive, the Accusative, the Genitive and the Locative. For instance: vināsaddhammā or vinā saddhammam, or vinā saddhammena.

7. THE LOCATIVE.

- (i) The Locative shews the place in or on which a thing or person is, or an action is performed; it is therefore expressed in English by "in, on, upon, at," kate nistdati puriso, the man is siting on the mat; thaliyam odanam pacati; he cooks the food in a cookingpot.
- (li) The Loc. shews the "cause, reason or motive" of an action: dîpî cammesu haññante, the panther is killed for its skin; kuñjaro danlesu haññate, the elephant is killed for his tusks.

- (iii) If denotes the time when an action takes place: sāyanhasamaye āgato, he came in the evening.
- (iv) When the pre-eminence of an individual (thing or person) over the whole class to which he belongs, is implied, as well as with adjectives in the Superlative degree, the noun with respect to which such pre-eminence or such superlative degree of excellence is shewn is put in the Loc. or in the Gen.: manussesu khattiyo sūratamo, the kṣatriya is the most valiant of men, or manussānam khattiyo sūratamo; kanhā gāvisu sampannakhīratamā, of cows, the black one abounds most in milk, or, kanhā gāvinam sampannakhīratamā.
- (v) The following words govern the Locative and the Genitive as well, sāmī, master, owner; issaro, king, lord; adhipati, chief, lord; dāyādo, an heir, patibhū, substitute, surety; pasūto, offspring, child; kusalo, clever, expert: gonesu sāmī, an owner of oxen, or gonānam sāmī; etc.
- (vi) Words signifying "to be happy, contented, eager" govern the Loc. as well as the Inst.: ñāṇasmim ussuko, eager for wisdom, or ñāṇena ussuko; ñāṇasmim pasīdito, contented with wisdom, ñāṇena pasīdito.
- (vii) Words signifying "reverence, respect, love, delighting in, saluting, taking, seizing, striking, kissing, fond of, adoring," govern the Loc: pāpasmin ramati mano the mind delights in evil; bhikkhāsu abhivādenti, they salute the monks; pāde gahetvā papāte khipati, took him by the feet and threw him in the precipice; purisam sīse paharati, struck the man on the head.
- (viii) The Loc. is used sometimes to shew that one does not take any account of something or person: rudantasmim dārake pabbaji, he left the world in spite.

of his son weeping; The Genitive also may be used: rudantassa dārakassa pabha;i. (See Locative and Genitive Absolute).

- (ix) The Loc is employed to denote superiority or inferiority with the words "upa" and "adhi" respectively: upa khāriyam dono, a donā is inferior to a khāri; adhi Brahmadatte Pañcalā, the Pancalas are under Brahmadatta's supremacy; adhi devesu Buddho, the Buddha is above the gods.
- (x) It is used to denote "proximity": nadiyam sassam, corn near the river; tassa pannasālāya hallhimaggo hali, near his leaf-hut there is an elephant-track.
- (xi) The Loc. is used absolutely with a participle in the same case as itself (see, Absolute Construction).
- (xii) In lexicons, the Loc. is used to signify "in the sense of" ru sodde (the root) ru, is used in the sense of "making noise."
- (xiii) Words denoting "fitness, suitability" govern the Loc.-layi na yutlam, not fit for thee; the Gen. is used in the same sense: lava na yutlam.
- (xiv) The Loc. is extensively used instead of other Cases, and the students must be prepared to meet the Loc. where very often he would expect to find some other case. Let him note that in almost all instances, the Case for which the Loc. stands may be and is, used.
 - (xv) The Lcc is used for the Gen. (see, above, v).
- (xvi) It is used for the Inst.: pattesu pindaya caranti, they go about with bowls for their food.
- (xvii) It is also used instead of the Dat. sanghe dinnam mahapphalam, offering to the Clergy are very meritorious.

- (xviii) The Loc. is used for the Ablative: kadalītiesu gaje rakkanti, they keep off the elephants from the plantain-trees.
- (xix) The Loc. is frequently used adverbially; atte, formerly.

8. THE VOCATIVES.

- 602. The Vocative case does not require any explanations: it is used exactly as in English.
 - 603. THE GENITIVE AND LOCATIVE ABSOLUTE.
- (i) When a noun or a pronoun in the Localive or Genitive is used with a participle in the same case as itself, the construction is called Localive Absolute and Genitive Absolute respectively. The Locative Absolute construction is met with much more often than the Genitive absolute construction. There is also found, now and then, a Naminative Absolute construction but far less common than the other two.
- (ii) The Locative, Genitive and (sometimes) the Nominative Absolute, may often be translated by "when, while, since and sometimes by "although:" tesu vivadantesu Bodhisatto cintesi, while they were disputing, the Future Buddha thought; suriye atthangate, when the sun had set =after sunset; gāvīsu duyhamānāsu gata, he went when the cows were being milked; asaniyā pi sise patantiyā, although the thunder bolt was falling on their head.
- (iii) Sati, the Locative singular of santo Pres. Part. of the verb atthi, to be, besides having the above meanings, may also often be translated by "if," "such being the case": atthe sati, if there be need; evam sati, such being the case; payoge sati, when there is occasion. With feminine words, sati is also used, although it should be satiya (fem): pucchaya sati,

if the question be asked, ruciyā sali, had he the desire, if he had the wish.

- (iv) The Genitive Absolute is not quite so frequently used as the Loc. Absolute, although found often ennough: sākunikassa gumbalo jālam mocentass' eva, even while the fowler was disengaging the net from the bush: tesam kilantānam yeva suriyatthangatavelā jātā, while even they were sporting, it became dusk.
- (v) There is also mentioned a so-called Nominative Absolute* gacchanto Bhāradvāja sa, addasā ajjhutam isim, Bhāradvāja having gone, he etc., yāyamāno mahārājā addāsī tantarena gc, as the king was going, he. . . . , etc.

Remark. The Gen. Absolute is frequently used to shew "disregard, contempt," it can then be translated by "in spite of, notwithstanding." For example see above (p. 313, viii).

604. SYNTAX OF THE ADJECTIVE.

- (i) As has already been said, whenever an adjective is not in composition with another word, it must agree with the word it qualifies in number, gender and case.
- (ii) Adjectives in the comparative degree require an Ablative; sīlam eva sutā seyyo, virtue is better than learning.
- (iii) Comparison is also expressed by an Abl. followed by an adjective in the positive degree: mā-dhūrā pāṭaliputtakehi abhirupā, the people of Madhura are more handsome than those of Pāṭaliputta.

- (iv) It is also expressed by the indeclinable varam, better, with an Abl.: tato varam, better than that.
- (v) When "the better of two" is to be expressed, a Gen. is used with the positive degree: tumhākani dvinnani ko bhaddako, of you two who is the better?
- (vi) Superlative adjectives are used with the Gen. or the Loc., for examples see above (Locative, iv, p. 313).

(vi) SYNTAX OF PRONOUNS.

605. 1. Personal Pronouns.

- (i) The personal pronouns are used much in the same way as in English, and do not call for particular remarks, except, perhaps, the enclitic forms of aham and team (289-b, c; 230-c).
- (ii) The enclitic forms of aham: me and no, and those of tvam: te and vo, are never used at the beginning of a sentence nor immediately before the particles cu, vā and eva; detu me, let him give to me; tava vā me hotu, be it thine or mine; kammam no nitthitam, our task is finished; ko te doso, what is thy fault? kaham vo rājā, where is your king?
- (iii) With verbs, the personal pronouns are frequently understood, as the endings of the tenses clearly indicate also the person as: gacchati (he) goes = so gacchati; gaccheyyāmi, (1) should go = aham gaccheyyāmi, etc.
- (iv) The personal pronoun so, sā, taṁ is also used as a demonstrative and as an article. See Concord (589). Therefore, so puriso may mean, according to the context, the man, or, that man.

- (v) Tasmā (Abl.), is used adverbially in the sense of "therefore, accordingly, thereby": with the same meanings it is also followed by hi and ti ha (+iti ha): tasmā hi paññā ca dhanena seyyo, and therefore is wisdom better than riches; tasmā ti ha bhikkhave, accordingly, O! monks.
- (vi) The Inst. tena is used with the same meanings as tasmā: tena tañ madhurañ, therefore, on that account, it is sweet. Tena followed by hi means "well! very well! all right! well then!" tena hi khādāpessāmi nan ti, very well, then, I'll make you devour him.
- (vii) Naih and enaih (295, 300), are used when something or some one already mentioned is referred to. See (296).

606. 2. Demonstrative Pronouns.

 (i) Eso, esā, etam (298), refer to what is near, and mean: this, esā itthī, this woman; nirupakāro esa, this (fellow) is useless.

The same remarks apply to ayam and asu, this. Remark. Esa is often used for eso, sa for so.

(ii) The neuter etad (=etath, 302), is used with the verb hoti and the Gen. of the person, and the expression is then equivalent to "to think": tassa etad ahosi, he thought.... (lit=of his this was).

607. 3. The Relative.

- (i) We have already explained the Relative (592); only a few of its most important peculiar uses need be mentioned here:
- (319): Yo koci, whoever, anyone; yan kiñci, what-soever, anything. See (314-a, b).

- (iii) The neut. sing. yam is frequently used adverbially in the sense of "as, that, because, since, seeing that, if, when;" tam bahum yam pi jīvasi, it is much that thou livest.
- (iv) The Inst. yena is used as an adverb, meaning "whereby, by which, for which, because": yena nam ganhissāmi, by which I shall catch him.
- (v) When motion to a definite place is expressed yena, where, is used with tena, there: yena Bhagavā, ten' upasankati, he went to Buddha (lit. = where was Buddha there he approached).

(vi) yasmā (Abl.) is used in the sense of "because" and is then generally followed by tasmā, therefore; yasmā train na jānāsi tasmā bālo 'sī ti, because thou

doth not understand, therefore art thou a fool.

508. 4. The Interrogative.

(i) The interrogative pronoun ko (316), may be used by itself or with a noun or pronoun: ko pana tvam, who art thou? ke ete, who are these? kā dārikā, which girl?

(ii) Kena (Inst.) used with attho and the Dat. of the person, forms such expressions as "what do you want"? etc.,: kena te attho, what are you in need of?

- (iii) Kena (Inst.) kasmā (Abl.) and kissa (Gen.) are used adverbially with the meaning of "why? wherefore?"
- (iv) Kim is much used with the Inst. to express "what is the use of!: kim me jīvitena, what is the use to me of life?

5. The Indefinite.

609. The indefinite pronoun (319) does not present any peculiarity: mā idha koci pāvisi, let nobody enter here; kiñci bhayam, any danger.

(VII) REPETITION.

oto. To express "plurality, totality, distribution, variety, multiplicity, etc., words are sometimes repeated: tesu tesu thānesu, in various places; tam tam kathayamānā, saying this and this. Yo, thus repeated means "whoever, whatever whichever": yam yam gāmam, whatever village; itarā ten' eva niyāmena yā yā kiñci katheti tassa tassa upari kacavaram chaddesi, and in this way the other (women) threw the refuse on whomsoever said anything; so dillhadillhamanusse jīvitakkhayam pāpeti, he kills all whom he sees; gatagalatthāne, in every place; yena kena, by whatever; ubbāhīyati so so, every one is put to flight.

611. (VII) SYNTAX OF VERBS.

- (i) The Concord of the verb with its subject has already been noticed (590, 1st).
- (ii) The Present Tense denotes an action taking place now, a fact existing at the present time: so bhāyati, he is afraid; sā pacati, she cooks.
- (iii) The Present Tense often expresses the continuance of an action and is equivalent to the present progressive: sā gabbhe nisīdati, she is sitting in her private room.
- (iv) Habit, custom and general truth, are expressed by the Present Tense: sabbe maranti, all (men) die; bhikkhu sīlam ācarati, a monk practises virtue.
- (v) The present is sometimes used with a future signification: Kim karomi, what shall I do?
- (vi) The present is extremely frequent in narrations when recounting past events as if they were actually happening, this is called the Historical Present,; so pañcamāṇavakasatāni sippam ugganhāpeti, he taught five hundred young men (lit., he teaches, etc.)

(vii) When no interrogative particle is used interrogation is sometimes expressed by placing the present tense at the beginning of the sentence: socasi train upāsaka, grievest thou, O layman?

Remark. Other tenses may also be used in the same way to mark interrogation.

612.

THE PAST TENSE.

Perfect, Imperfect and Aorist.

- (i) The Perfect and the Imperfect tenses present no difficulty, they are as a rule used in the sense of a general past, and they do not require any notice. Let it be borne in mind, however, that the perfect is but seldom used; that the Imperfect, though more frequent than the Perfect, does seldom differ from it in meaning, and last, that the Aorist has generally displaced these two tenses and superseded them.
- (ii) The Aorist is the principal past tense in Pāli and is therefore extensively used; it expresses indefinite past time, but also includes the present day. The Aorist may be translated by the Present Perfect or the Past Indefinite (See 405): caluppādā pi cham sīham rājānam akamsu, the quadrupeds made a lion king: mukhe pahari, struck him on the mouth; kena kārunena rodi, why did you cry? brāhmaņo eļakena saddhim vicari, the brahmin walked about with the goat.
- (iii) The indeclinable mā is used with the Aorist to express prohibition: elaka, mā bhāyi, O! goat, fear not? mā puna everāpām akāsi, do not do so again; tāta, mā gami, dear son, do not go.

613. FUTURE TENSE.

(i) The Future expresses simple futurity: ahane gacchāmi, I shall go; te marissanti, they will die.

- (ii) The future is also used as a mild form of the Imperative, when courteously giving a command: team tassa bandhanam dantchi khādissasi, cut his bonds with thy teeth.
- (iii) The future is used to express simple condition, with the particles ce, sace and yadi: yadi tvain yā-gum pacissasi aham pivissāmi, if thou wilt cook the gruel, I shall drink it; so tañ ce labhissati, tena saddhim gaccha, if he get it, go with him.
- (iv) Bhavissati, the 3rd, pers. sing. of bhavati, to be, is often used in the sense of "it must be that....: corā paṭhamam neva bherisaddam sutva issarabheri bhavissatī ti palāyitvā, the thieves on first hearing the beating of the drum, (said) 'It must be the drum of an official' and fled; ayam me putto bhavissati, he must be my son.
- (v) bavissati preceded by the negative particle narmay be translated by "it cannot be": nayam issarabheri bhavissati this cannot be an official's drum.
- (vi) Jānissāmi, the 3rd. pers. sing. of jānāti, to know, is often used idiomatically in the sense of "l'll see": hotu, pacchā jānissāmi, let it be, l'll see (to it) afterwards.

614 THE OPTATIVE.

- (i) The Optative expresses "probability, capability, fitness, assent or permission, command, wish, condition" and is also used in laying down rules and precepts.
- (ii) Fitness: tvam tattha gaccheyyāsi, you should go there.
- (iii) Wish: aham imam tunhākam bhājetvā dadeyyam, I would divide and give it to you, but....

- (iv) Command: tvam pana ito patthāya ovādānusāsaniyam dadeyyāsi, but thou henceforward give us instructions and admonitions; udarena nipajjeyyāsi, lieon thy belly.
- (v) Probability: api ca nāma gaccheyyāmi, I maygo.
- (vi) When expressing condition, it is sually preceded by "ce, sace or yadi,": sāmi, sace imāyavelāya tava sapatlain passeyyāsi, kin ti tain kareyyāsi? lord, if, at this time, thou shouldst see thy enemy, what wouldst thou do to him?
- (vii) To express supposition, the word yathā issometimes used with the Optative: yathā mahārāja kocid eva puriso padīpam padīpeyya....., were, mahārāja, a man to light a lamp....
- (viii) Asssent: tvam idāni gaccheyyāsi, thou mayest now go.

THE CONDITIONAL.

- 615. The Conditional expresses an action unable to be performed on account of some impediment in the way of its execution: so ce tam yānam alabhissa agacchissā, he would go if he could get that vehicle; bho satthavāsino, sace esa rukkamūle cankamanatāpaso ajja nābhavissā, sabbe māhavilopam pattā abhavissatha, O! merchants, had not to-day this ascetic been walking to and fro at the foot of this tree, you should all have been completely pillaged.
 - 616. THE IMPERATIVE.
- (i) The Imperative is used in giving commands: tena hi, gaccha, very well, go!
- (ii) It expresses entreaty: Bhante Bhagavā appossukko viharatu, Lord, let the Blessed One now live free from cares.

- (iii) Benedictions, blessings: vassasatam jiva, may you live a hundred years!
- (iv) With mā prefixed, the Imperative 2nd person expresses simple prohibition (cf. Aorist 612, iii) mā evam karotha, do not do so!
- (v) The Imperative 3rd person sing. of bhavating to be, is often used idiomatically, with the meaning of "very well": hotu, aham jānissāmi, very well, I'll see (to it).

617. THE INFINITIVE.

- (i) The Infinitive shews "purpose, motive, intention" It is used actively as well as passively. Uyyāna-pālo chaddetum upāyam na passoti, the gardener saw no means of throwing (them) away: tam gantum na dassāmi, I will not let him go.
- (ii) The infinitive is used with verbs meaning "to wish to try or strive, to begin, to be able": sā roditum ārabhi, she began to cry; na koci mayā soddhim salla-pitum sakkoti, no one can converse with me; sā pavisitum na icchati, she did not wish to enter; so lam ukkhipitum ussahati, he endeavoured to lift it.
- (iii) The verb dadāti, to give, after an Inf. means "to let, to allow" and the verb labhati, to obtain, means "to be allowed": tam paharitum na dassāmi, I will not allow him to be struck; gehabahi nikkhamitum alabhanto, not being allowed to go out of the house....
- (iv) Verbs like vattati, to behove, to be fit, proper, and adjectives like yutto, having the same meaning, are much used with the Inf.; in the case of vattati, the Instrumentive is used of the person who ought to do the act: ettha dāni mayā vasitum vattati, it now behoves me to live here; it is used also impersonally: tam

hantum valtati, the best is to kill him = it is proper, fit, to kill him. Evam kathitum na yuttam, it is not proper to speak thus.

- (v) The indeclinables labhhā, possible, allowable, and sakkā, possible, able, are used with the Inf.: sakkā is used much in the same way as vaṭṭati, that is, actively or passively, and often with the lnst. of the person; the verb hoti frequently follows sakkā: sakkā hoti methunam dhammam patisevitum, it is possible to practise fornication; etasmim thāne na sakkā vasitum, it is impossible to live in this place; idam na labbhā evam kātum, it is not possible to do it in this way.
- (vi) When kāmo, wishing, desirous, is compounded with an Inf., final m of the Inf. is dropped: devatāya balikammam kārctukāmo, wishing to make an offering to the god.

618. THE GERUND.

(i) The Gerund always denotes an action completed before another; it may be translated by the word "having" followed by a past participle as: gantvā, having gone; or by the past tense followed by the conjunction "and": gantvā, he went and......., the gerund, therefore, being very extensively used, is the most common connective in Pāli, and practically does away with the Pāli conjunction equivalent to the English "and" connecting two sentences. So tam ukkhipitvā gharām netvā catudhā vibhajitvā dānādīni puñāāni katvā yathākammam gato, he lifted it up, took it home, divided into four parts and, practising alms-giving and other good deeds, went according to his deeds.

- (ii) The word va (=eva) following a gerund, may be translated by "as soon as ': tam vacanam sutvā, va as soon as he heard these words......; so vānaro, attano puttam disvā va, the monkey, as soon as he saw his offspring....
- (iii) The particle "api" coming after a gerund, may be translated by "although": akataññū puggalocakkavattirajjam datvā pi tosetum na sakkā, an ungrateful man cannot be satisfied although he be given universal sovereignty.
- (iv) Before a gerund, a may be translated by "without": papancam akatvā, without making delay = without any delay; ckam pi akilametvā, without harming even one person.
- (v) Some gerunds are used prepositionally; the principal of them are: patthāya, since, beginning from, from, after; sandhāya, with reference to, concerning; ārabbha, concerning, with reference to; sincicca, intentionally; asallakkhetvā, inadvertently, unawares; nissāya, upanissāya, on account of, through, near; ādāya, with; paticca, by, through, on account of; thapetvā, except, excepting.

(vi) The Gerund may sometimes be translated by the present participle; īdha āgantvā aham coram

passim, coming here I saw the thief.

(vii) The Gerund may have a passive signification: corajetthakena gahetvā, having been seized by the robber chief.

THE PARTICIPLES.

619. 1. The Present Participle.

(i) The Present Participle may generally be translated by "while, whilst," which sense is inherent in it; this participle always expresses contemporaneity of action: altano gāmam gacchanto corāţavim patvā, while going to his village he came upon a forest inhabited by thieves; tattha gantvā mātaram paṭijagganto vāsam kappesi, he went and, taking care of his mother, took up his abode there.

- (ii) It must be remembered that participles are of the nature of adjectives (439) and must agree with the word they qualify in the same way as adjectives: avī-cinirayam gacchantā sattā.......persons going to the Avīci Hell; āgacchantam tam disvā pi, although he saw him coming....
- (iii) The Present Participle is sometimes used substantively, and may be translated by "he who" (does the action expressed by the verb): idam fana paralokam gacchantassa pātheyyam bhavissati, but this will be provisions for him who goes to the other world; paralokam gacchanto cham kahāpanam pi ganetvā na gacchati, he who goes to the other world does not take even one farthing with him.
- (i.) The Present Participle may also sometimes be translated by a conditional clause: tam lubhanto jīvis-sāmi alabhanto idh' eva marissāmi, if I obtain her I shall live; if not, in this very spot shall I die; addhamāse sahassam labhanto upatthahissāmi deva, if I get a thousand every fortnight, I'll serve thee, Lord; evam karonto lacchasi akaronto na lacchasi, if you do so you'll get it, if not, you will not get it.
- (v) The particle pi (=api) following a pres. part. may be rendered by "although": pitarā vāriya māna pi, although prevented by his father; tam a passanto pi, although not seeing him.

620 2. The Past Participles.

- (i) There are two Past Participles, the Perfect Active (231, 465) and the Passive Perfect (450, ff).
- (ii) The perfect active participle presents no difficulty whatever: so sī ham ādinnavā, he having captured the lion; bhattam bhuttāvī, having taken his meal.
- (iii) The passive perfect participle is very often used as a predicate instead of a finite verb (see Concord of Subject and Predicate 590); it can then be translated by a past tense.
- (iv) The P.P.P. of roots implying motion, and of transitive roots, takes an accusative; sakanivāsam eva galo, he went to his own place.
- (v) When the P. P.P. is thus used predicatively, the verb "hoti," to be, is generally understood after it.
- (vi) The agent of a P.P.P. is as a rule put in the Instrumentive case: tayā paitham puttham, by her the question was asked she asked the question; sāsanam mayā likkhitam, a letter has been written by me =: I have, etc.
- (vii) Not seldom the P.P.P. may be translated by a pres. participle: tato uppatito vijjullatā viya vijjotamāno paratīre atthāsi, springing from there, he reached the other shore as a lightning flash.

621. 3. The Future Participle.

(i) The Future Participle (449) denotes that the agent is about to perform the action or undergo the state expressed by the root: ratthā rattham vicarissam, I am going (=I am about to go) from kingdom to kingdom; tam gantham racissam aham, I am about to compose that book.

- (ii) It also shews purpose, intention, as may be seen by the 2nd example in (1) above.
- (iii) It shews simple futurity: nâham puna upessam gabbhaseyyam: I shall not be reborn again.

622. 4. The Future Passive Participle.

- (i) The Future Passive Participle conveys the idea of "fitness, necessity, obligation;" it denotes that what is expressed by the root is to be, or ought to be, or is fit to be or must be done or undergone: mayā kattabbain kammain nitthitam, the work which was to be done by me is finished; sace so deso uklāpa hoti so deso sammajitabbo, if the place be dirty it ought to be swept; na navā bhikkhū āsanena patibāhetabbā, young monks should not be ousted from their seat.
- (ii) From the above examples, it will be seen that the F.P.P. must agree with the subject in gender, case and number.
- (iii) It is much used impersonally: kinnu kattabbam, what is to be done? ettha ca imāni suttāni dassetabbāni, and in this connection, these passages (from the Scriptures) should be pointed out: iminā nayena veditabbo, it must be understood in this way.
- (iv) It will be, from the above examples, remarked, that the agent is put in the Instrumentive.
- (v) Bhavitabbam, used with the Inst. of the thing of person, is frequently used in the sense of "it must be that, one should or ought to": majjhatten" eva bhavitabbam, one should be indifferent to..., visayojitāya etāya bhavitabbam, this must have been mixed with poison.

623. (ix) SYNTAX OF INDECLINABLES.

(i) The following are used correlatively:-

yathā, as....tathā, so; yāva, so long....tāva, that long = as long as: yadā, when....tadā, then; yattha, where....tattha, there.

(ii) ca....ca...., both....and, so ca ahañ ca, both he and I.

vā....vā ..., whether....or: bhāsati vā karoti vā, whether he speaks or acts.

pi....pi...., both.. and: viñcati pi siñcapeti pi, both sprinkles and causes to sprinkle.

- (iii) ca...ca...., and vā...vā....when in a negative sentence, are equivalent to: neither....nor.
- (iv) ca and vā used singly, never come at the beginning of a sentence.
- (v) eva, and, before a vowel yeva, is used to emphasize the idea expressed by a word, and may be translated by "very, just, quite, exactly, as soon as": idāni eva, just now; altano yeva, one's very own. Yeva coming after a verb is not always easy to translate into English, but in the majority of cases, it may be rendered by "on, to go on, continue," etc.: kathenti yeva, they went on talking.
- (v) Yadi, if, is used in conditional sentences with the Present, the Future, the Optative and the Conditional. Yadi evam, yajj' evam=if so, in that case; vā....yadi vā...=whether...or...,gāme vā yadi v' ūraññe, whether in the village or in the forest.

Remark The syntax of the most important indeclinables has been given in "Syntax of Substantives."

624. Direct and Indirect Narration.

- (i) The oblique construction in Pāli is expressed by placing the particle iti, so, thus, after the words in the direct construction as they would stand in English, that is, at the end of the words quoted: kaham so clarahi ti pucchi, he asked "Where is he now?"
- (ii) Iti is generally abbreviated to ti, and the last vowel of the quotation, if short, is lengthened before it: sādhū ti, he said "very well!"
- (iii) Verbs of "saying, telling, asking, naming, knowing, thinking," are generally used with iti: those verbs may be:
- (1) Placed after the particle iti: Te "Sadhû" ti vatvā, they said "Very well."
- (2) Before the words quoted: so pucchi "kim jānāsi wan" ti, he asked "What do you know?"
- (3) The verb, is frequently omitted altogether: "māressāmi nan" ti, (he thought, or said) 'I'll kill him!"
- (iv) When iti or ti, is followed by a vowel, sandhi takes place regularly: iti + evam = iccevam; kvaci + iti = kvacîti
- (v) Often, iti has the sense of "because, with the intention of" shewing "cause, motive, intention, purpose:" "jīvitum asakkontā" ti because (we) are unable to make a living; "makasam paharissāmi" ti pitu malthakam dvidhā bhindi, intending to kill the mosquito he broke his father's head in two.

625 INTERROGATION AND NEGATION.

(1) The negative particle is na: imasmin sare udakam n' atthi, there is no water in this lake; na

aññāsi, didst not thou know? sellhinā sadddim kathetum na sakkomi, I am unable to speak with the banker.

- (ii) With an Optative, na is used in prohibition: na hatthisālam guccheyya, let him not go to the elephant-shed.
- (iii) Na may form the first part of a compound; nāgamanam (=na+āgamanam), non-arrival; nabhikkhu, a non-priest = a layman.
- (iv) Two negatives make an affirmative: bherim na na vādeyyā, not that he may not beat the drum (he may therefore beat it).
- (v) No is also used in negation in the same way as na: no jānāti, he does not know.
- (vi) No followed by na expresses a strong affirmative: no na dhameyya, he should surely blow (the conch); no na ppahoti, he is most certainly able.
- (iii) Interrogation is expressed by using interrogative adverbs or pronouns as kasmā, why? wherefore? kissa, kena. why? ko, who? etc.
 - (iii) Also by means of interrogative particles.
- (ix) Api, when used in interrogation, is always, placed first in the sentence: Ap' āvuso amhākam satthāram jānāsi, do you, Sir, know our Teacher?
- (x) followed by nu kho, it expresses a very emphatic interrogation: Api nu kho koci upaddavohoti, well, have you any cause of distress?
- (xi) Nu, I wonder! Pray? Nu, is often followed by kho: kīdiso nu kho paraloko, I wonder what the next world is like? corā nu atthi, are there thieves?
- (xii) Preceded by na, it expresses emphatic interrogation: na nu 'ham yodho, am I not a warrior?

- (xiii) Interrogation is also expressed by placing the verb first in the sentence: socasi upāsaku, grievest thou, layman?
- (xiv) Sometimes the mere tone of voice is sufficient to express interrogation: supam labhi, didst thou get broth?

INTERJECTIONS.

- (i) The principal interjections are: hā, alas! ah! handa! come! ahga! indeed! oh! bho, friend! Sir! I say! hare, sirrah!āma, yes! truly! indeed! aho, alas! oh! (cf. p. 244.)
- (ii) Bhave, first pers. sing. Reflective, of bhanati, to say, is used as an interjection with the meaning of "to be sure! I say, there!"
- (iii) Manne, 1st, pers. sing. Reflective of mannati, to think, is also used as an interjection in the sense of "methinks! I dare say! I suppose!

CHAPTER XV.

626. Prosody is that part of Grammar which treats of the laws of versification.

A gāthā, in Pāli poetry, is a stanza.

A pādu is the fourth part of a stanza, called also "a quarter-verse."

A vanna is a syllable in a pāda.

A short syllable is termed lahu.

A long syllable is called garu.

A foot is termed gana.

627. The mark \sim represents a short syllable, and the mark — a long syllable. A foot containing two long syllables is termed $g\bar{u}$, that is, ga + ga, the initial sylable ga of the word garu being used to represent a

long syllable; a foot of two short syllables is termed $l\bar{a}$, that is la+la, the initial syllable of the word lahu being employed to represent a short syllable.

628. The following are the four varieties of dis-syl-

labic foot:

Syllables.	Pāli.	English.
~ ~	la la or lā.	Pyrrhic.
	ga ga or gā.	Spondee.
~ - I	la ga.	lambus.
	ga la.	Trochee.

629. The eight-syllable feet, known in Pali as the atthagana are as follows:

Syllables.		es.	Pāli designation.	English designation					
_	_6	_	ma.	Molossus.					
-	-	_	na.	Tribrach.					
_	_	_	bha.	Dactyl.					
-	_	_	ya.	Bacchic.					
-	-	_	ja.	Amphibrach.					
_	_	-	sa.	Anapaest.					
_	_	_	ra.	. Cretic.					
_	_	-	ta.	Antibacchic.					

SHORT AND LONG SYLLABLES.

630. The short vowels in Pali are a, i, u, the long vowels are \bar{a} , $\bar{\imath}$, \bar{u} , e, o. When a, i or u is followed by a double consonant, it is prosodically long. For ins-

nance, the first as well as the second a in cakkanca is long because followed by kk and nc respectively. Before niggahita (m) a short vowel is also always prosodically long. Thus in succam, the u before m is long. In poetry, a naturally short vowel is occasionally lengthened and a naturally long one shortened to meet the exigencies of the metre. In order to make a short vowel long, the consonant following it is sometimes sloubled.

VARIETIES OF METERS.

631. There are three classes of metres, termed Sama, Addhasama and Visama. When the syllables in all the padas are exactly alike, the metre is called Sama; when those in the first and third and those in the second and forth padas are alike, it is termed Addhasama; and when all the padas or verses are different, the metre is termed Visama.

1. THE SAMA CLASS.

632. In gathas of this class, the syllables in each pada may range from six up to twenty-two. The names of the seventeen kinds of metre are as follows:

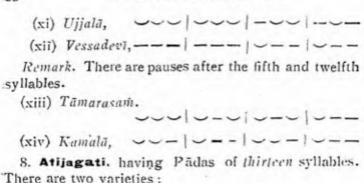

Gāyatti	— 6s	yllables	Sakkarī	-14	syllables
Unhi	- 7	,,	Atisakkarī	15	,,
Anutthubh	an— 8	.,	Atthi	-16	11
Brahati	- 9		Atyatthi	-17	,,
Panti	-10		Dhuti	-18	,,
Tutthubhau	m —11	,,	Atidhuti	-19	,,
Jagati	I2	,,	Kati	20	11
Atijagati	13	,,	Pakati	2 I	11

Akati-22 syllables.

633. These are again subdivided according to the kind of feet employed in each stanza; as the four padas are similar, the scheme of only one pada is given for each kind of metre:

r. Gāyatti, having Pādas of six syllables. There-
is one variety.
Tanumajjhā — — U U — —
2. Unhi, having Padas tof seven syllables. There-
is one variety:
Kumāralatitā, v — v v v — —
3. Anutthubham, having Padas of eight syl-
lables. There are five divisions:
(i) Citrapada, !
(ii) Vijjummālā, ——— ——— ——
(iii) Mānavakam
(iv) Sāmaņikā, —
(v) Pāmānīhā
(v) Pāmāņīkā,
are two varieties:
(i) Halamukhī
(ii) Bhujagasusu
5. Panti, having Padas of ten syllables. There-
are seven varieties:
(i) Suddhavirājitam, — — -
(ii) Panavo,
(iii) Rummavali,
(iv) Mattā,
(v) Campakamālā
(vi) Manoramā,
6. Tutthubham having Padas of eleven syllables
There are eleven varieties:
(i) Upatthitā,
(ii) Indavajirā,
(iii) Upavajirā,

Remark. When the quarter verses of Indavajira and
upavajirā are mixed together in a stanza in any order,
the stanza is then called Upajāti .
. (iv) Sumukkī
(v) Dodhakam,
(vi) Sālinī, ——— ——— ———
(vii) Vātummissā,
Remark. There are pauses after the fourth and
seventh syllables:
(viii) Surasasiri,
(ix) Rathoddhatā
(x) Svāgatā, ————————————————————————————————————
(xi) Bhaddikā,
7. Jagati, having Padas of twelve syllables.
There are fourteen varieties:
(i) Vanisalthu, ~-~!!~-
(ii) Indavamsā,
(fii) Totako,
(iv) Dutavilam-
bita,
(v) Pu(a,
Remark. There are pauses after the fourth and
twelfth syllables.
(iv) Kusumavicittā,
000 0 000 0
(vii) Bhujan gappayāta,
V V V
(viii) Piyamvodā
(ix) Lalitā,
(x) Pawilahhhari

(i) Pahāsinī,

Remark. There are pauses after the third and thirteenth syllables-

(ii) Rucirā,

N.B.—There are pauses after the fourth and thirteenth syllables.

Sakkari, having Pādas of fourteen syllables.
 There are three varieties:

(i) Aparājitā,

Remark. There are pauses after seventh and fourteenth syllables.

(ii) Pharanakalika,

Remark. There are pauses after the seventh and fourteenth syllables.

(iii) Vasantatilakā,

There are four varieties:

(i) Sasikalā,

(ii) Manigunanikaro,

10. Atisakkari, having Padas of fifteen syllables

fifteenth syllables.	
(iii) Malinī.	
Remark. There is a pause after the eighth syllable.	
(iv) Pabhaddakam,	
11. Atthi, having Pādas of sixteen syllables. There is one variety: Vāninī,	
There are three varieties: (i) Sikharinī,	
Remark. There are pauses after the sixth and seventeenth syllables. (ii) Harinī,	-
*Remark. There are pauses after the sixth, tenth and seventeeth syllables. (iii) Mandakkantā,	

13.	Dhuti,	having	Pādas	of	eighteen	syllables.
There	is one v	ariety:				

Kusumitalatāvellitā,

14. Atidhuti, having Pādas of nineteen syllables.
There are two varieties:

Remark. There are pauses after sixth, thirteenth and nineteenth syllables.

(ii) Saddūlavikkīlitī, ---| --- | ---- | ---- | ---- |

Remark. There are pauses after the twelfth and nineteenth syllables.

Kati, having Padas of twenty syllables. There is one variety.

16. Pakati; having Pādas of twenty-one syllables. There is one variety:

Saddharā, ____ | ___ | ___ | ___ | ___ |

17. Akati, having Padas of twenty-iwo syllables. There is one variety:

Bhaddaka,

2. THE ADDHASAMA CLASS.

634. In the Addhasama class of metres, the first and the third, and the second and fourth padas are similar. The following table shews eleven kinds of metres that come under this head:—

Name of metre.	Odd quarter- verses. ist—3rd.								Even quarter- verses. 2nd-4th.												
Upacitta	0	o	- 1	0 0	٠.	. 0	0	-	O	-	-	O	0	-	0	0	-	o	0	-	-
Ratamajjhā	-	0	0	- () () -	0	0	-	-	o	0	0	0	-	0	0 -		0 0	-	-
Vegavatī	0	0	-	0	O	-	O	0	-	-	-	O	O	-	0	0	-	0	o	-	
Bhaddavirājam	-	-	O	O	-	0	-	O	-	-	-	-		0	0	-	0	_	0	_	-
Ketumatī	o	O	-	0	-	O		O	-	-	-	0	O	-	0	-	0	0	O	-	
Akhyānikā	-	-	0	-	-	0	Ŋ	. 0	-		0	_	o	-	-	O	O	-	O	-	
Viparītapubba	0	-	0	-	-	0	0 -	- 0	-	-	-	-	0	-	-	o	O	-	o	-	-
Hariņaplutā	0	0	-	0	0	-	0 () -	0	-	0	0	0	-	0	o	- (0 0	- د	o	
Aparavutta	0	0	o	o	0	ο.	. 0	-	O	-	0	o	0	o	-	0	0	- (٠ -	O	-
Pubbitaggā	0	0	0	0	0 (0	- (0	-	O	O	0	o	-	0 0)_	0	- 4	-	
Yavádikāmatī	0	-	0	- () -	O	-	0-	O	-	-	o	- 4	٠.	. 0	-	0	- (0 .	0	-

Remark. The Aparavatta corresponds to the Vetāliya explained, referred to lower down.

3. THE VISAMA CLASS.

635. The Padas in this division of verses are all dissimilar. Under this head comes the metre known as

the vatta, the heroic measure of Pali literature. eight syllables being employed in each pada, the first and last syllables therein being free, that this, a short or long syllable may be optionally used in those syllables. The syllables between the first and last, formtwo seat, haviny *three syllables in each seat or foot. In the first seat in all the quarters, any foot may be employed except a Tribrach and an Anapaest, that is to say, three short syllables (o o o) or two short and one long (o o -) must not be used. the second seat of the first and third quarters, any foot may be used, but in the second seat of the second and fourth quarters only va (Bacchie) or ja (amphibrach) (i.e., v -- or v - v) must be employed. It should be noted, however, that the vatta proper has ja in the second seat of both the second and the fourth padas.

Remark. The sign up means, that the syllable may optionally be short or long.

636. (i) Vatla proper.

Free.		IS	eat.	Free.				
ıst pāda	0	0	0	0	0	0	0	0
2nd ,,	0	0	0	_0	0	_	0	0
3rd ,,	0	0	0	0	0	0	0	0
4th ,,	0	0	0	0	o	_	0	0

637. Sometimes the Gatha contains six Padas - the fifth following the rule for the first and third; the sixth that for the second and fourth.

638. Besides the Vatta Proper above shewn, there are eight kinds of vatta metres:

This Metre (vi) is also called Pathyāvatta.

639 JATI STANZAS

640. Besides the metres noted above, there are some that are regulated by time (kāla). Such metres are termed Jāti. They are of three kinds:—

- (a) Ariyā.
- (b) Vetāliya.
- and (c) Mattāsamaka.

641. In the first of these, the Ariya, the first two padas or half a gatha contain seven and a half feet; in the even, that is, the second, fourth, and sixth feet any of the following, namely, Ba, Ja, Sa, Ga, or four short syllables may be employed, but Ja must not be used in the odd feet, that is, in the first, third and fifth. The sixth foot may be Ja, or four short syllables. The second half stanza must fulfil the same conditions. It is necess sary to observe that in the jati metre a foot consists of four syllabic instants, the time taken up in pronouncing a short syllable being taken as an instant of time; thus a long syllable being taken equal to two short ones, each foot used in the Ariya is equal to four syllabic instants. The following is an illustration of an Ariya stanza:—

	1st Foot.	2nd	3rd	4th	5th	6th	7th	toot:
First half		0000		00-		6-0	- 0 0	
Second half	00-		••			U		-

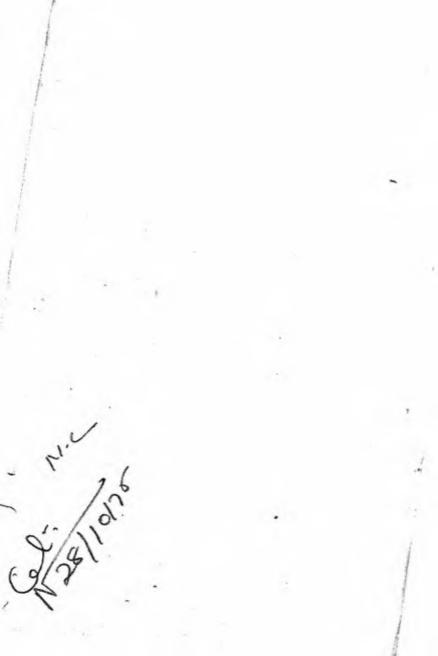

642. The Vetāliya is so formed that it usually consists of fourteen syllabic instants in the odd quarters and sixteen in the even, while the Mattāsamaka consists of sixteen syllabic instants in each quarter. The metres of the Jāti class furnish many varieties, but it is not within the scope of this work to treat of them in detail. As, however, the Vetāliya is of rather frequent occurrence, we give below the scheme of it. Each pāda is divided into three seats; the 1st seat in the 1st and 3rd pādas must have six syllabic instants; the 1st seat of the 2nd and 4th pādas must contain eight syllabic instants; the 2nd seat must be a Cretic foot and the 3rd an lambic foot:

VETALIYA.

				ıst se	at.	2n	d se	at.	3rd s	eat.
sy	lo. o llabi stant	ic				Cı	reti	с.	Iam	bus.
ıst I	Pāda	6	six syl	labic	instants	-	_	_	_	_
2nd	,,	8	eight	,,	,,	-	_	- ;	-	_
3rd	,,	6	six	,,	,,	-	_	-	~	-
4th	,,	8	eight	,,	,,	-	_		~	_

Remarks. (a) The above is a perfect Vetāliya. In the 3rd seat, the following feet may be found instead of the Iambus:

- o pyrrhic.
- _ spondee.
- _ bacchic.
 - - amphibrac.
- (b) The sign of the long syllable (-) must be counted as 2, since it is equal to two short syllables.

Central Archaeological Library,
